Champion

The person who runs a dojo. The champion has every mentor capability plus the dojo's lifecycle, the children's health notes, mail to the dojo's families and the dojo's API clients.

Screenshots taken on the development site (seeded demo data) as **owner-51-dojo-westerlo (champion of Dojo Westerlo)**, 17 October 2026.

The journey

- Watch the dashboard and next session
- Keep the dojo's public profile up to date
- Plan and publish sessions, handle the waiting list, tell families about a change
- Take attendance, manage the team and members
- Post updates, mail families, connect apps

Steps in this document

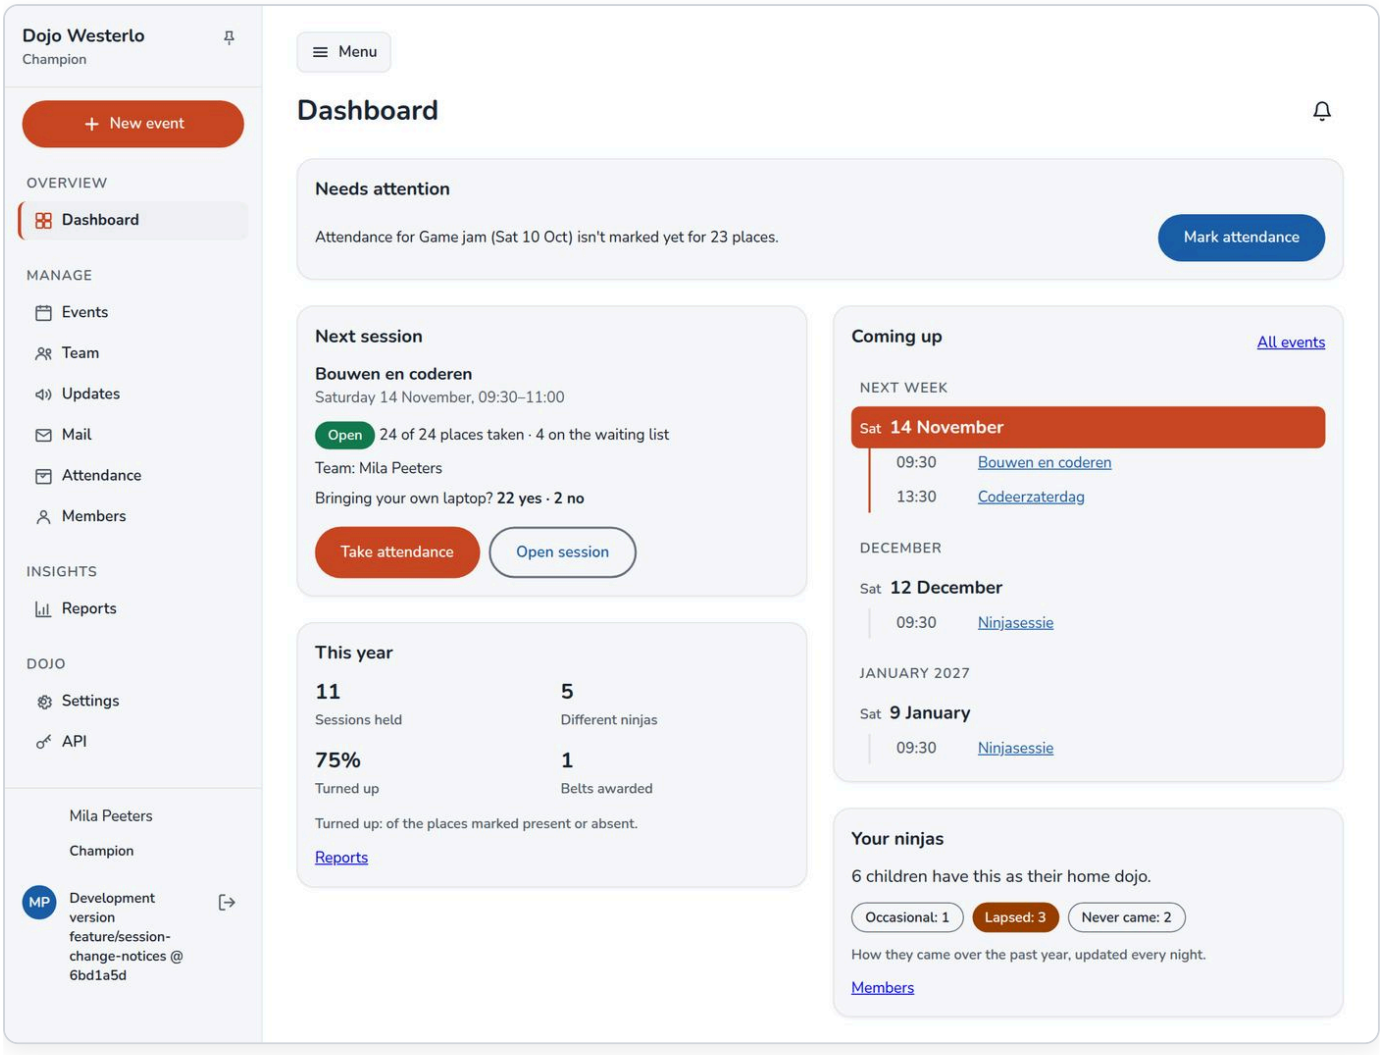

1. The dojo dashboard
2. Dojo settings
3. Default sign-up questions
4. Sessions
5. Planning a new session
6. A full session with a waiting list
7. Telling the families about a change
8. Sent
9. The mail the families get
10. Calling a session off
11. Attendance with health notes
12. Managing the team
13. Members
14. Updates
15. Mail to the families
16. Writing a mailing
17. API clients

Step 1

The dojo dashboard

The champion's home: what needs attention (join requests, unmarked attendance, drafts or sessions without a team, the team's background checks running out), the next session with its places and sign-up answers, the coming sessions as an agenda, the ninjas as counts per stage and the year's figures.

