

Organisation admin

CoderDojo Belgium's own staff and board. The organisation dashboard covers communication, the public site, awards, privacy requests, people and security; the Django admin is only for technical fixes, on request.

Screenshots taken on the development site (seeded demo data) as **org-priya-nair** (organisation admin role, two-step login), 29 September 2026.

The journey

- Mail campaigns, segments, journeys and templates
- Watch the mail queue
- Promotions, sponsors and awards
- Privacy requests, people and roles, sign-in policy
- Audit log and time-boxed Django admin access

Steps in this document

| 8. Mail log | 16. Django admin on request |

Step 1

Campaigns

Logging in (with two-step login) lands on the organisation dashboard. The sidebar groups its pages by area (Communication, Public site, Ninjas, Accounts, Organisation), and its switcher also lists the organisation's own events (Coolest Projects, CoderDojo Girlz). Campaigns are one-off mailings to a segment, with their results (queued, sent, bounced, suppressed).

English: CoderDojo Girlz: coding sessions especially for girls

Hi Priya,

CoderDojo Girlz are sessions especially for girls: an afternoon of building
games, websites, robots and more, in a group where girls set the tone. No experience
needed, and every level is welcome, from a first Scratch project to advanced
coding.

The upcoming Girlz sessions, and how to sign up:
https://coolregistration.localhost/events/

Know someone who'd enjoy it? Feel free to pass this mail on.

The CoderDojo Belgium team

Français: CoderDojo Girlz : des sessions de code spécialement pour les filles

Bonjour Priya,

Les CoderDojo Girtz sont des sessions spécialement pour les filles : un après-midi pour créer des jeux, des sites web, des robots et plus encore, dans un groupe où les filles donnent le ton. Aucune expérience requise, tous les niveaux sont les bienvenus, du premier projet Scratch au code avancé.

Les prochaines sessions Girtz et l'inscription :
<https://coolregistration.localhost/events/>

Vous connaissez quelqu'un que ça intéresserait ? N'hésitez pas à transférer ce mail.

Nederlands: CoderDojo Girtz: codeersessies speciaal voor meisjes

Hallo Priya,

CoderDojo Girtz zijn sessies speciaal voor meisjes: een namiddag games, websites, robots en meer bouwen, in een groep waar meisjes de toon zetten. Geen ervaring nodig, en elk niveau is welkom, van een eerste Scratch-project tot gevorderd programmeren.

Step 3

Segments

Audiences described without code, with live counts.

Segments

New segment

Name	Description	Accounts
Everyone active	Champions and mentors (active membership) of active dojos that held a session in the last 365 days, and parents of a child who came to a session in the last 365 days.	245
Families near the new dojo	Every family (an account with children) whose postcode is within 20 km of the new dojo.	7
Families with girls (or gender not listed)	Parents of a child whose gender is girl or not given ("Prefer not to say").	22

Accounts: active adults with an email the segment describes, before anyone's mail preferences.

Step 4

The segment builder

Groups of rules about accounts or about 'the same child' (age, gender, belt, home dojo, engagement stage, distance to a dojo, ...), ANDed or ORed and nested. Child rules only reach guardians who consented.

Waiting to be sent

In the order they go out: account and booking mail before campaigns.

To	Subject	Kind of mail	Status	Queued	Not before
Nothing is waiting: all mail has gone out.					

Failed

Send all again

Mail the mail server refused, or that still couldn't be sent after several tries, in the last 30 days. Once the problem is fixed (the mail server is back, a typo in an address is corrected), send it again: it goes back in the queue, and the person's mail choices and blocks are checked again before it goes out.

To	Subject	Why	Queued	
guardian-6@coderdojo-demo.example	Stel je CoderDojo-wachtwoord opnieuw in	{'guardian-6@coderdojo-demo.example': (550, b'Chaos recipient error')}	05/10/2026 19:21	Send again

Bounces and complaints

Mail that came back from the recipient's mail server, or that the recipient marked as spam, in the last 30 days. A hard bounce or a complaint stops mail to that address straight away; repeated soft bounces do too.

