Ninja

A child aged 7–17 who comes to a dojo. Most ninjas never log in; their parent can give them a login of their own, so they can follow their progress and sign themselves up.

Screenshots taken on the development site (seeded demo data) as **guardian-5-child-1 (Lotte, 14, own login, home dojo Zonnebeke)**, 29 September 2026.

The journey

- Log in with the login a parent set up
- See belts, badges and session history
- Explore learning pathways
- Sign themselves up for a session
- Manage their own sign-in security

Steps in this document

1. Logging in with their own login
2. My belts, badges and history
3. Explore a learning pathway
4. Find the next session
5. ... and signs themselves up
6. Place confirmed
7. Their own sign-in security

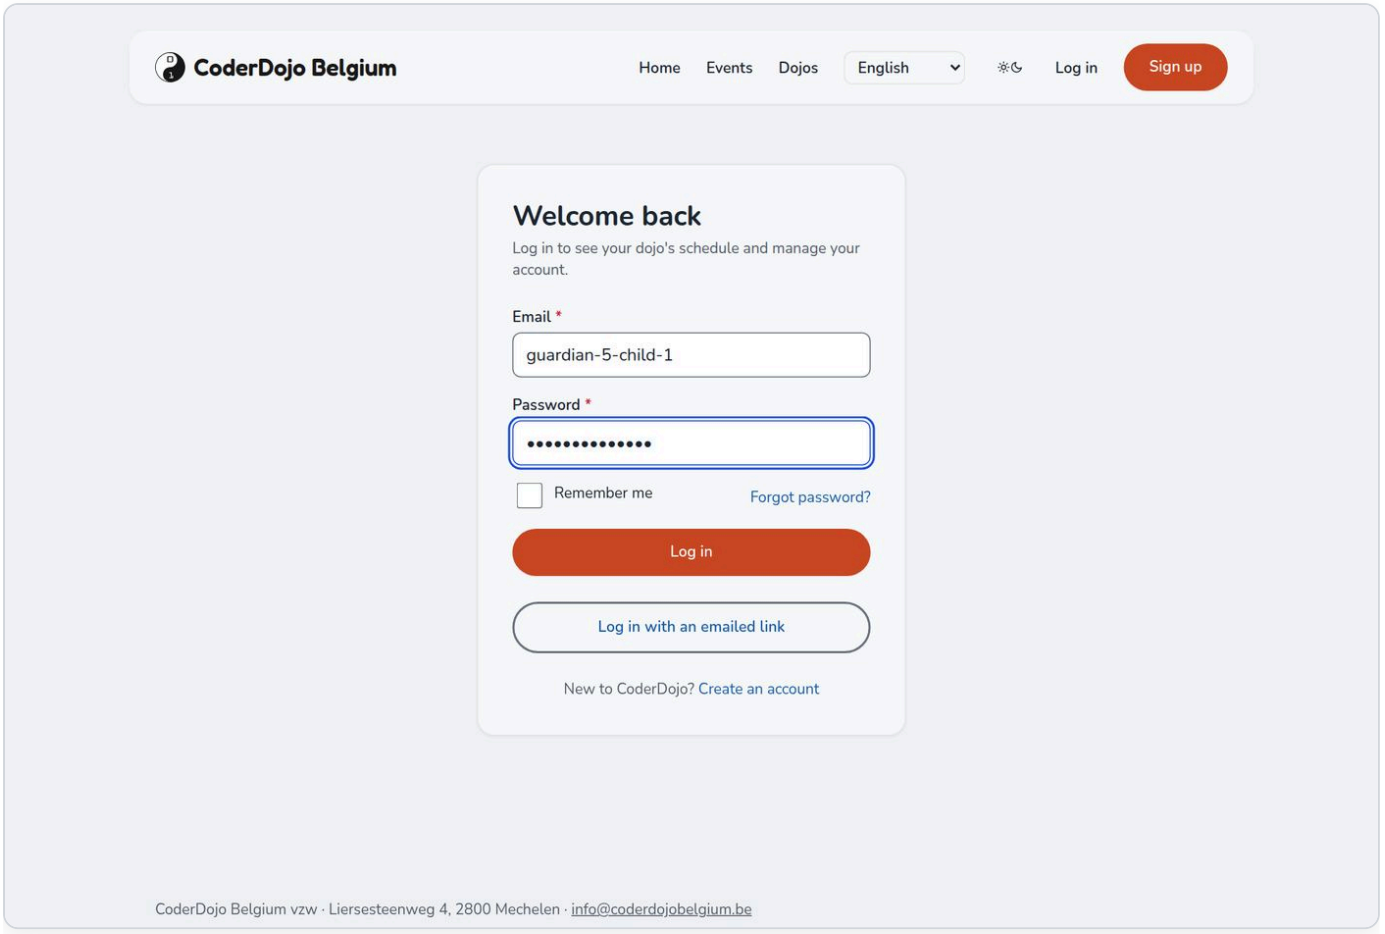

coolregistration.localhost · generated from the running application

Step 1

Logging in with their own login

A parent can give a child (7–17) a login of their own, with a password or login links (two-step login is possible too). The child logs in with the username the parent was given.