`/dojos/51/dashboard/`

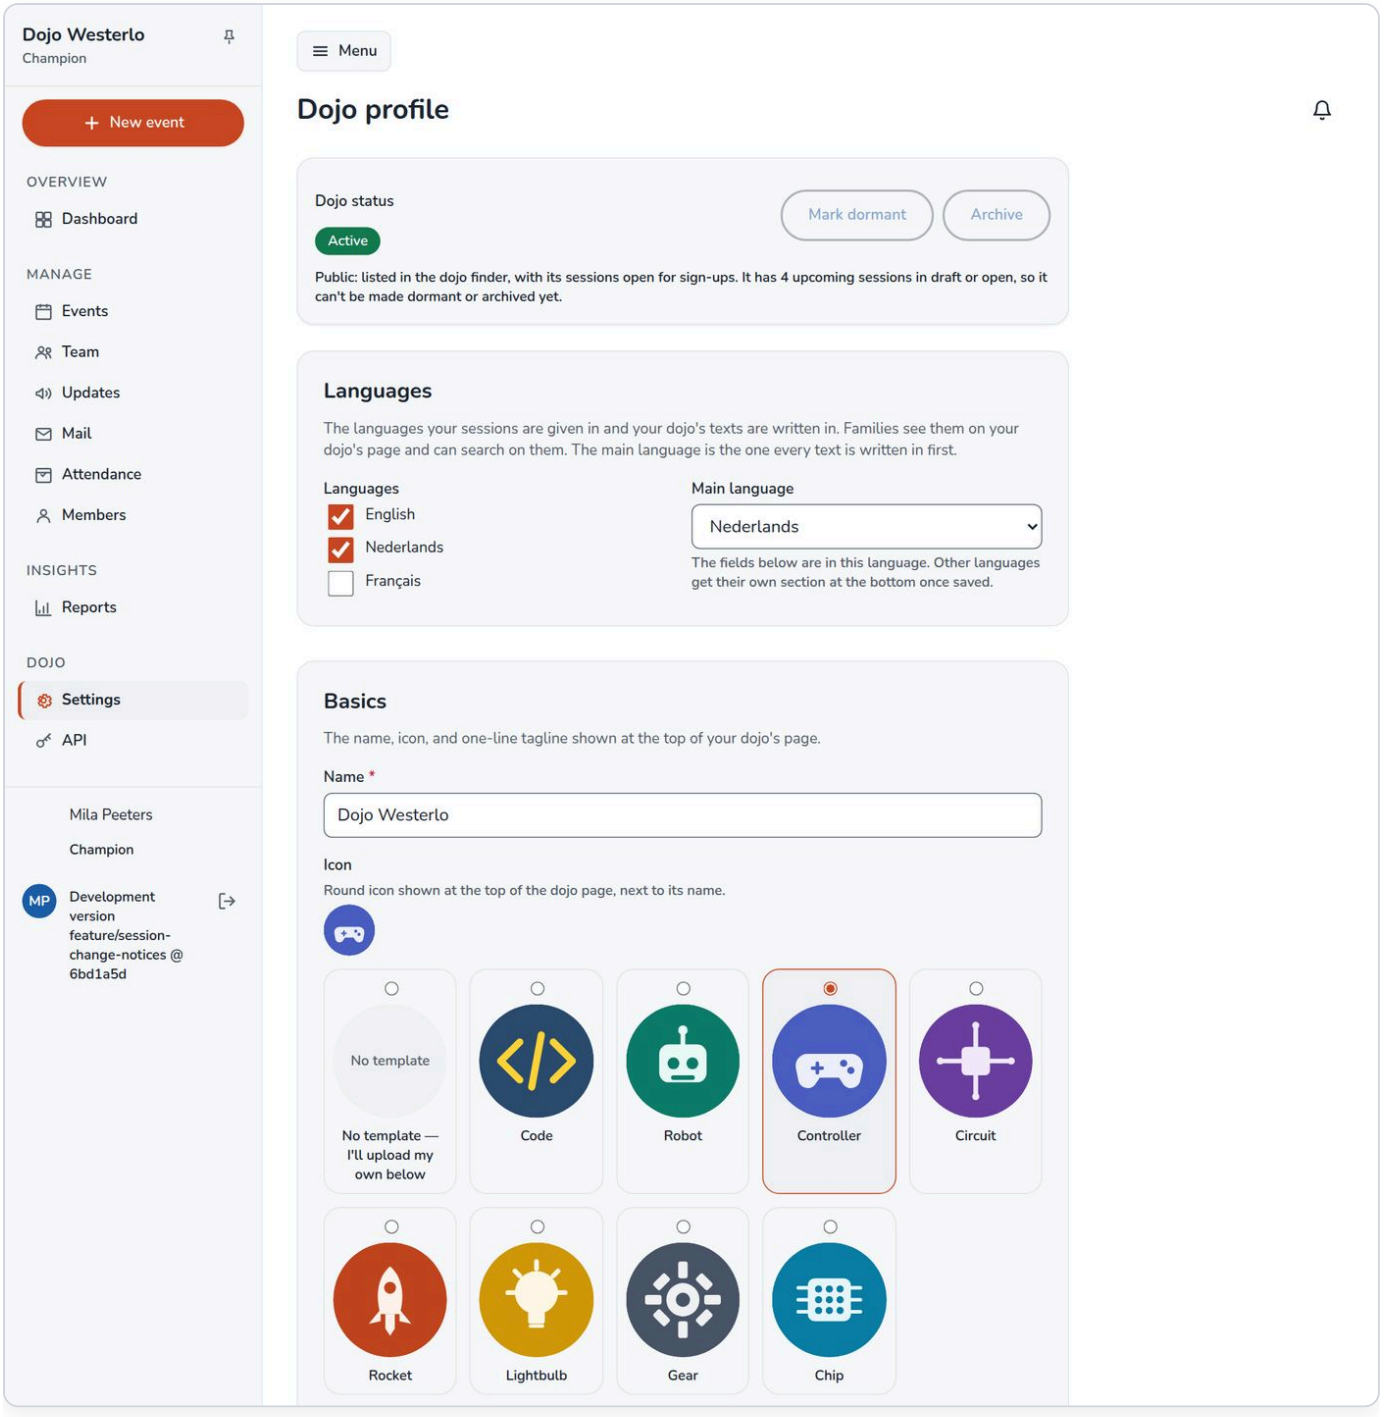

Step 2

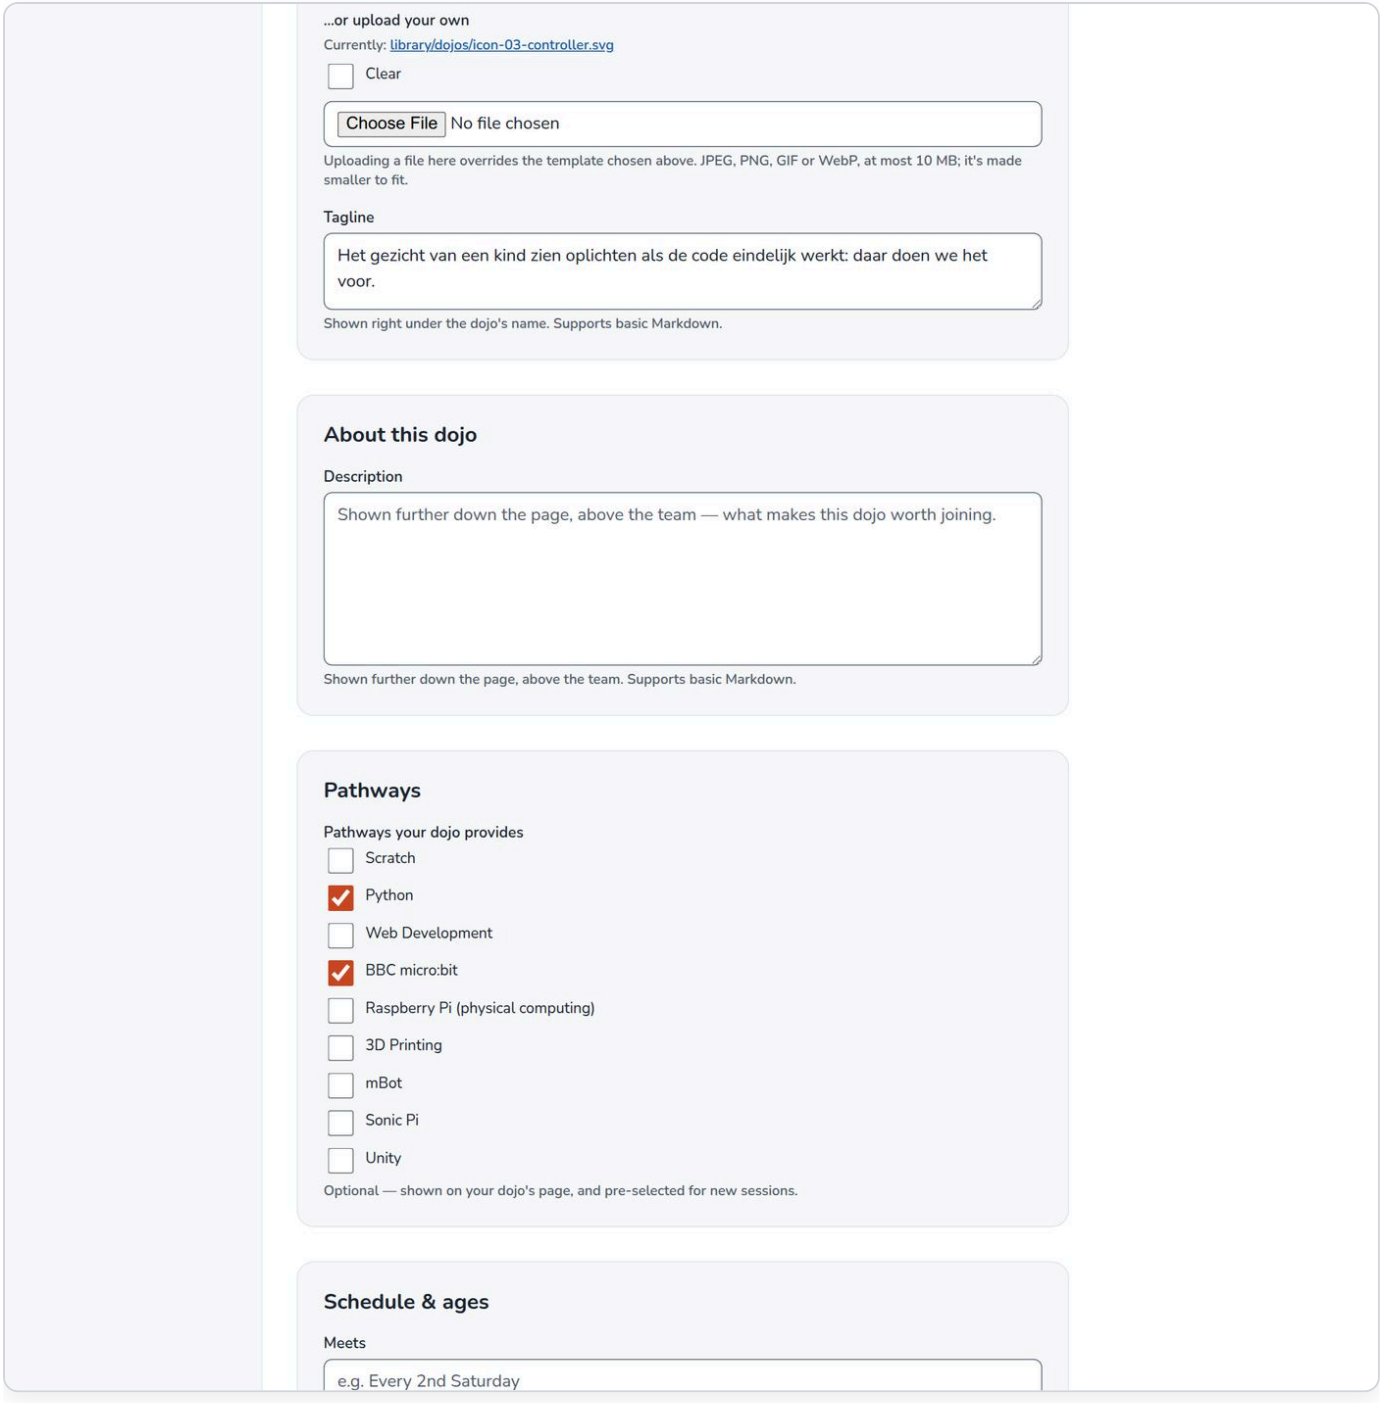

Dojo settings

At the top, the dojo's status: only the champion launches the dojo, marks it dormant or archives it (never with open sessions) and reopens it. Below, everything on the dojo's public page: name, description in each of the dojo's languages, icon, address (re-geocoded on save), contact details and pathways.