Address	Kind	What the mail server said	Mail	When
guardian-3@coderdojo-demo.example	Hard bounce (5.x.x)	5.1.1 smtp; 550 5.1.1 No such user	Herinnering: Scratch for beginners op zaterdag	25/09/2026 09:48

Step 7

Mail queue (continued)

guardian-4@coderdojo-demo.example	Soft bounce (4.x.x)	4.2.2 smtp; 452 4.2.2 Mailbox full	Herinnering: Scratch for beginners op zaterdag	25/09/2026 09:48
guardian-4@coderdojo-demo.example	Soft bounce (4.x.x)	4.2.2 smtp; 452 4.2.2 Mailbox full	Herinnering: Scratch for beginners op zaterdag	25/09/2026 09:48
guardian-4@coderdojo-demo.example	Soft bounce (4.x.x)	4.2.2 smtp; 452 4.2.2 Mailbox full	Herinnering: Scratch for beginners op zaterdag	25/09/2026 09:48
guardian-5@coderdojo-demo.example	Spam complaint		Herinnering: Scratch for beginners op zaterdag	25/09/2026 09:48

Blocked addresses

Nothing is sent to these addresses any more, whatever the person chose. Unblock an address once it works again (the person fixed their mailbox, or a typo was corrected); their own mail choices stay as they are.

Block an address

For when someone asks us to stop all mail, or an address must not be mailed. Mail still waiting for it is withdrawn.

Email address *

Why

Only the organisation sees this, e.g. "The family asked us to stop".

Block

Step 8

Mail log

Every mail the site sent, newest first, searchable by address or subject and filtered by status or kind: to answer 'did they get our mail?'. A mail's text isn't shown, since some hold a personal login link.

Promotions

A promotion features an event in one place on the public site for a while. Within a place, the lowest rank shows first. Without an end, a promotion stops when its event starts.

You can promote any upcoming event. To plan the organisation's own events yourself, you need a valid background check and a place on the team of the organisation's dojo.

Homepage: large card under the introduction

No invitations waiting. [Invite someone](#)

Open access to the Django admin

Nobody has access to the Django admin right now.

Superusers

Superusers can do everything in the Django admin, without asking. They're made on the server, for technical interventions, never here.

There are no superusers.

Sign-in policy

Which roles must use two-step login or passkeys, from which date; and turning off someone's two-step login when they've lost their phone.

Sign-in security

Choose how the accounts in each role must log in. Anyone can turn on two-step login themselves; here you make it required. A role asks for its level from the day you set (empty: right away). Before that day the accounts see a notice; from then on, an account without it is sent to set it up before it can use anything its role opens. An account with several roles gets the strongest level. Whether an account logs in with a password or with a login link is its holder's own choice; the level here comes on top of either. Children's own logins can use two-step login too, but are never asked.

Role	Minimum sign-in	Required from	Accounts	Two-step login on	With a passkey
Superusers	Password or login link (two-step login)	mm/dd/yyyy	0	0	
Organisation admins	Password or login link (two-step login)	mm/dd/yyyy	1	1	
Board members	Password or login link (two-step login)	mm/dd/yyyy	1	0	
Background-check reviewers	Password or login link (two-step login)	mm/dd/yyyy	1	1	
Champions	Password or login link (two-step login)	mm/dd/yyyy	117	1	
Mentors	Password or login link (two-step login)	mm/dd/yyyy	230	1	
Every adult account (parents too)	Password or login link (two-step login)	mm/dd/yyyy	392	5	

Save

Someone can't log in

When someone lost their phone or passkey and their backup codes, check it's really them (for example by calling them), then turn off their two-step login here. They get a mail, and log in with only their password. If their role needs two-step login, they're asked to set it up again straight away.

Step 16

Django admin on request

The Django admin is for technical fixes only: an organisation role asks for it with a reason and their password, for 12 hours, and the other admins are notified.

Menu

Django admin

The Django admin is the technical tool for fixing data by hand. You get it for 12 hours, with your role's permissions; after that it closes by itself. Your request and its end are recorded in the audit log, and the other organisation admins get a notification.

Why do you need it? *

For example: fix a registration by hand. The other organisation admins see this.

Your password *

Ask for access

Your earlier access