`/login/`

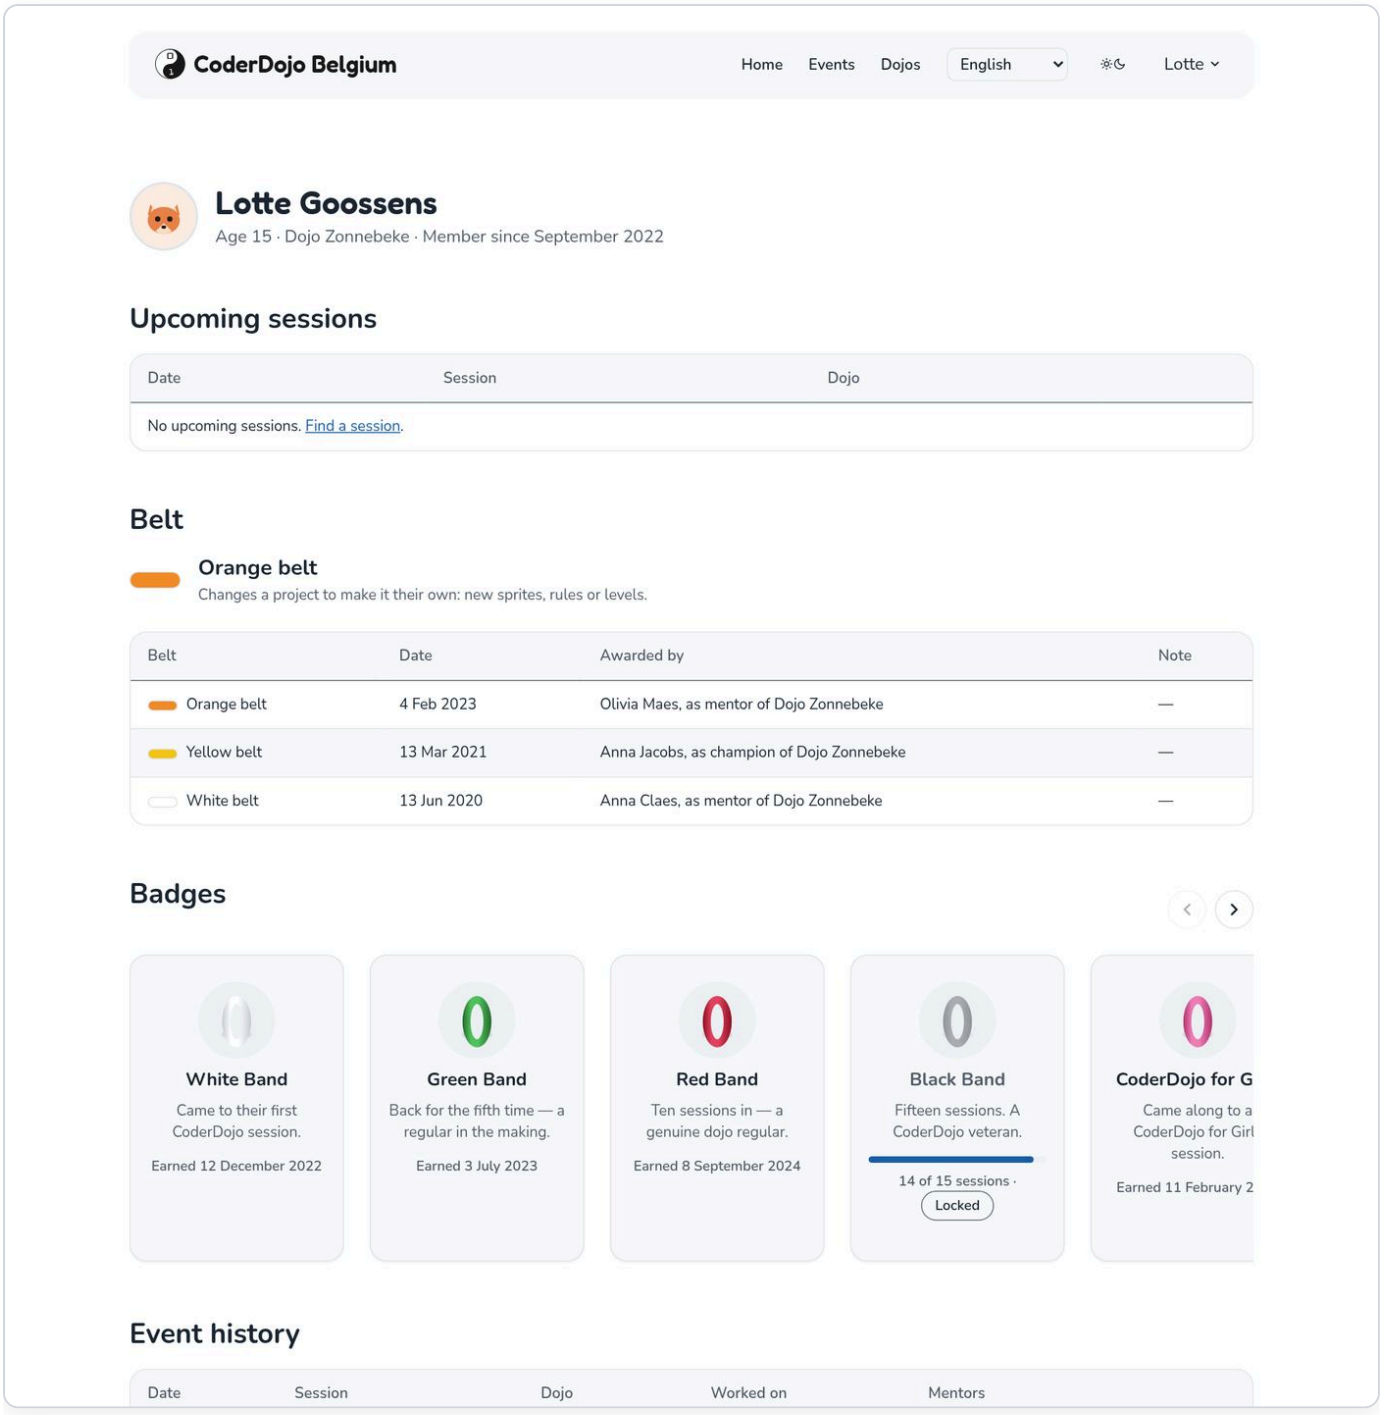

Step 2

My belts, badges and history

The ninja sees their current belt and who awarded it, their badges (with progress towards the next attendance wristband) and every session they came to. They can look, not edit: their details stay with the parent (the one thing they change themselves is their avatar, from the standard set).

Sign-in security

Step 3

Explore a learning pathway

Pathways (Scratch, Python, web development, ...) show the steps and projects a ninja can work through at the dojo.