`/dojos/51/manage/`

Step 2 Dojo settings (continued)

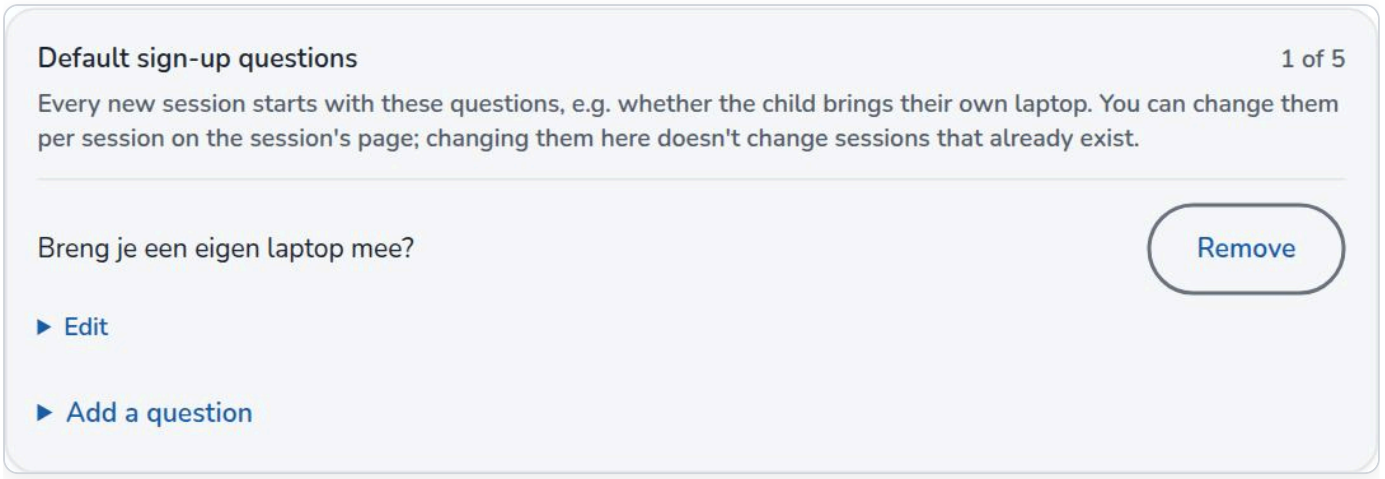

Step 3

Default sign-up questions

Below the profile, the dojo's default sign-up questions: yes/no questions every new session starts with (here the laptop question), in each of the dojo's languages. Each session can change them on its own page.

