# Organisation admin

CoderDojo Belgium's own staff and board. The organisation dashboard covers communication, the public site, awards, privacy requests, people and security; the Django admin is only for technical fixes, on request.

Screenshots taken on the development site (seeded demo data) as **org-priya-nair (organisation admin role, two-step login)**, 17 October 2026.

### The journey

- Mail campaigns, segments, journeys and templates
- Watch the mail queue
- Promotions, sponsors and awards
- Privacy requests, people and roles, sign-in policy
- Audit log and time-boxed Django admin access

Step 1

# Campaigns

Logging in (with two-step login) lands on the organisation dashboard. The sidebar groups its pages by area (Communication, Public site, Ninjas, Accounts, Organisation), and its switcher also lists the organisation's own events (Coolest Projects, CoderDojo Girlz). Campaigns are one-off mailings to a segment, with their results (queued, sent, bounced, suppressed).

`/manage/campaigns/`

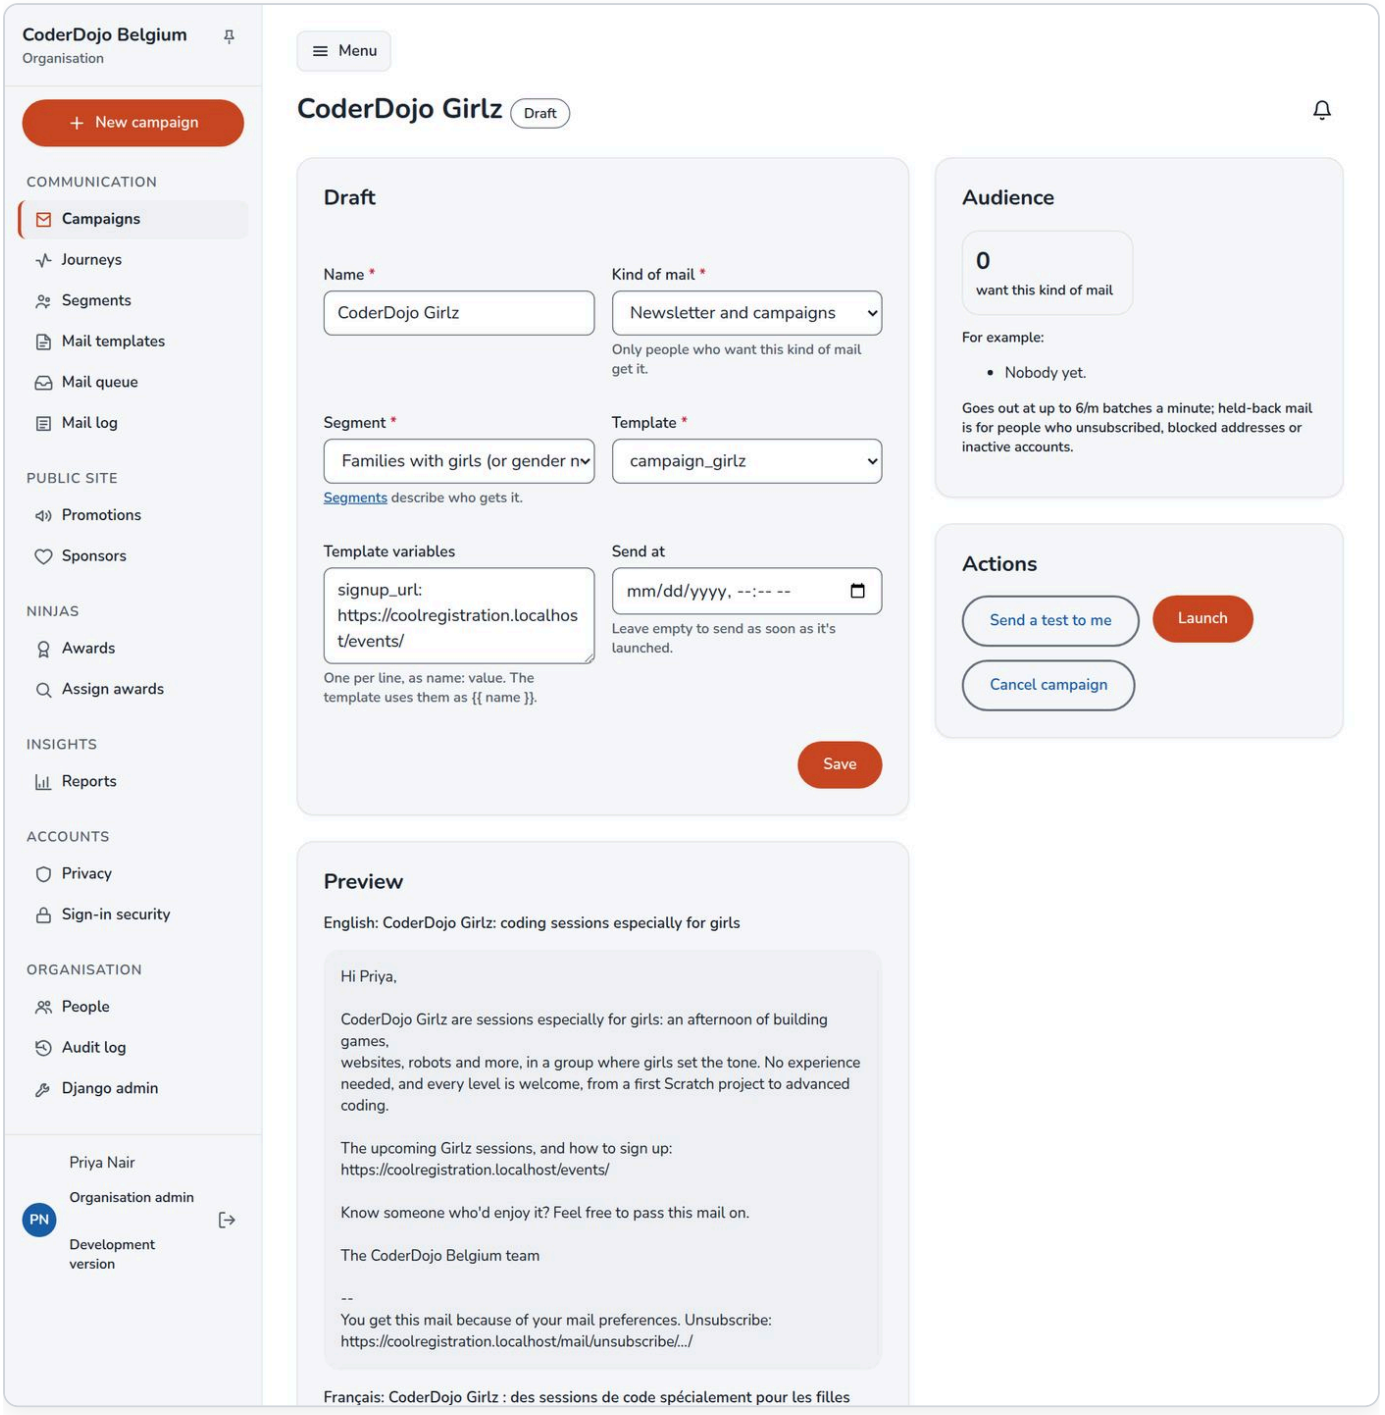

Step 2

# A campaign

Edit a draft, preview it in every language, see the audience count and a sample, send yourself a test, then launch (now or scheduled). The audience is frozen at launch.

`/manage/campaigns/2/`

## Step 2 A campaign (continued)

Bonjour Priya,

Les CoderDojo Girlz sont des sessions spécialement pour les filles : un après-midi
pour créer des jeux, des sites web, des robots et plus encore, dans un groupe où les
filles donnent le ton. Aucune expérience requise, tous les niveaux sont les bienvenus, du premier projet Scratch au code avancé.

Les prochaines sessions Girlz et l'inscription :
https://coolregistration.localhost/events/

Vous connaissez quelqu'un que ça intéresserait ? N'hésitez pas à transférer ce mail.