`/pathways/1/`

Step 3 Explore a learning pathway (continued)

The building blocks every later pathway builds on.

Conditionals | Debugging | Events & broadcasting | Loops | Sequencing | Variables

Questions

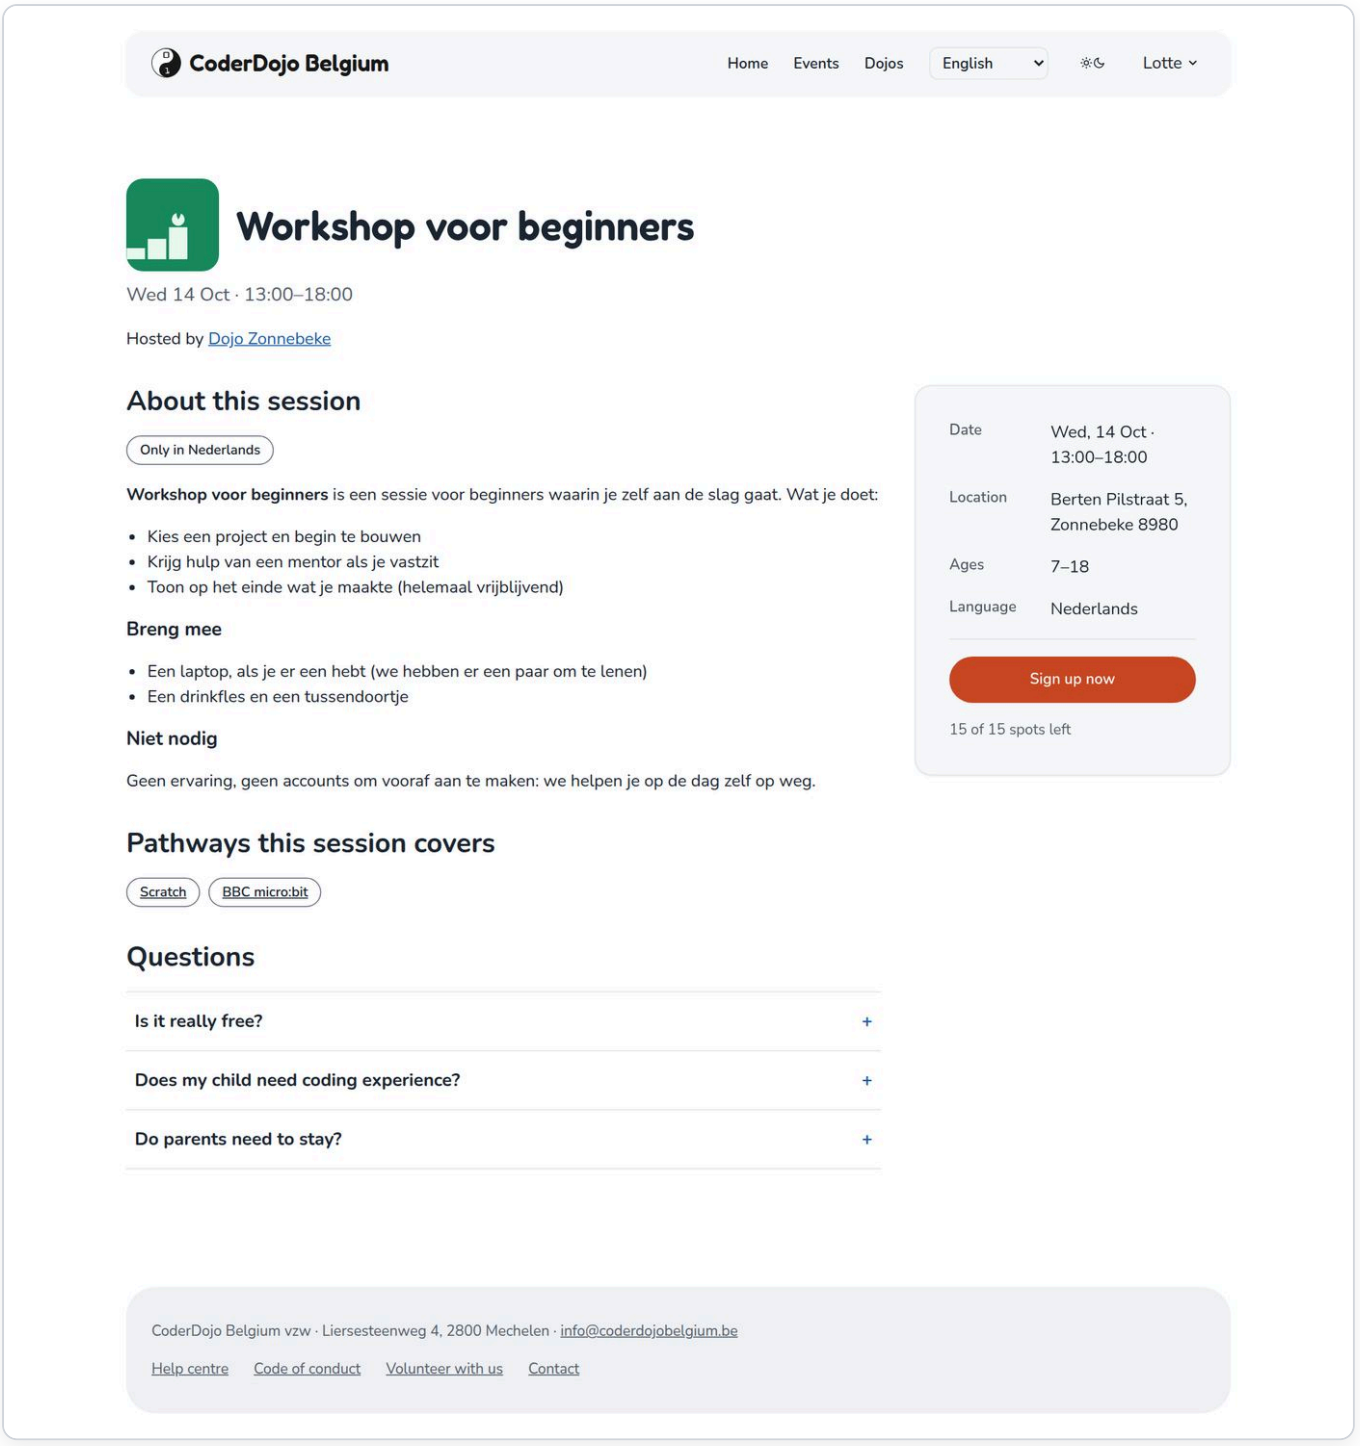

- How long does the Scratch pathway take? +
- My child already knows Scratch — should they still start here? +
- Do they need to install anything at home? +

Step 4

Find the next session

The ninja browses sessions like anyone else ...