`/dojos/51/manage/`

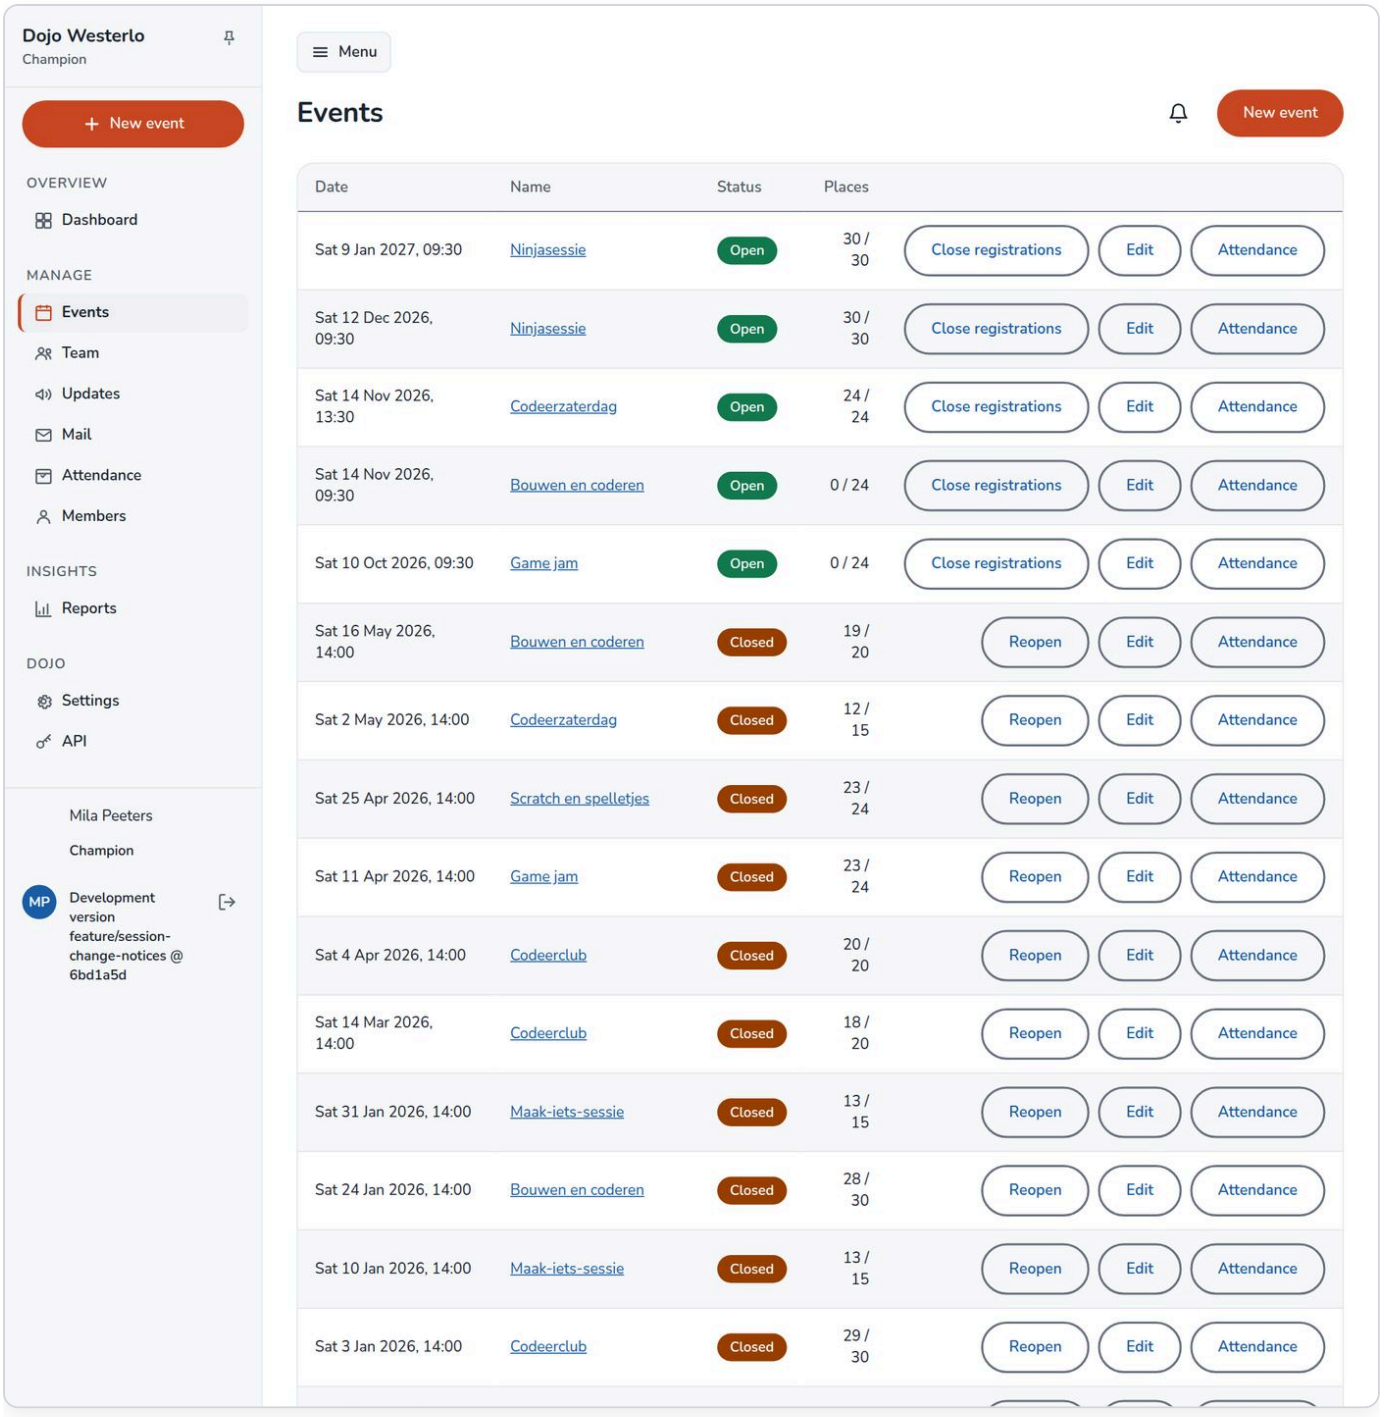

Step 4

Sessions

All the dojo's sessions with their status (draft, open, closed) and one-click next steps.

`/dojos/51/events/`

Step 4 Sessions (continued)