L'équipe CoderDojo Belgium

**Nederlands: CoderDojo Girlz: codeersessies speciaal voor meisjes**

Hallo Priya,

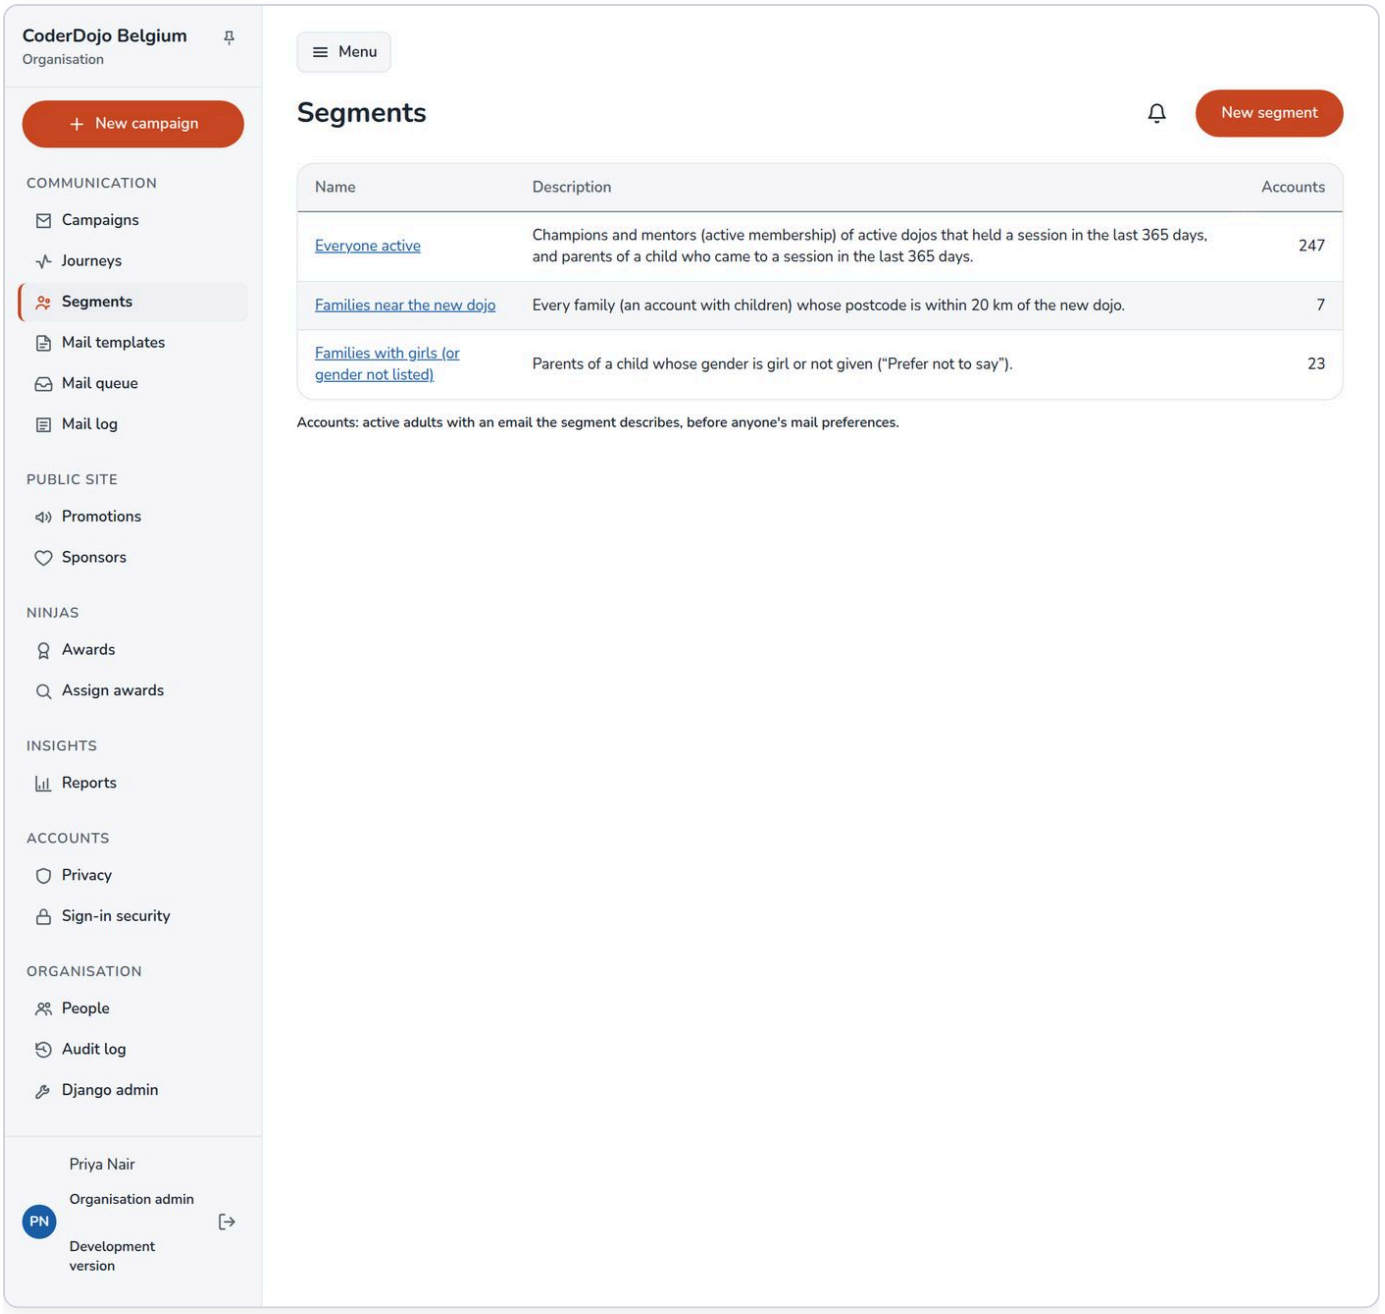

CoderDojo Girlz zijn sessies speciaal voor meisjes: een namiddag games, websites,
robots en meer bouwen, in een groep waar meisjes de toon zetten. Geen ervaring
nodig, en elk niveau is welkom, van een eerste Scratch-project tot gevorderd programmeren.

Step 3

# Segments

Audiences described without code, with live counts.

`/manage/segments/`

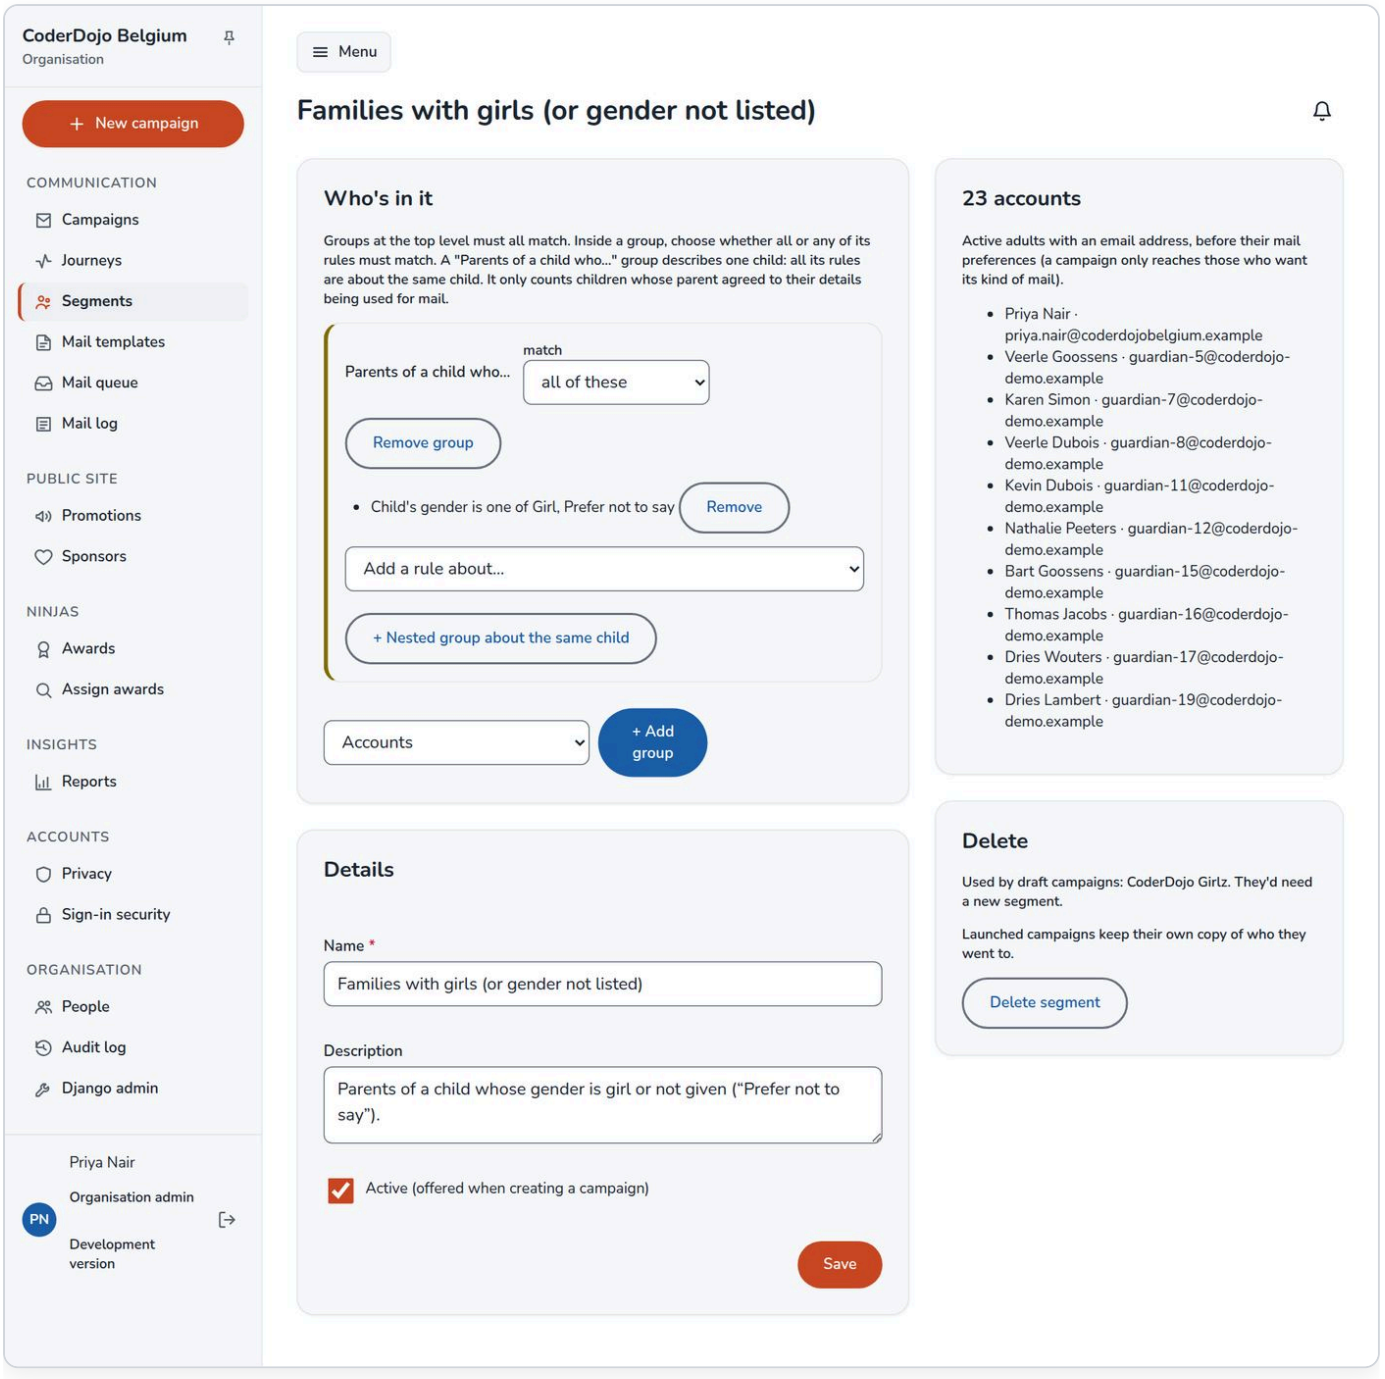

Step 4

# The segment builder

Groups of rules about accounts or about 'the same child' (age, gender, belt, home dojo, engagement stage, distance to a dojo, ...), ANDed or ORed and nested. Child rules only reach guardians who consented.