`/events/72/`

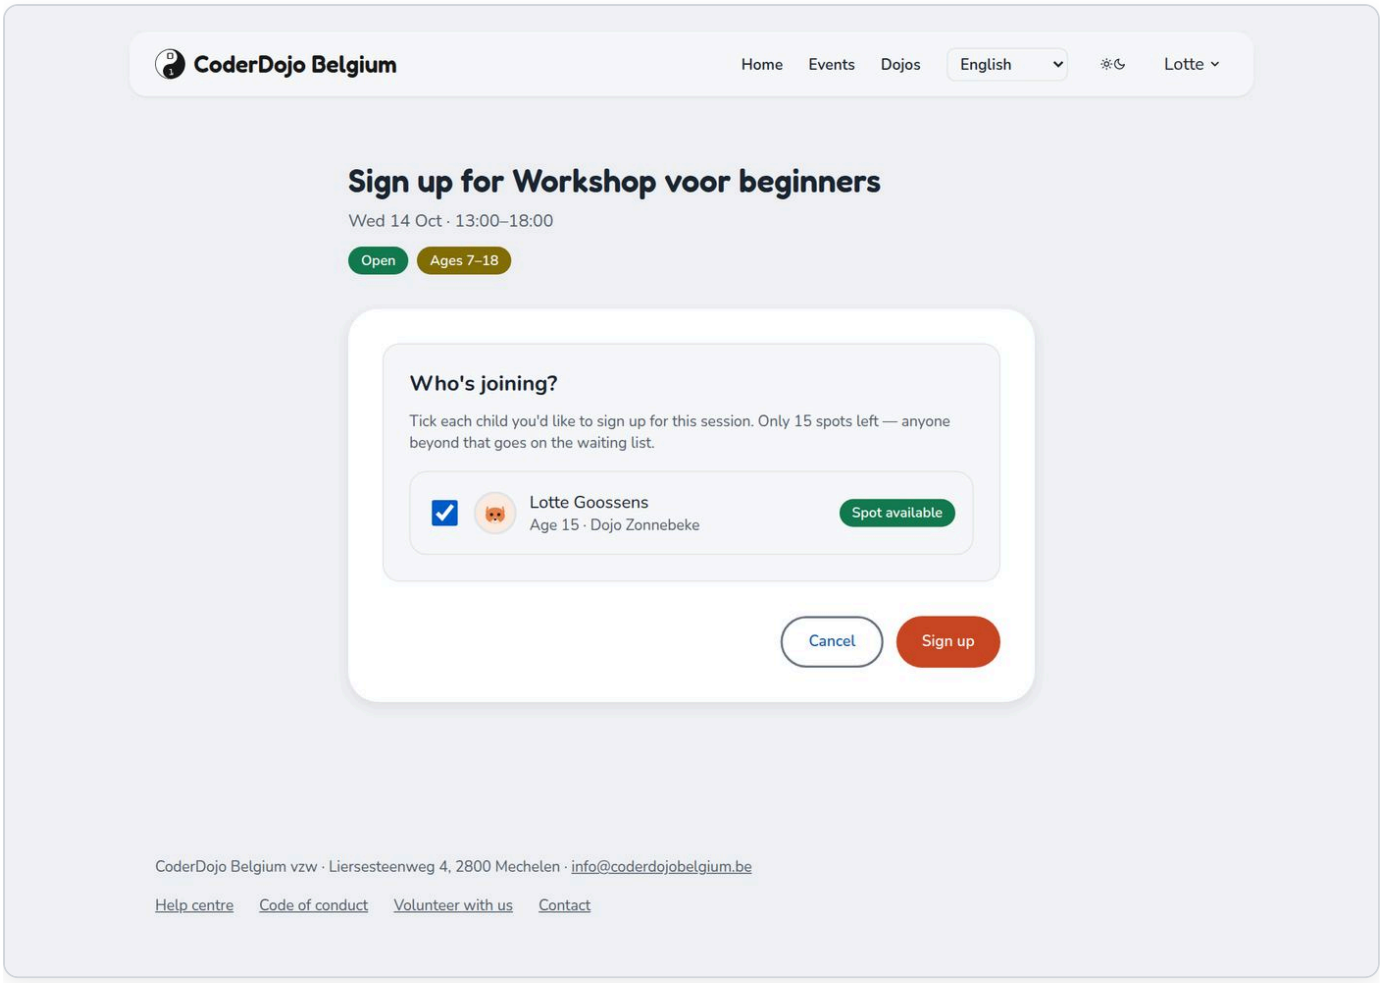

Step 5

... and signs themselves up

With their own login a ninja can sign only themselves up. The parent still gets the confirmation mail.