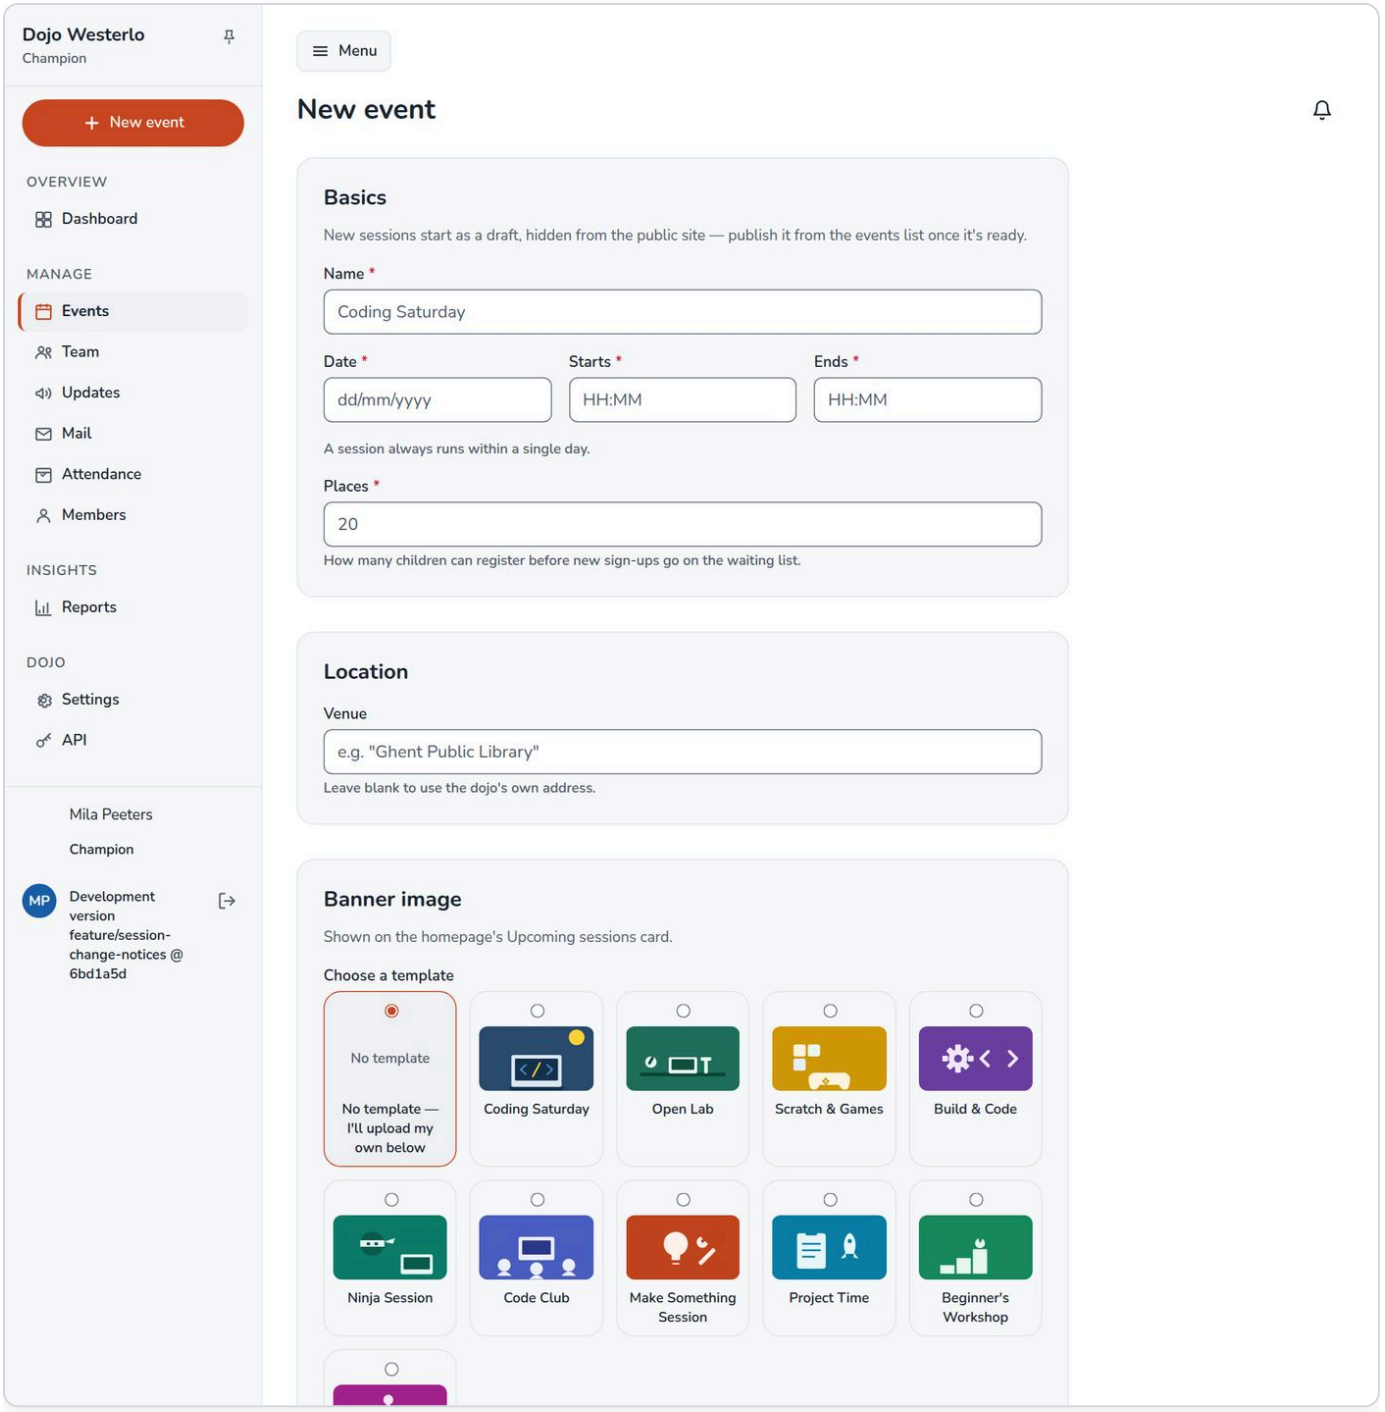

Sat 29 Nov 2025, 14:00	Scratch en spelletjes	Closed	20 / 20	Reopen	Edit	Attendance
Sat 15 Nov 2025, 14:00	Ninjasessie	Closed	28 / 30	Reopen	Edit	Attendance
Sat 8 Nov 2025, 14:00	Scratch en spelletjes	Closed	18 / 20	Reopen	Edit	Attendance
Sat 1 Nov 2025, 14:00	Open lab	Closed	24 / 24	Reopen	Edit	Attendance