`/manage/segments/2/`

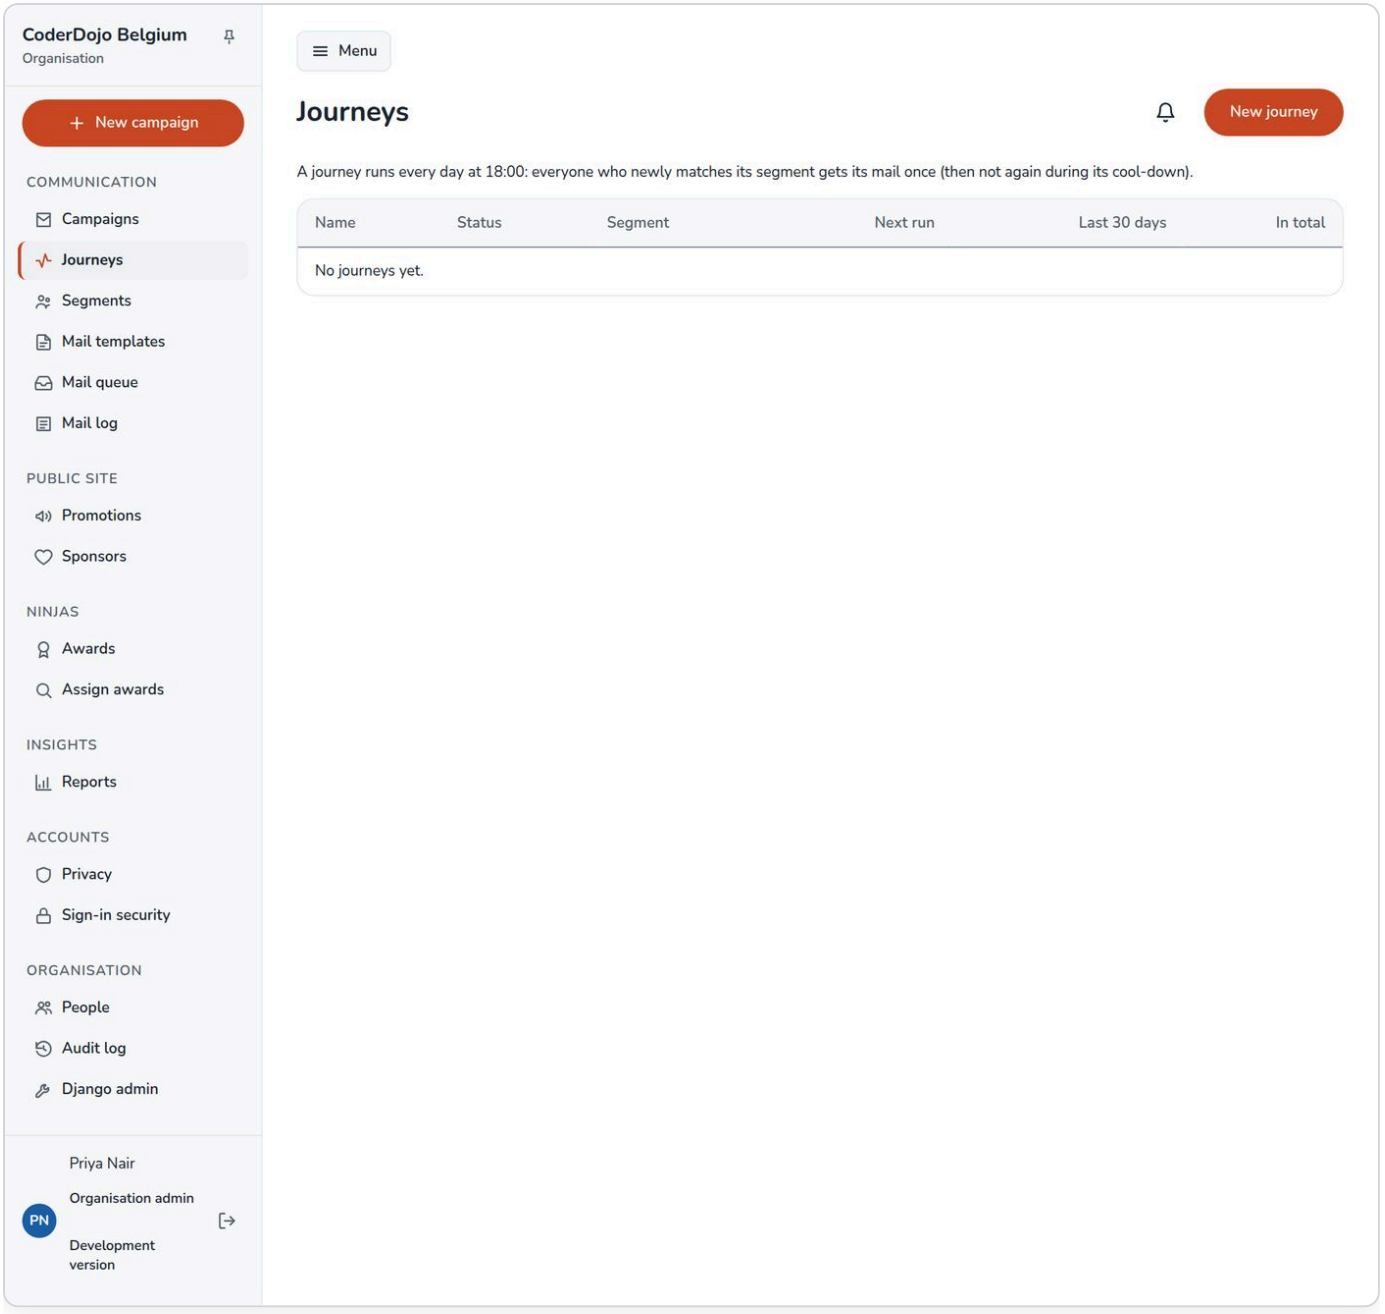

Step 5

# Journeys

Standing campaigns that run daily, e.g. a 'we miss you' mail the week a child becomes at risk of dropping out.

`/manage/journeys/`

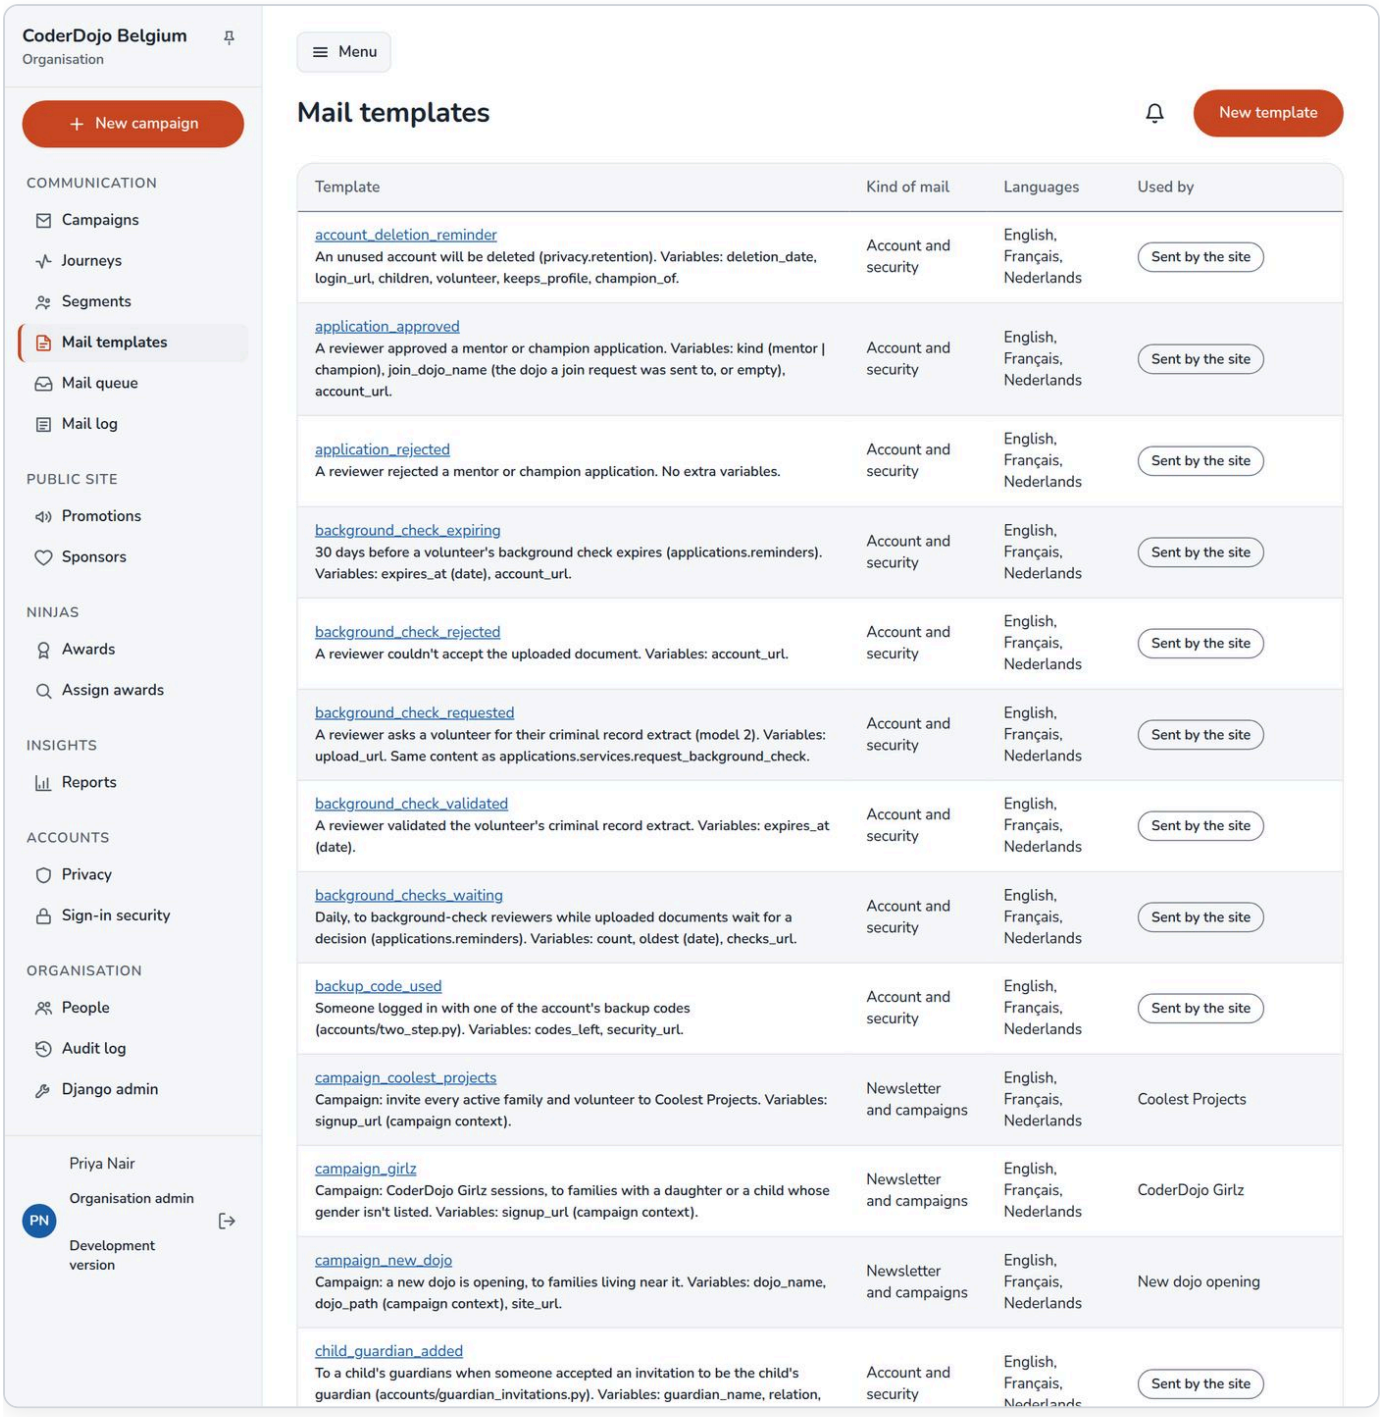

Step 6

# Mail templates

Every mail the site sends, in English, Dutch and French, and what uses it.