`/events/72/signup/`

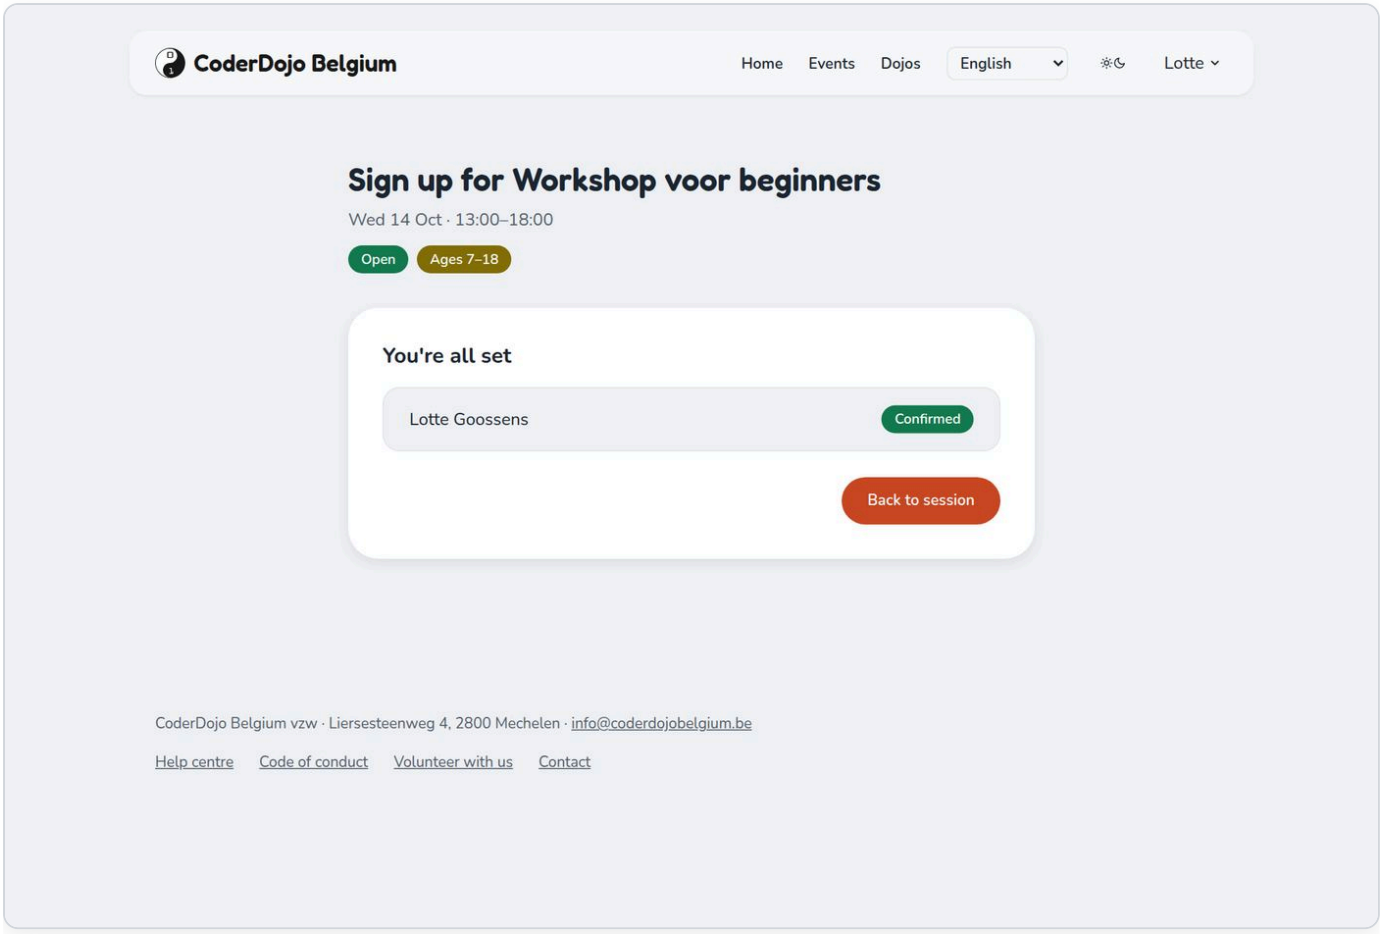

Step 6

Place confirmed

The place is confirmed, and shows on the ninja's page and on the parent's account page, where either of them can cancel it.

`/events/72/signup/`

Step 7

Their own sign-in security

A ninja's login has the same sign-in options as an adult's, two-step login included. The parent is told about every change.