Step 5

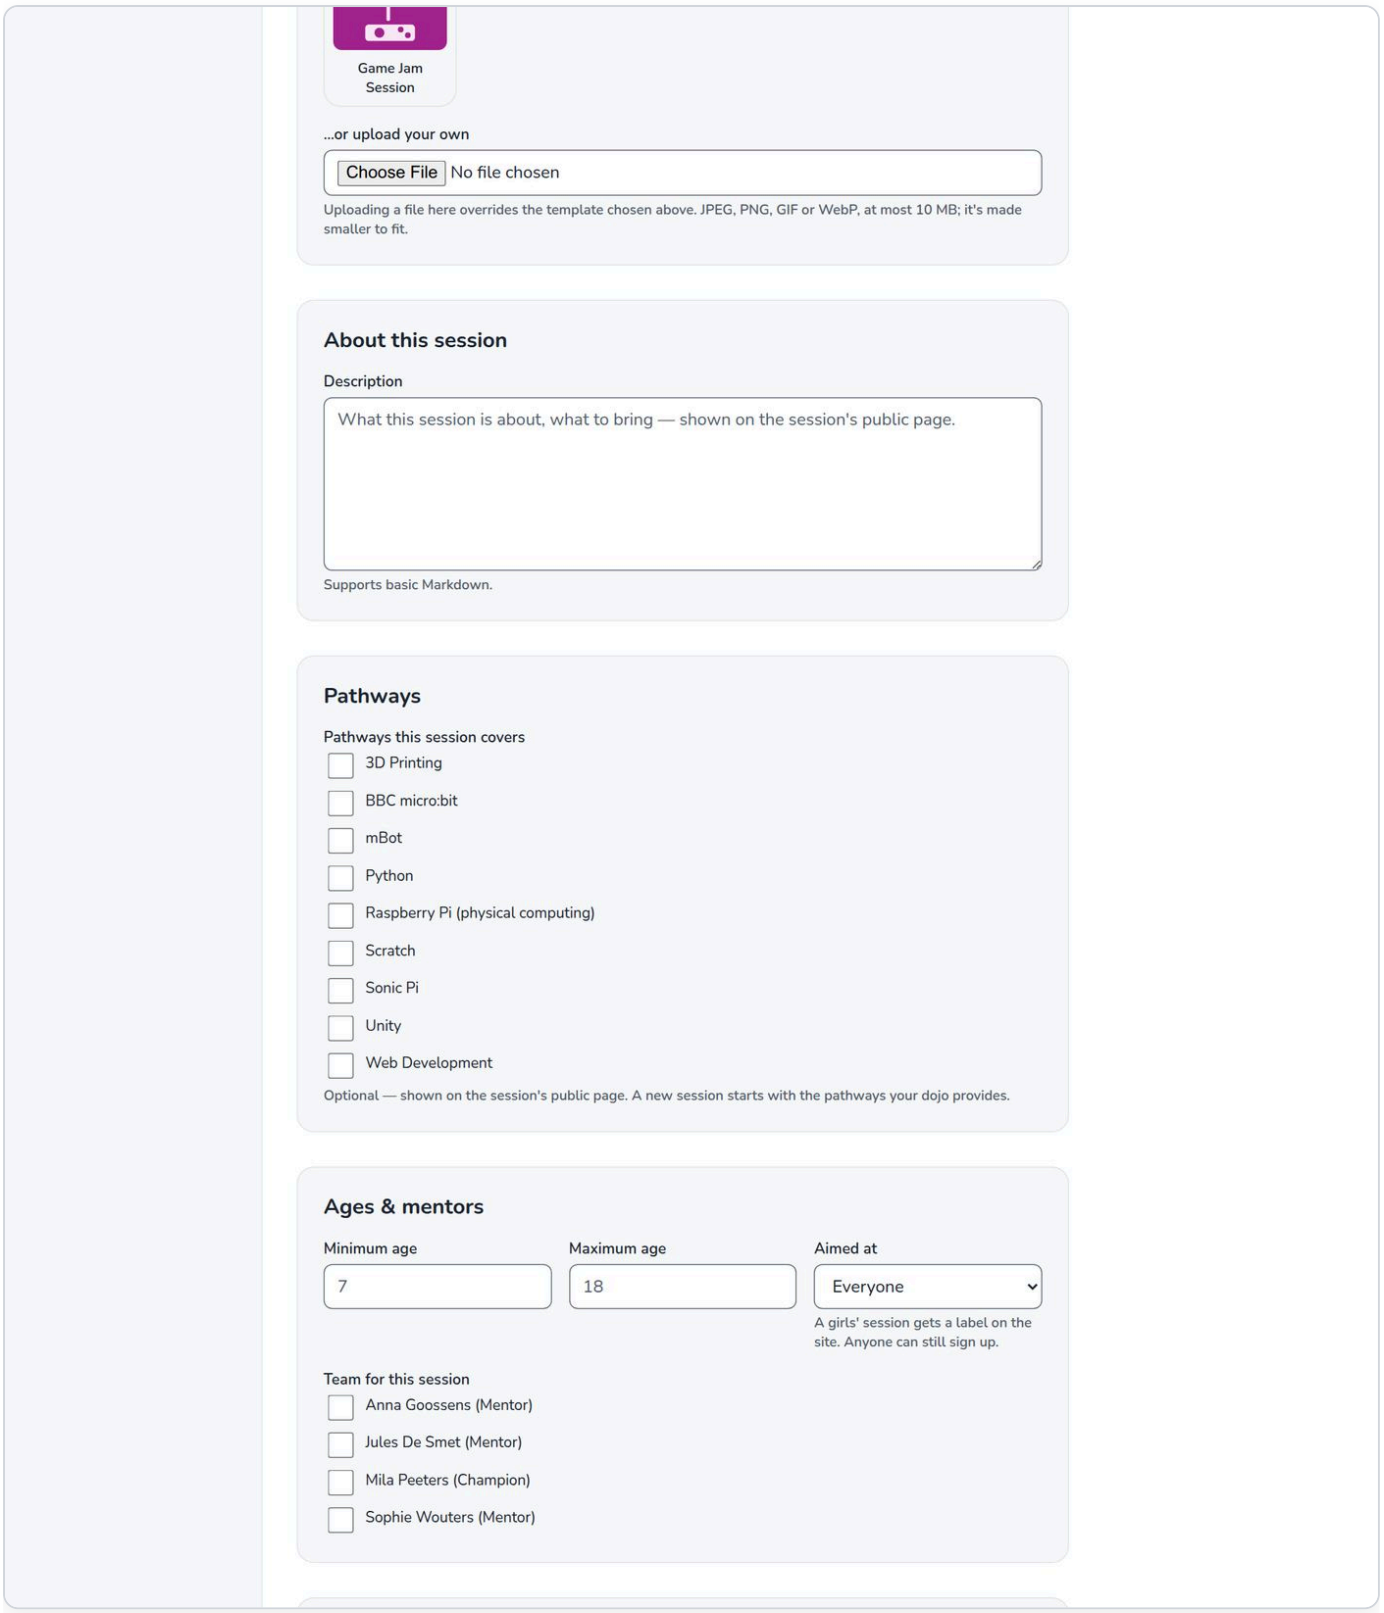

Planning a new session

A new session: date and times (Belgian notation), places, age range, audience (e.g. a girls' session), a banner from the image library or an upload, the team running it and the pathways. It starts with the dojo's default sign-up questions, and as a draft; publishing opens registrations and the families get the new-sessions mail.

`/dojos/51/events/new/`

Step 5 Planning a new session (continued)