`/manage/templates/`

## Step 6 Mail templates (continued)

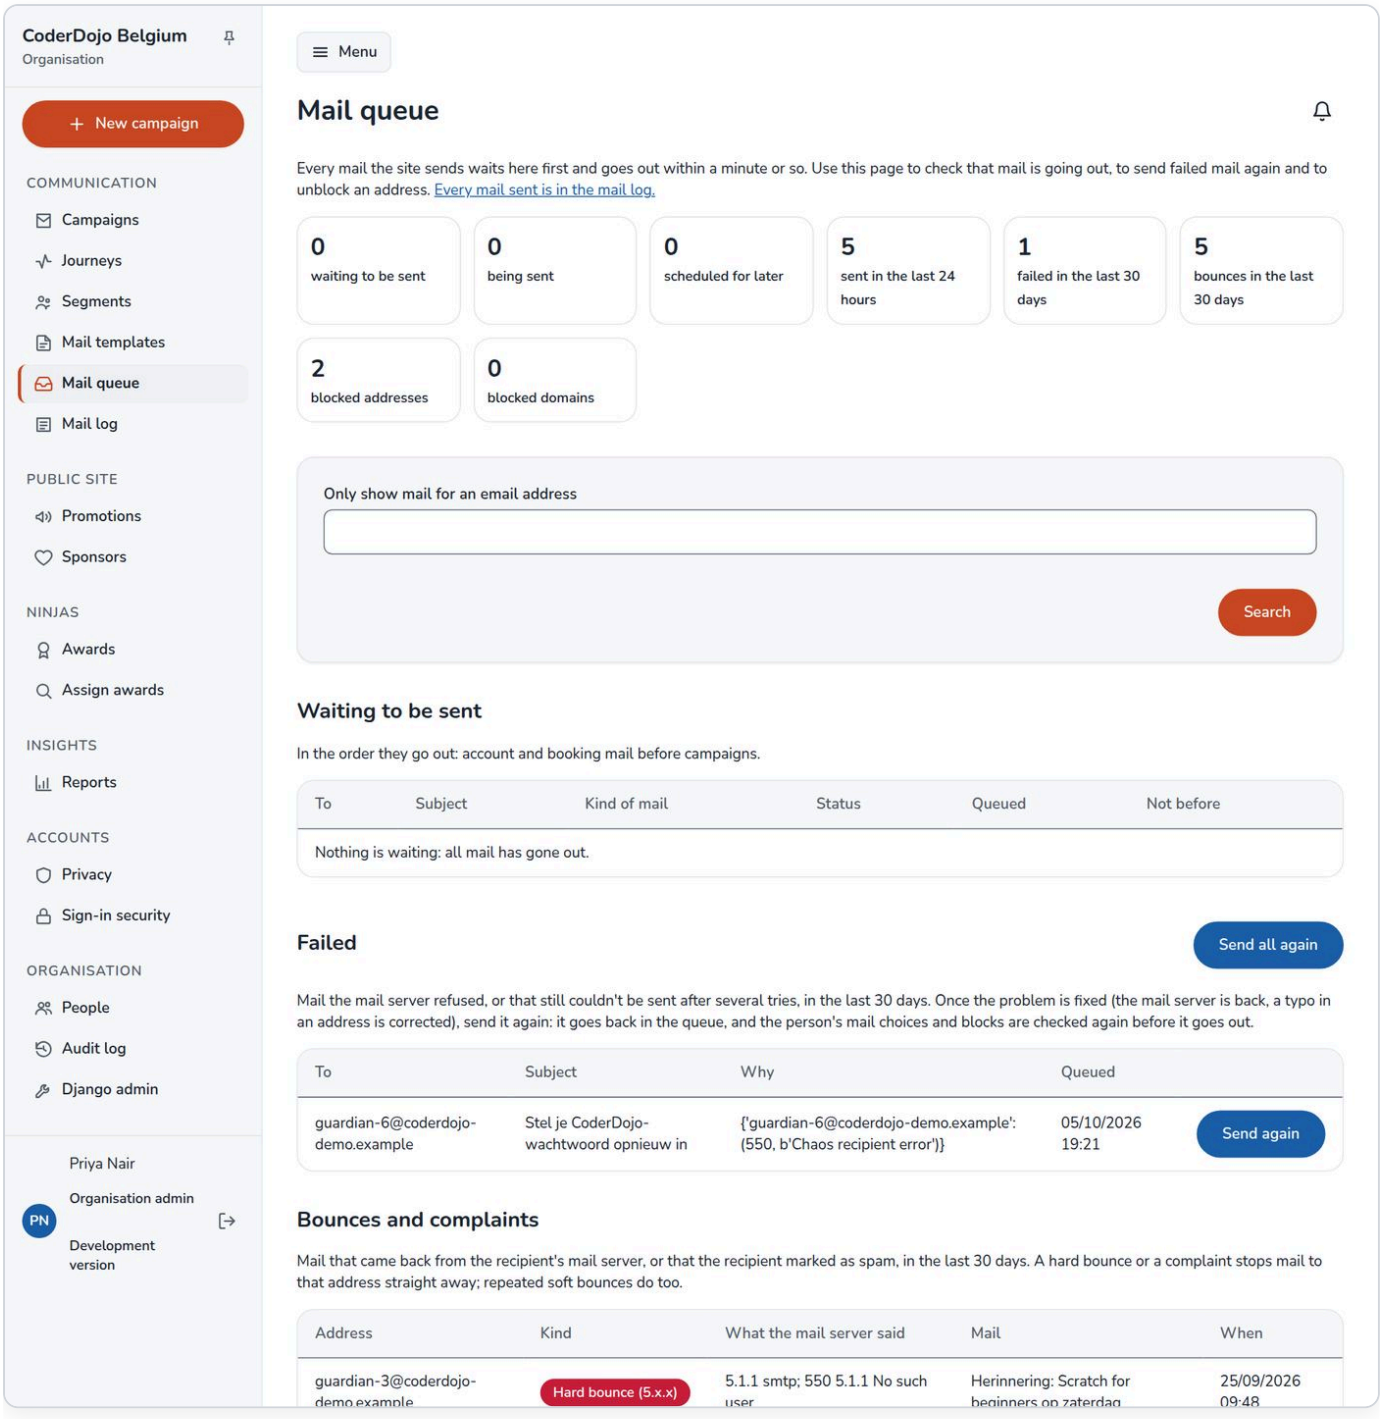

| | | | |
|---|---|---|---|
| child_name, child_url. | | | |
| child_guardian_invitation<br>An invitation to become a child's guardian (accounts/guardian_invitations.py; sent to the address, which may not have an account yet). Variables: invited_by, child_name, relation (parent, legal_guardian, other), accept_url, valid_days. | Account and security | English, Français, Nederlands | Sent by the site |
| child_guardian_invited<br>To a child's other guardians when someone is invited to become the child's guardian, before it happens (accounts/guardian_invitations.py). Variables: invited_by, email, relation, child_name, child_url, valid_days. | Account and security | English, Français, Nederlands | Sent by the site |
| child_guardian_removed<br>A child's guardian was removed or stepped down (accounts/guardian_invitations.py), to them and the others. Variables: guardian_name, removed_by, stepped_down, removed_you, child_name, child_url. | Account and security | English, Français, Nederlands | Sent by the site |
| child_login_changed<br>To a child's guardians when the child's own login changed (accounts/security_mail.py). Variables: child_name, child_url, change (what changed: see security_mail), method, new_email. | Account and security | English, Français, Nederlands | Sent by the site |
| dojo_message<br>A dojo's own mailing to its families (DATA_MODEL.md §25): the dojo team's text, never template code, inside this frame. Variables: dojo_name, dojo_url, subject, message. | News from your dojo | English, Français, Nederlands | Sent by the site Seed: thanks for this season, Seed: bring a charger |
| dojo_team_message<br>A dojo's own mail to its team (champion and mentors, DATA_MODEL.md §25): the champion's text, never template code, inside this frame. Variables: dojo_name, dojo_url, subject, message. | Volunteering | English, Français, Nederlands | Sent by the site |

Step 7

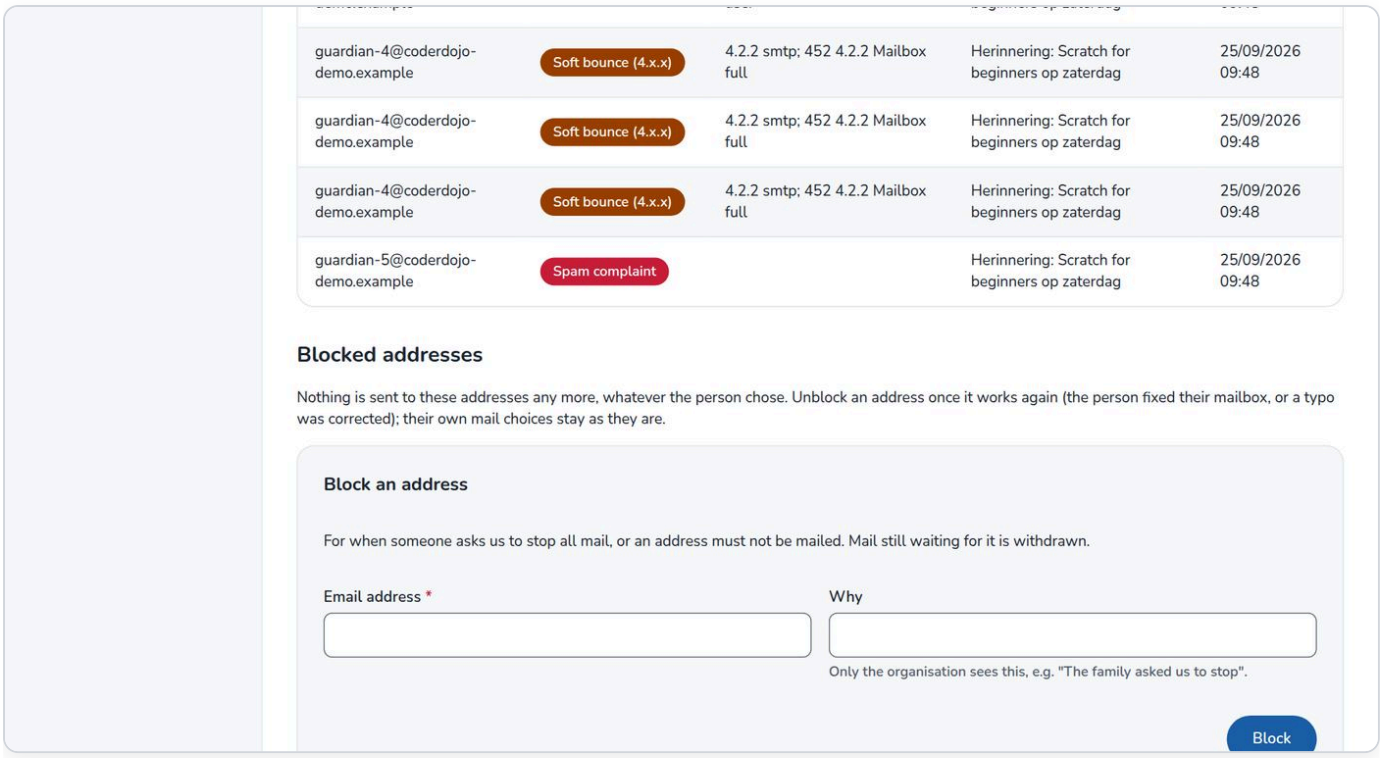

# Mail queue

Waiting and failed mail, bounces and blocked addresses, with a warning when the workers seem down. Failed mail is sent again with one click (one by one or all at once), an address is blocked by hand when someone asks us to stop, and unblocked once it works again.

`/manage/mail/`

## Step 7 Mail queue (continued)

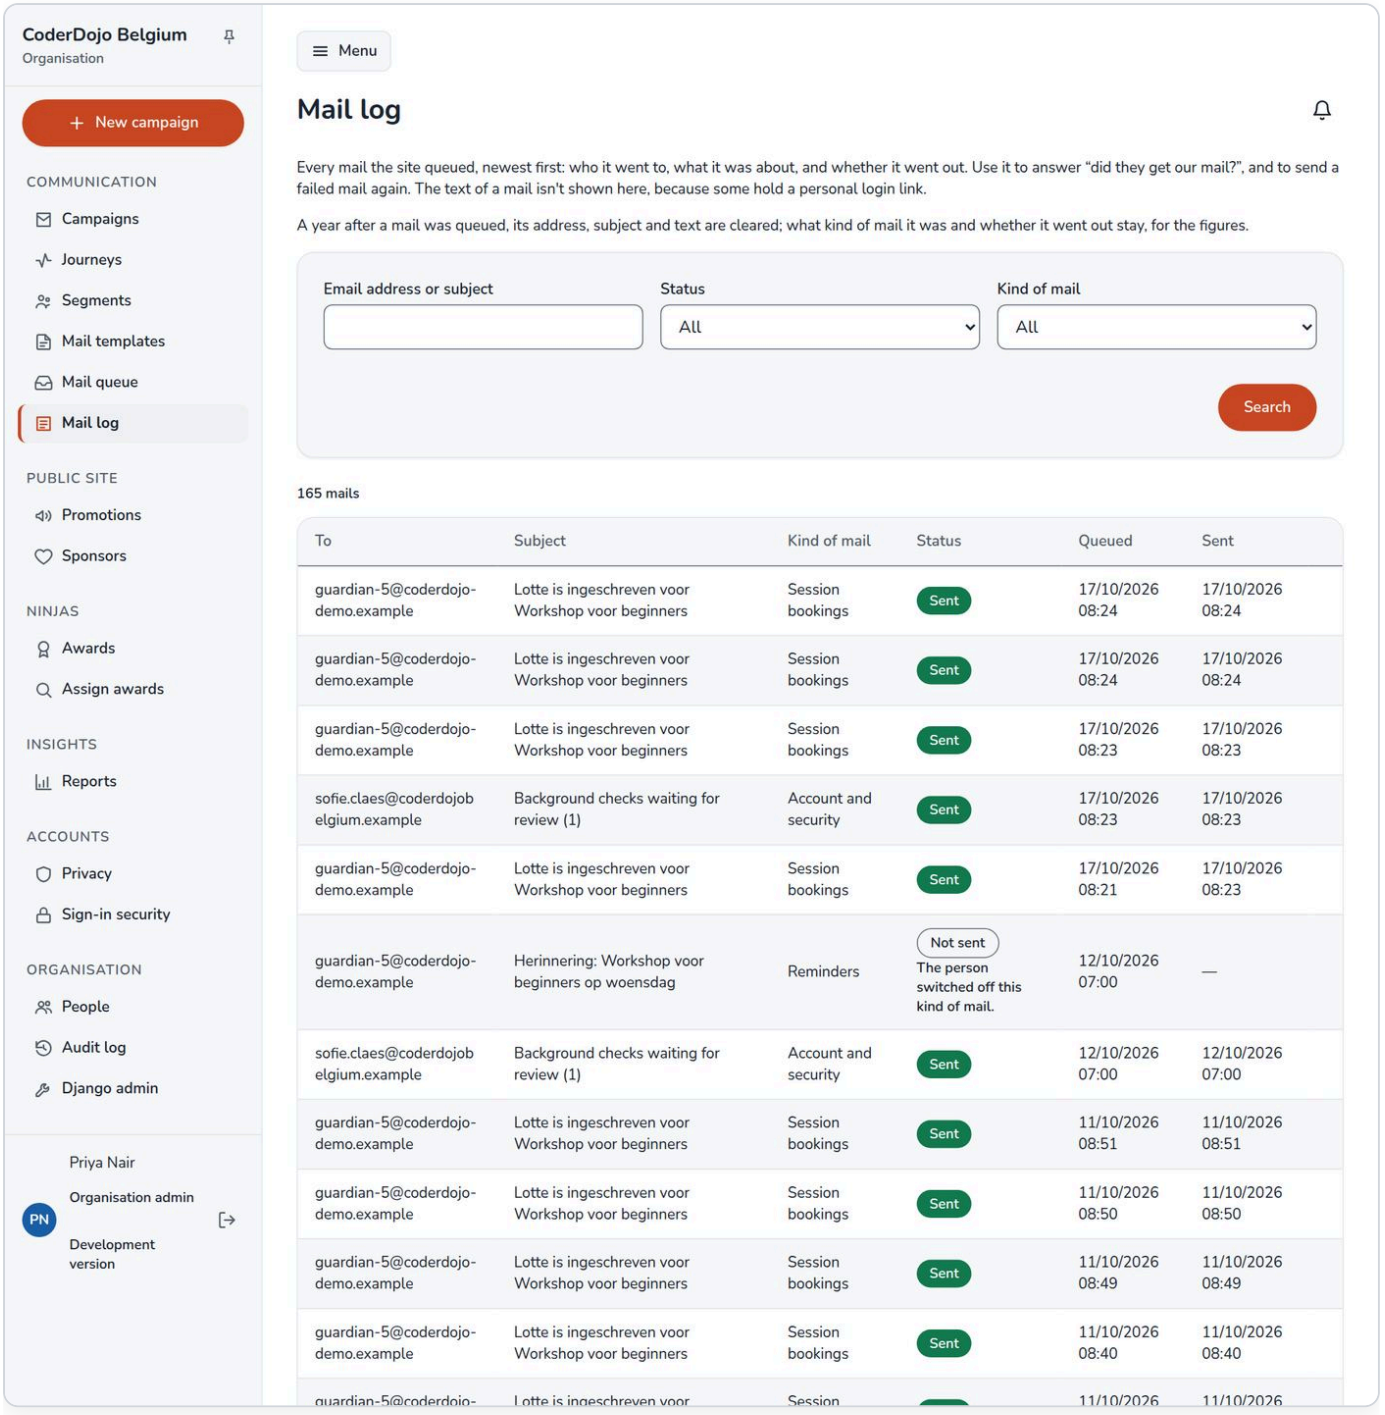

Step 8

# Mail log

Every mail the site sent, newest first, searchable by address or subject and filtered by status or kind: to answer 'did they get our mail?'. A mail's text isn't shown, since some hold a personal login link.

`/manage/mail/log/`

## Step 8 Mail log (continued)

Step 9

# Promotions

Feature events (e.g. Coolest Projects) on the homepage and elsewhere, for a set period.

`/manage/promotions/`

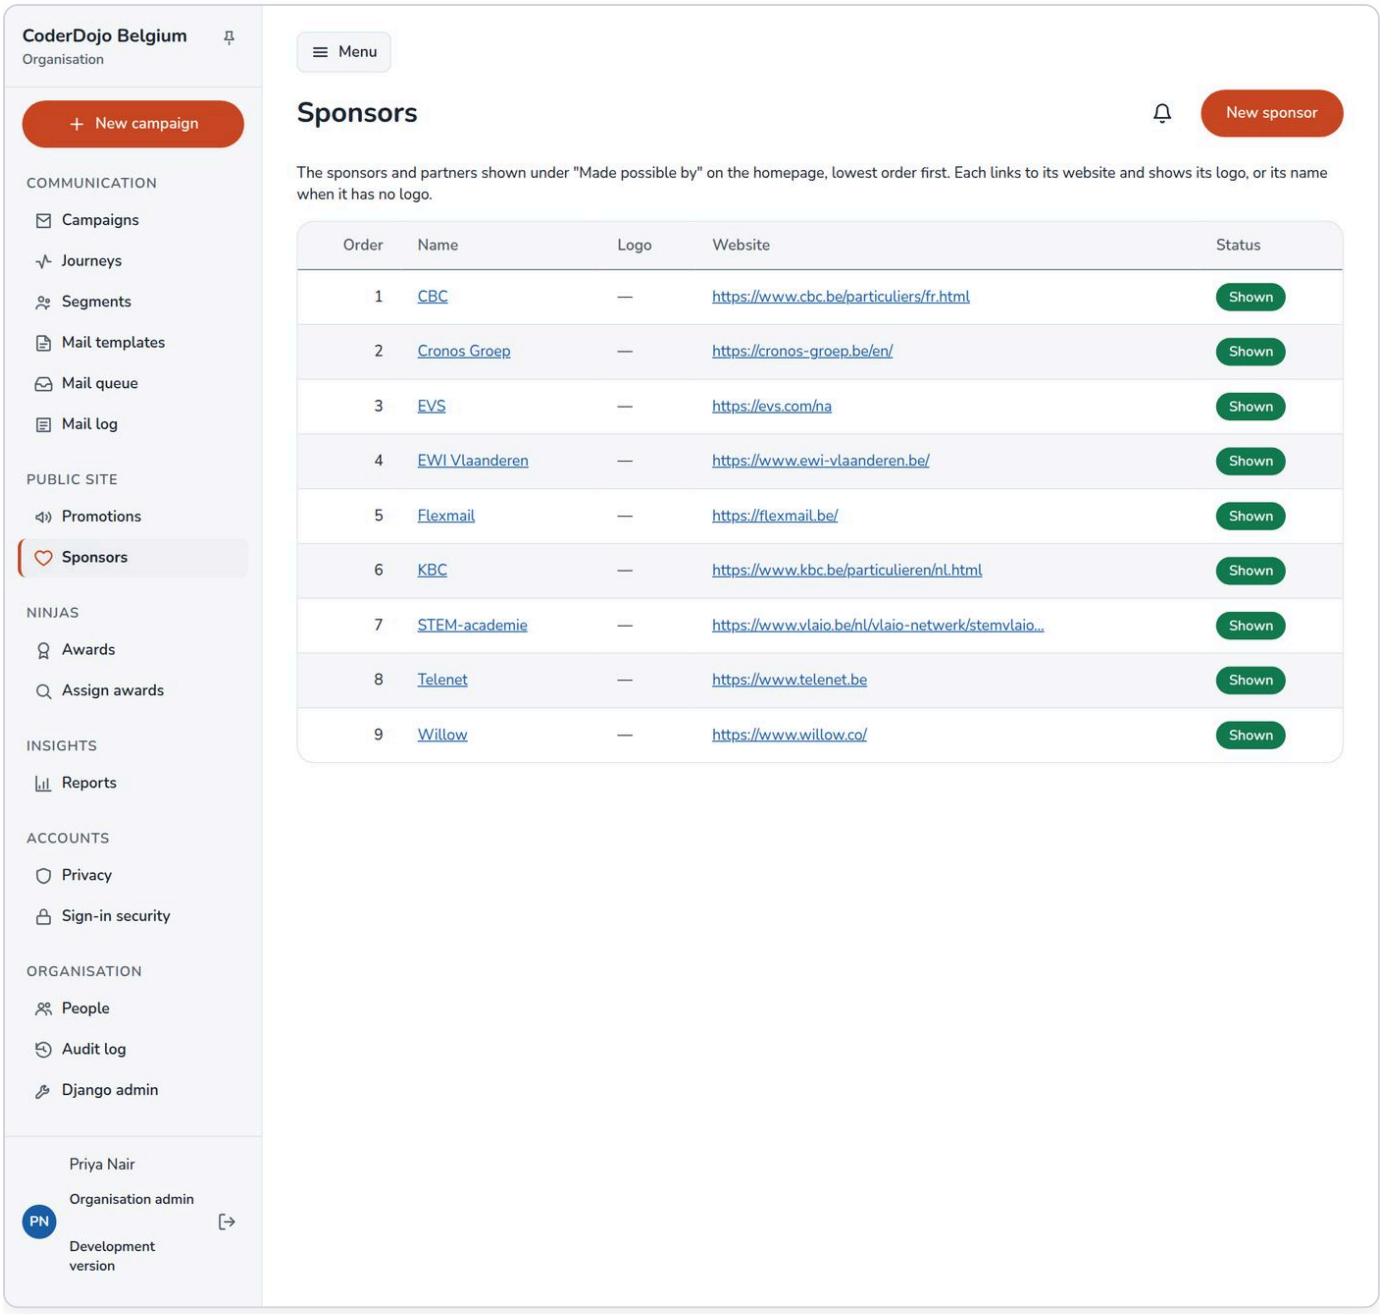

Step 10

# Sponsors

The homepage's 'Made possible by'.