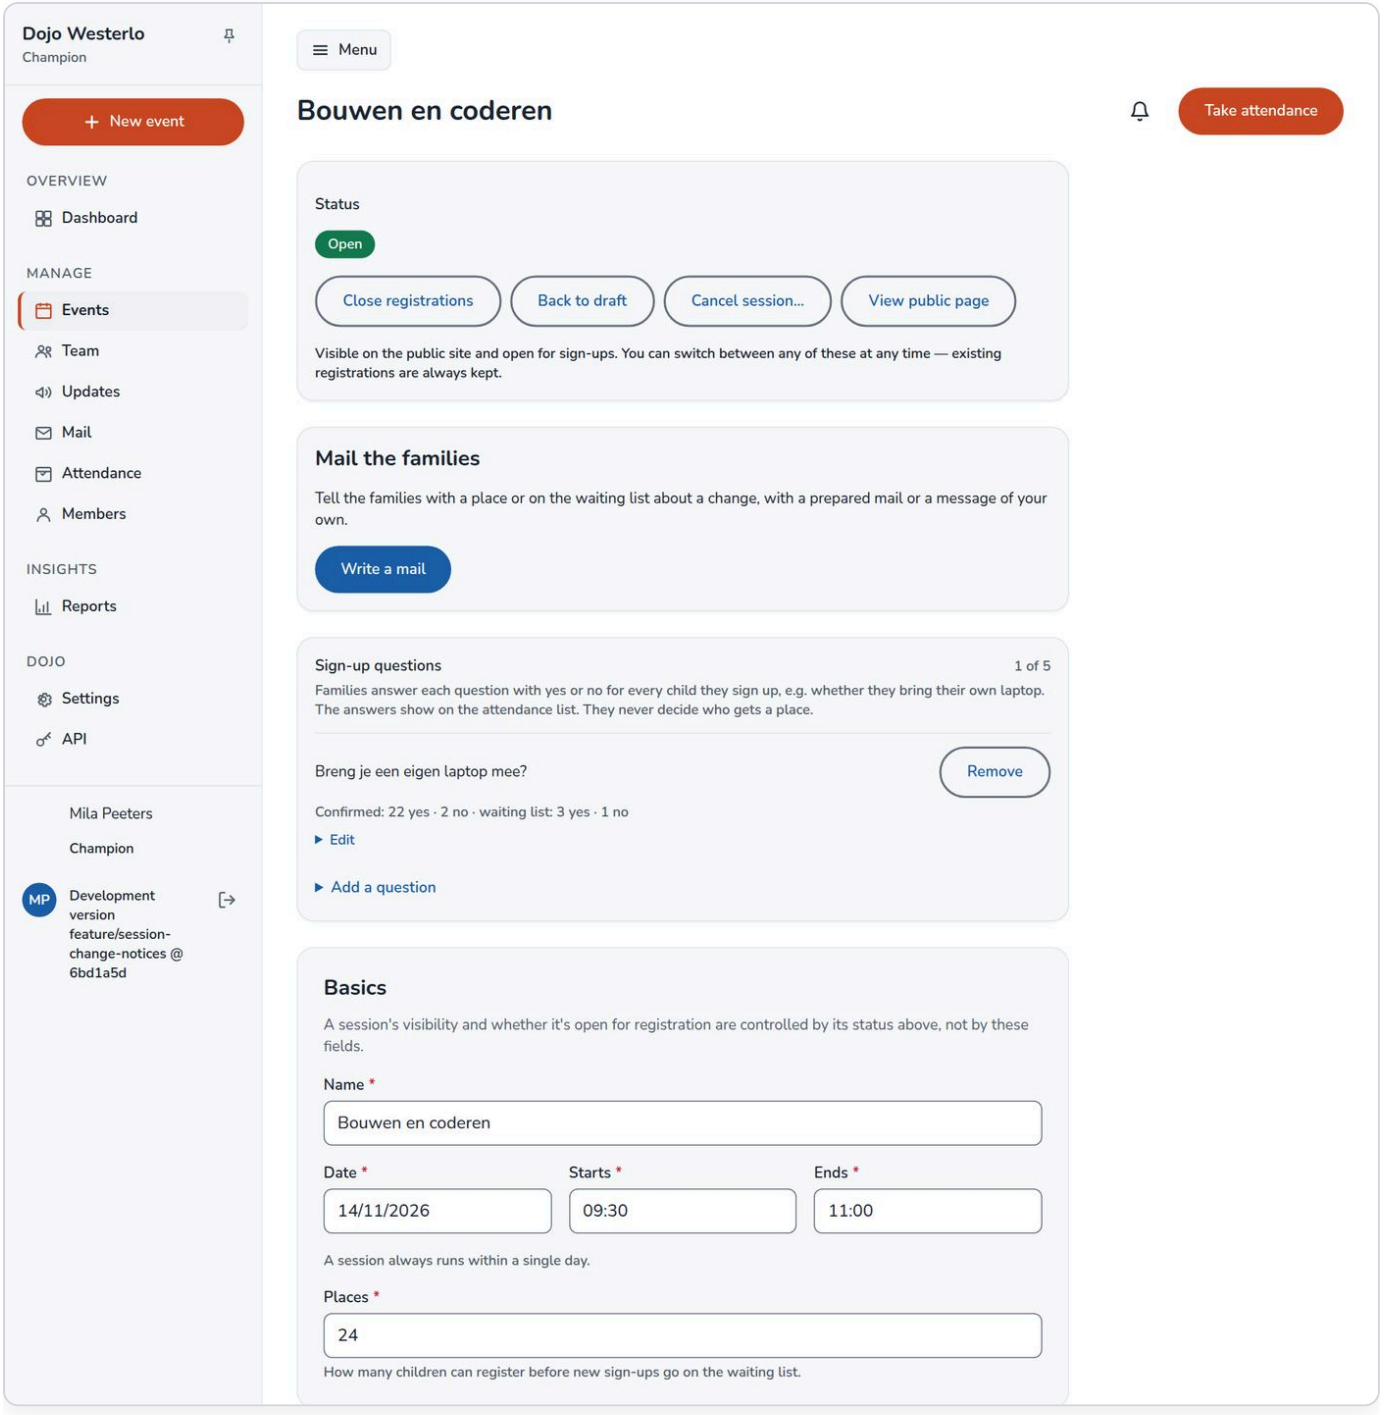

Step 6

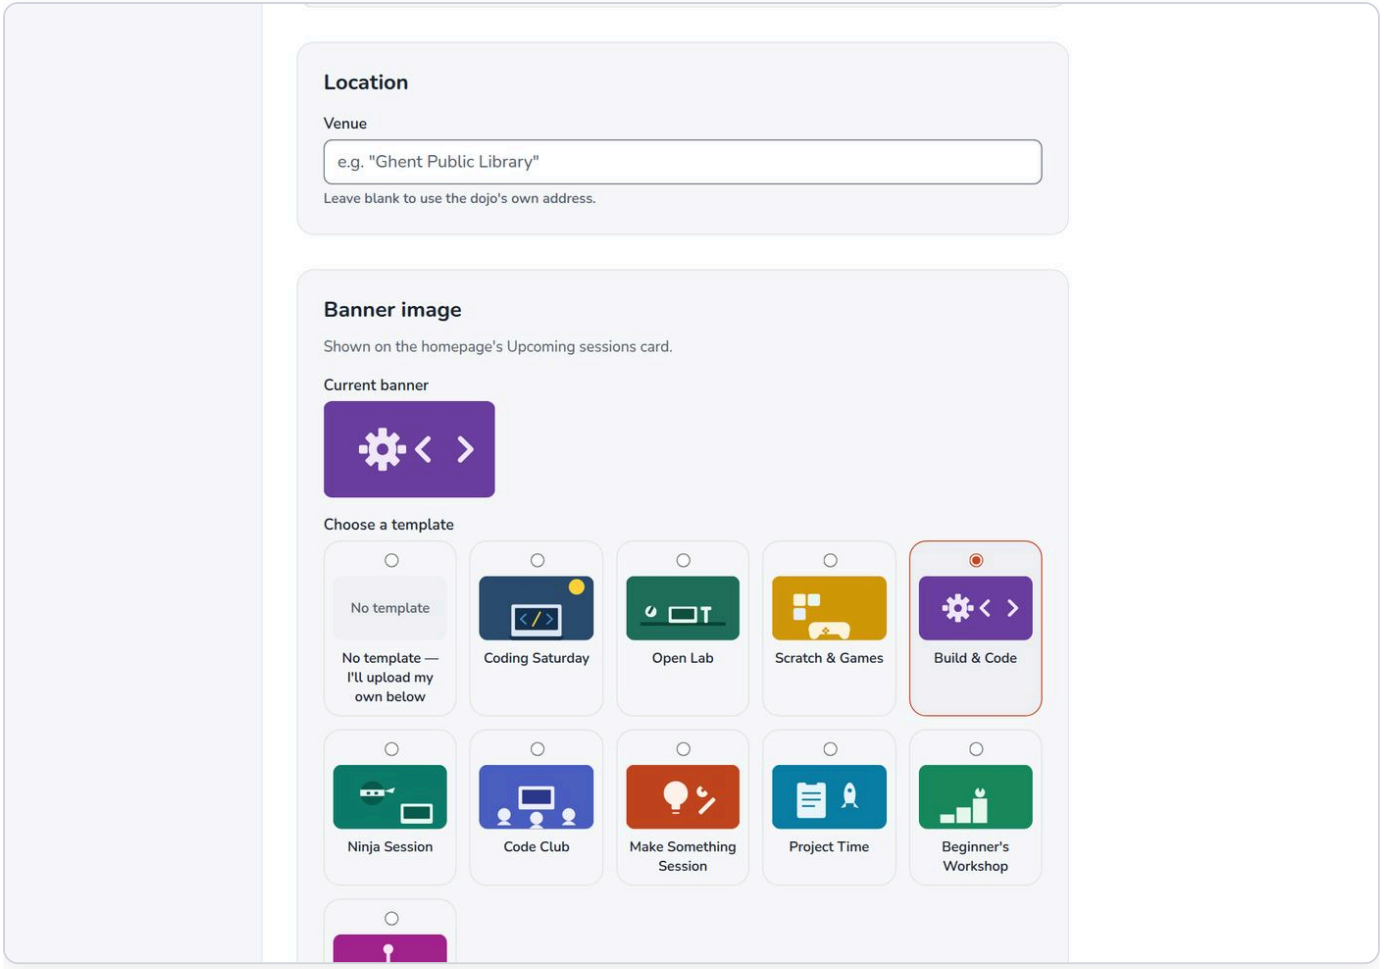

A full session with a waiting list

The session page shows places taken and the waiting list; when a family cancels, or the team adds places, the first children waiting are promoted and their families are mailed. Its Sign-up questions card asks families yes/no questions per child (here the laptop question), with the totals for confirmed places and the waiting list. Mail the families is for telling them about a change; after a save that changes the venue, the times or the places, it offers the matching prepared mail.