`/manage/sponsors/`

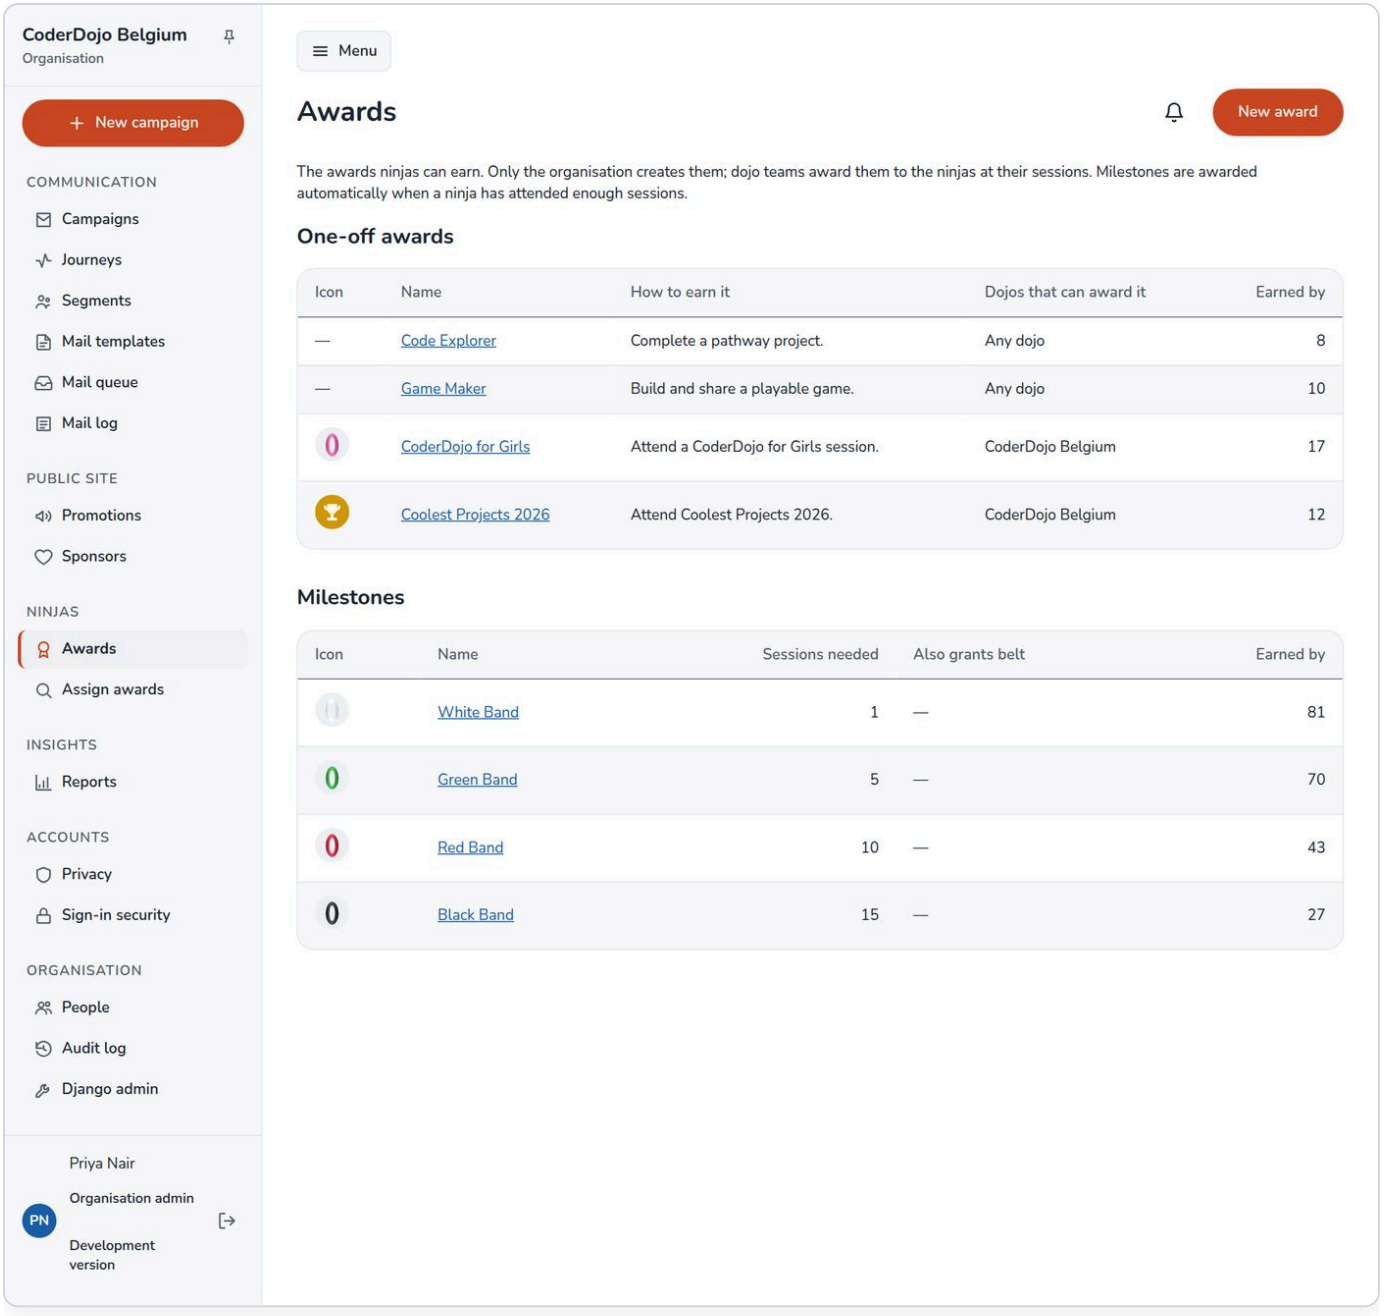

Step 11

# Awards

Only the organisation defines badges: one-off badges dojos can award, and milestone badges earned by attendance (which can grant a belt).

`/manage/awards/`

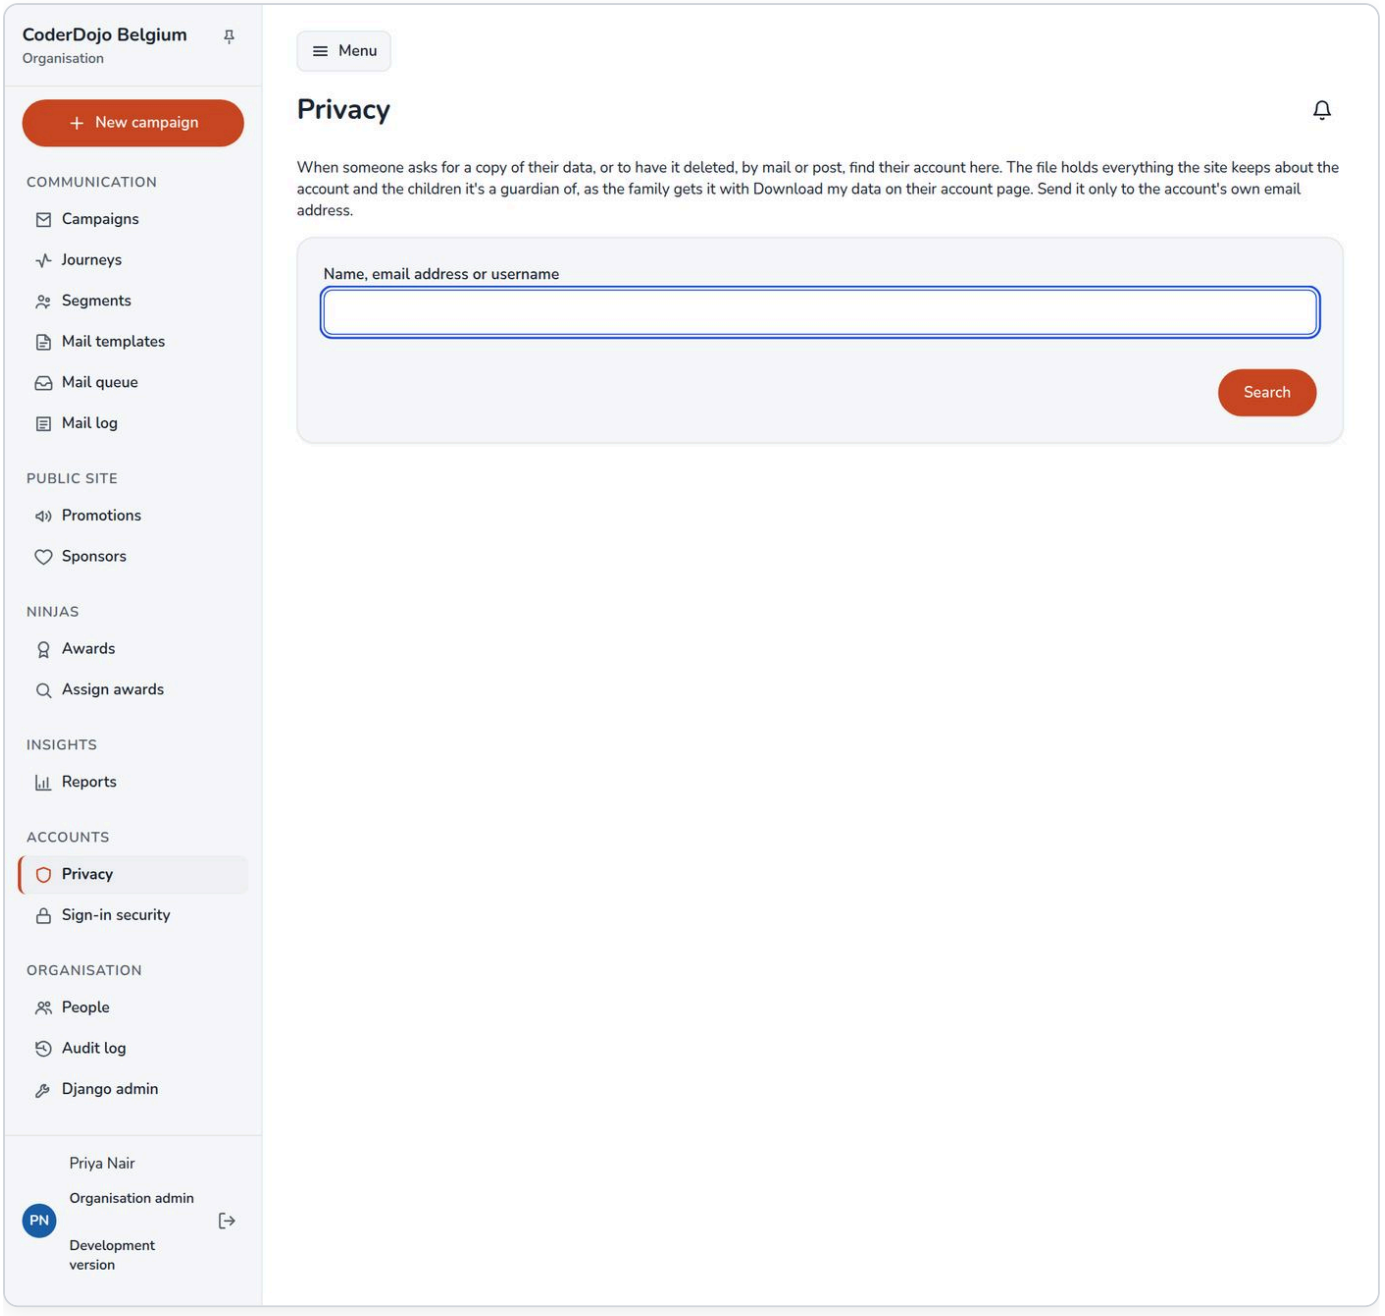

Step 12

# Privacy requests

Find any account to export its data, change its email address or delete it, and see the accounts retention is holding back.

`/manage/privacy/`

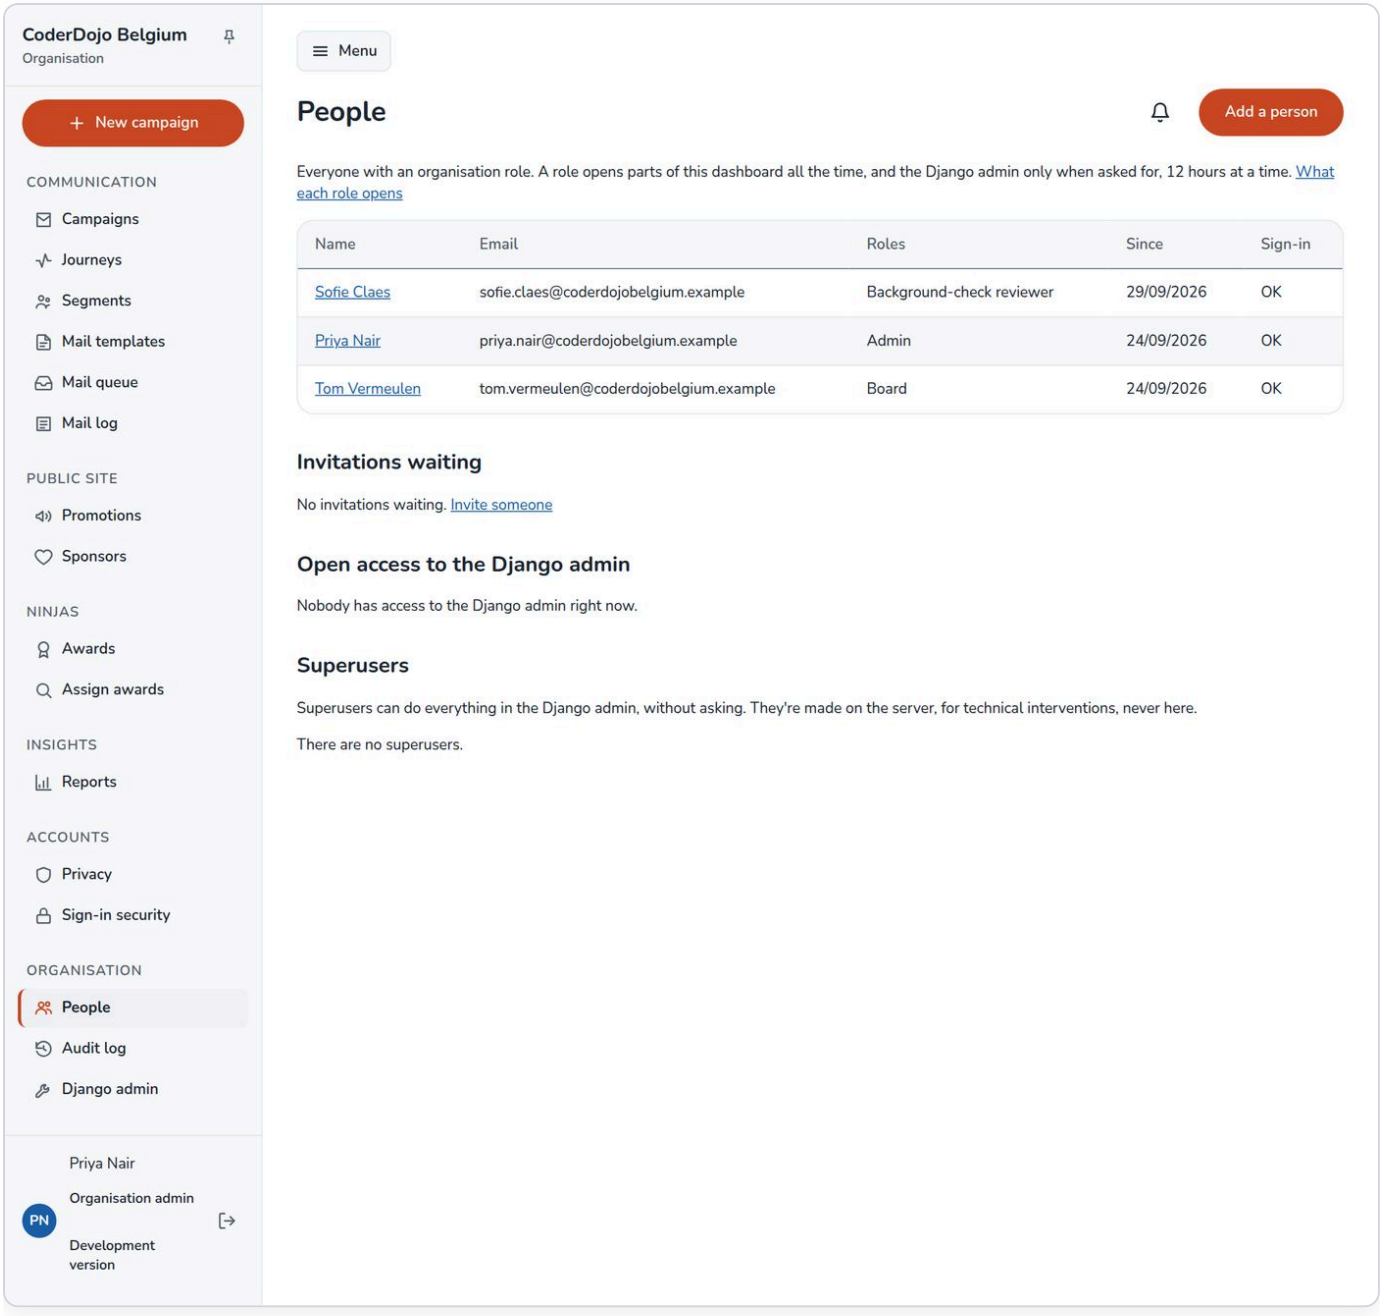

Step 13

# People

Who holds which organisation role (admin, board, reviewer), invitations for people without an account, and open Django admin access.

`/manage/people/`

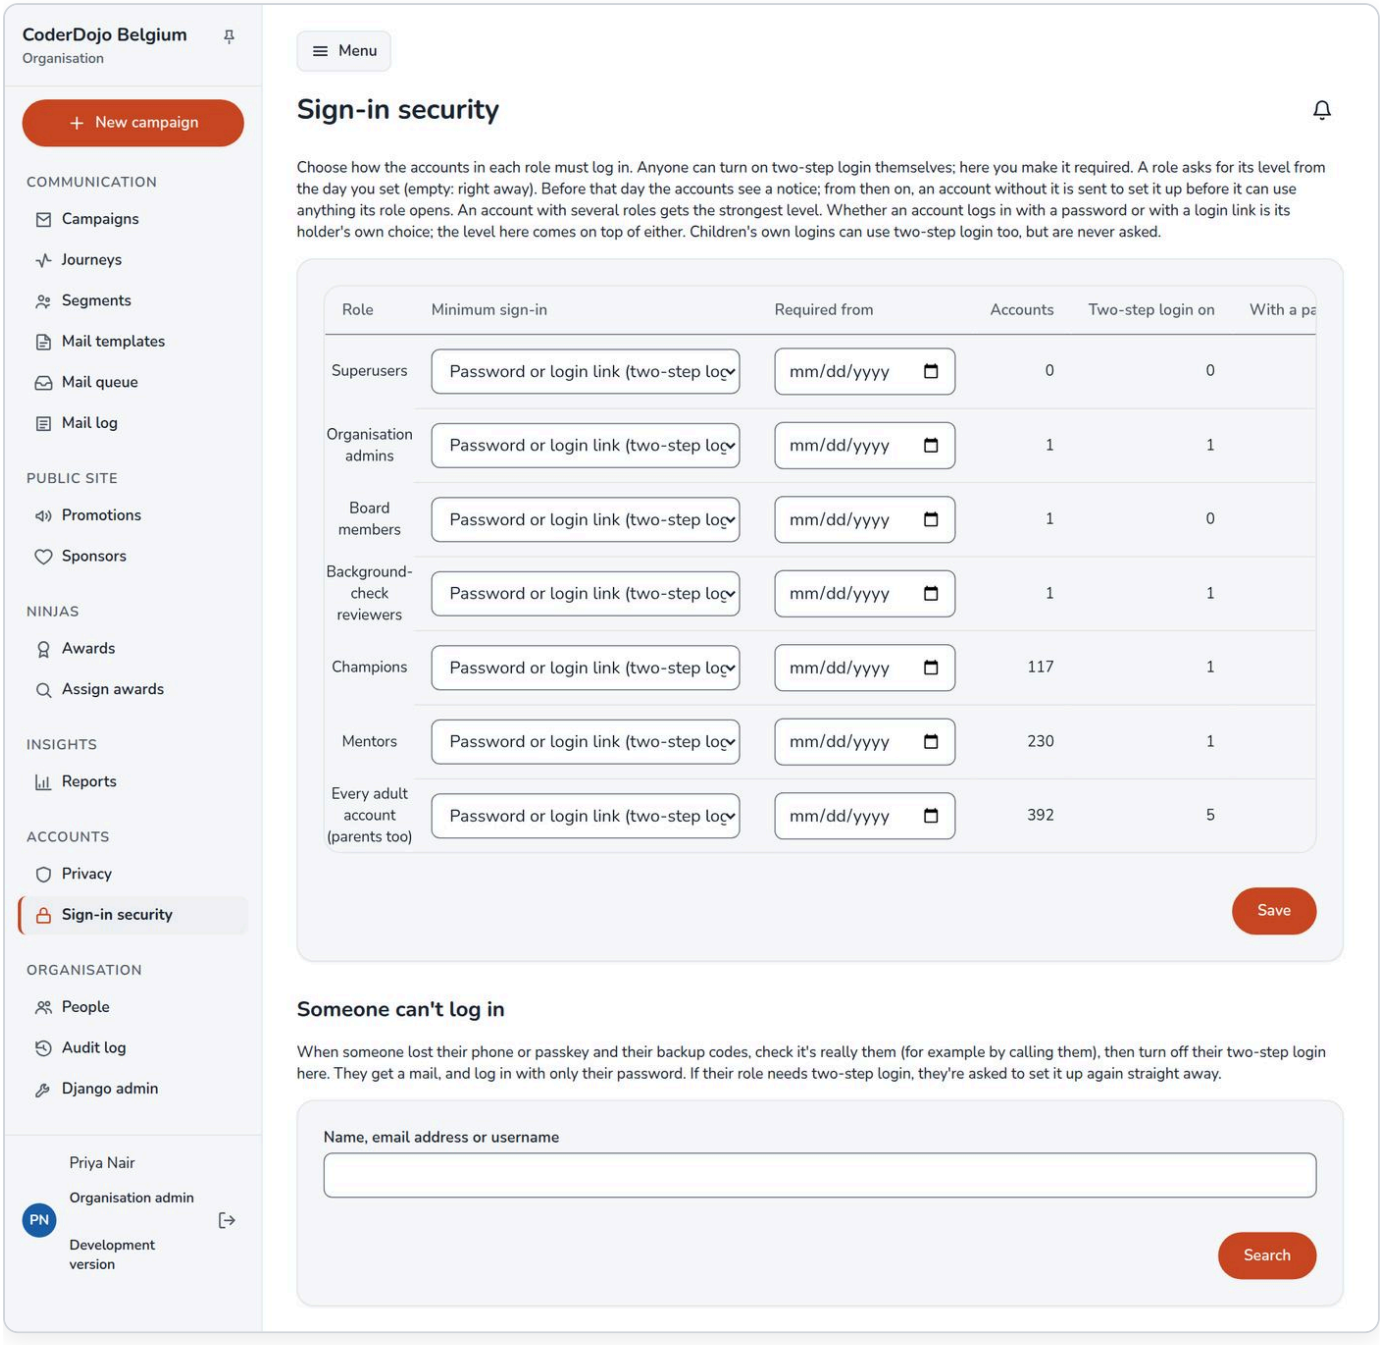

Step 14

# Sign-in policy

Which roles must use two-step login or passkeys, from which date; and turning off someone's two-step login when they've lost their phone.

`/manage/security/`

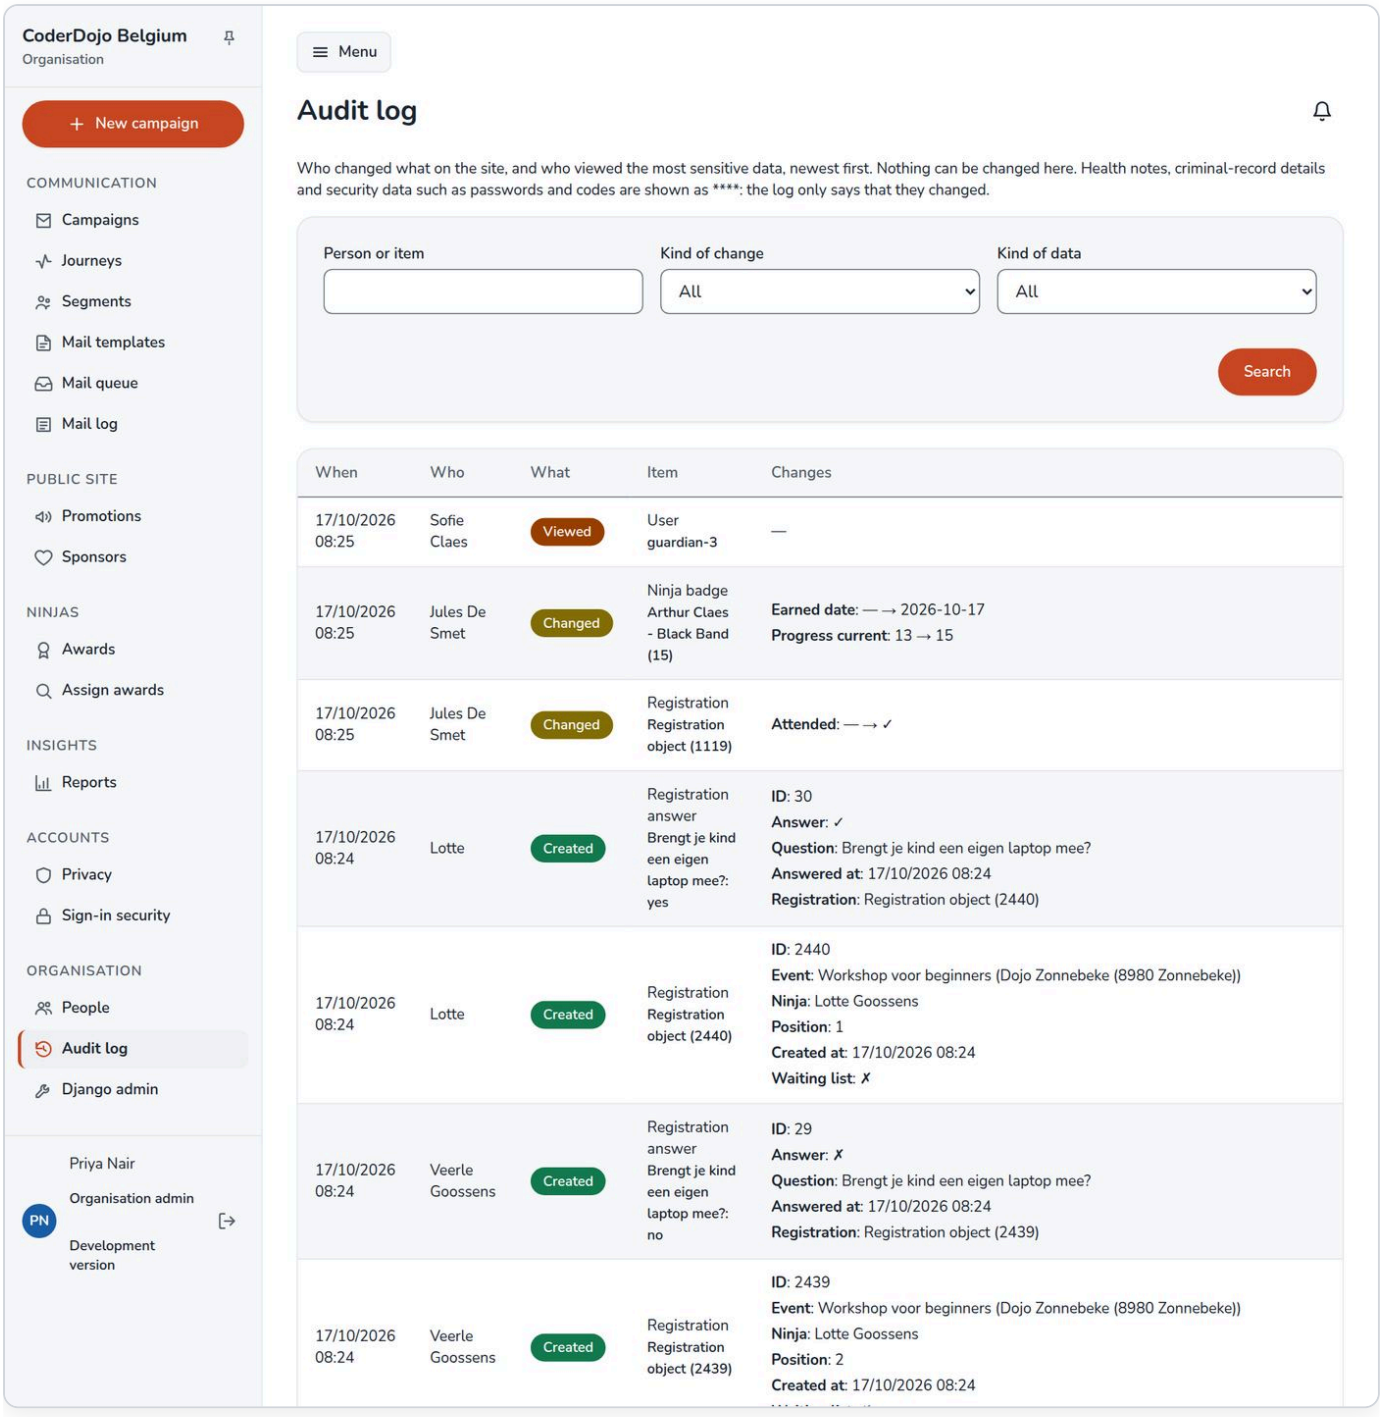

Step 15

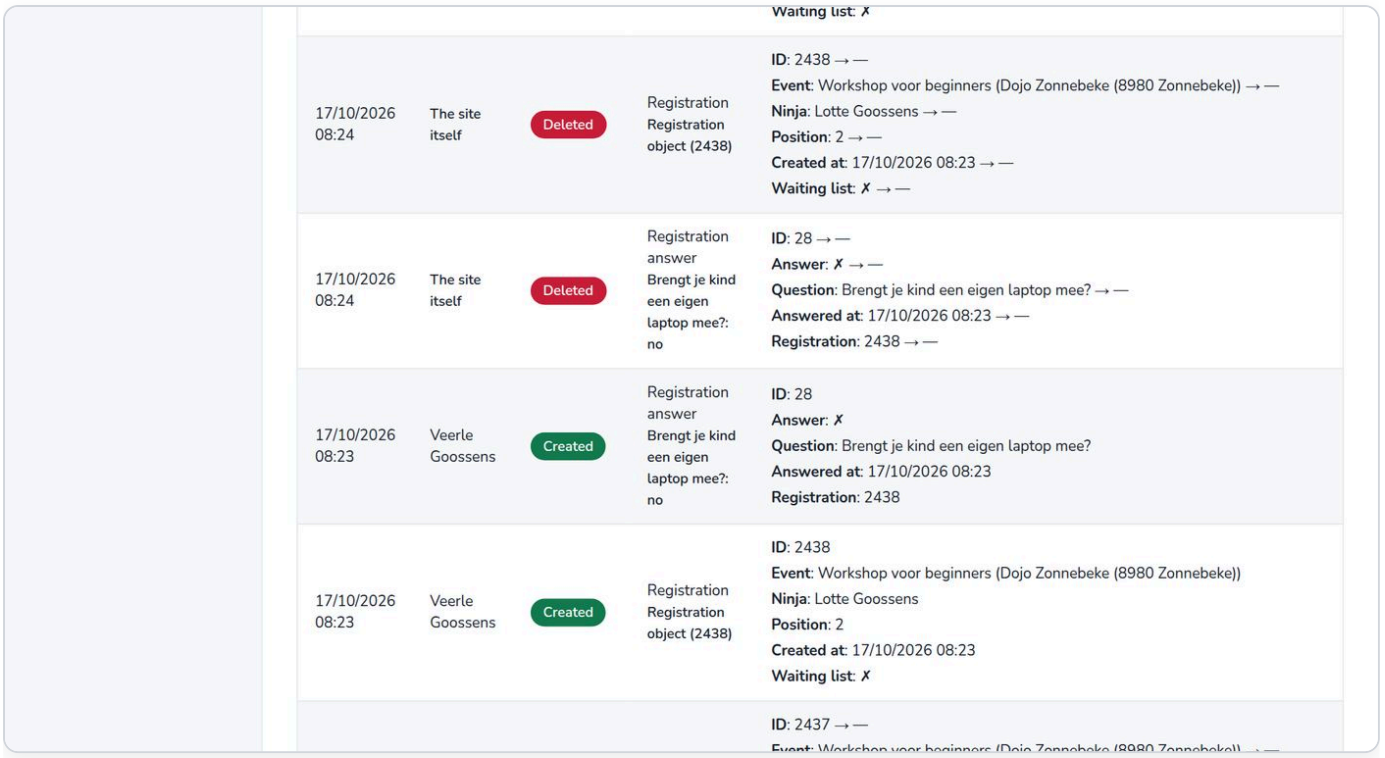

# Audit log

Who changed what, and who viewed sensitive data. Read-only; health and security fields are hidden.

`/manage/audit-log/`

## Step 15 Audit log (continued)

Step 16

# Django admin on request

The Django admin is for technical fixes only: an organisation role asks for it with a reason and their password, for 12 hours, and the other admins are notified.

`/manage/django-admin/`