`/dojos/51/events/77/`

Step 6 A full session with a waiting list (continued)

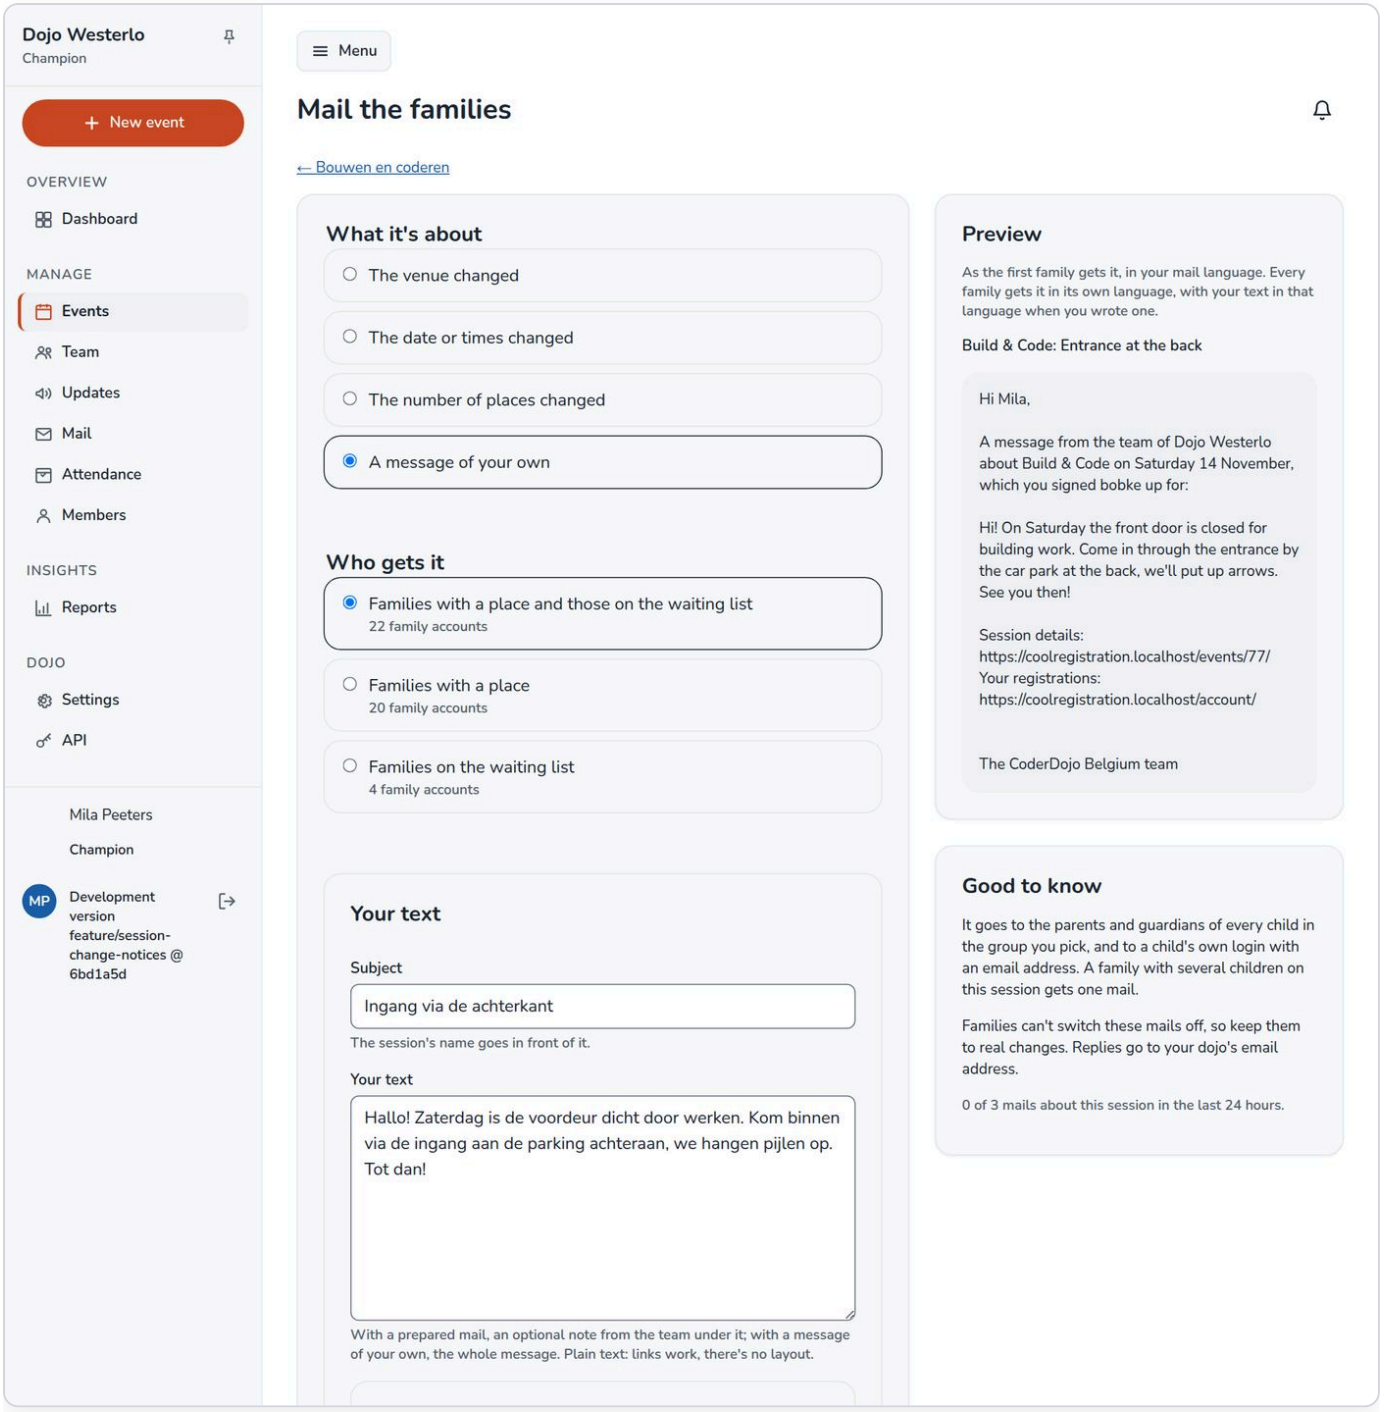

Step 7

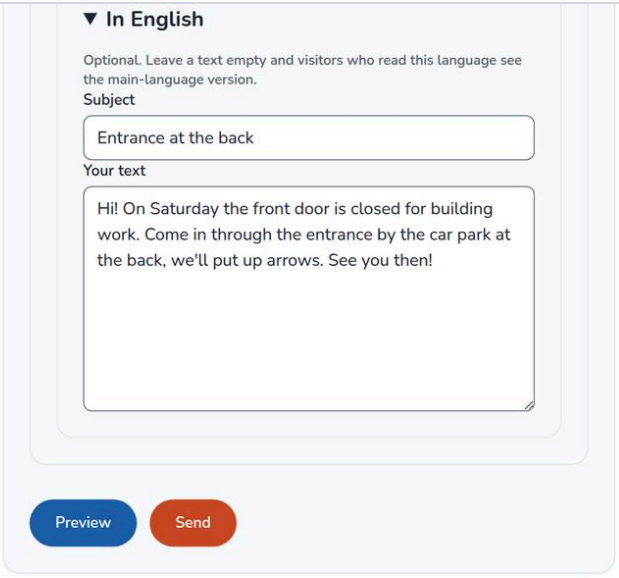

Telling the families about a change

A prepared mail about a new venue, new times or the number of places (with the values from before, so the mail says what changed), or a message of the team's own, to the families with a place, on the waiting list or both, with a count for each. Preview shows the mail as the first family gets it; every family gets it in its own language, with the team's text in that language when they wrote one.

`/dojos/51/events/77/notify/?kind=message`

Step 7 Telling the families about a change (continued)

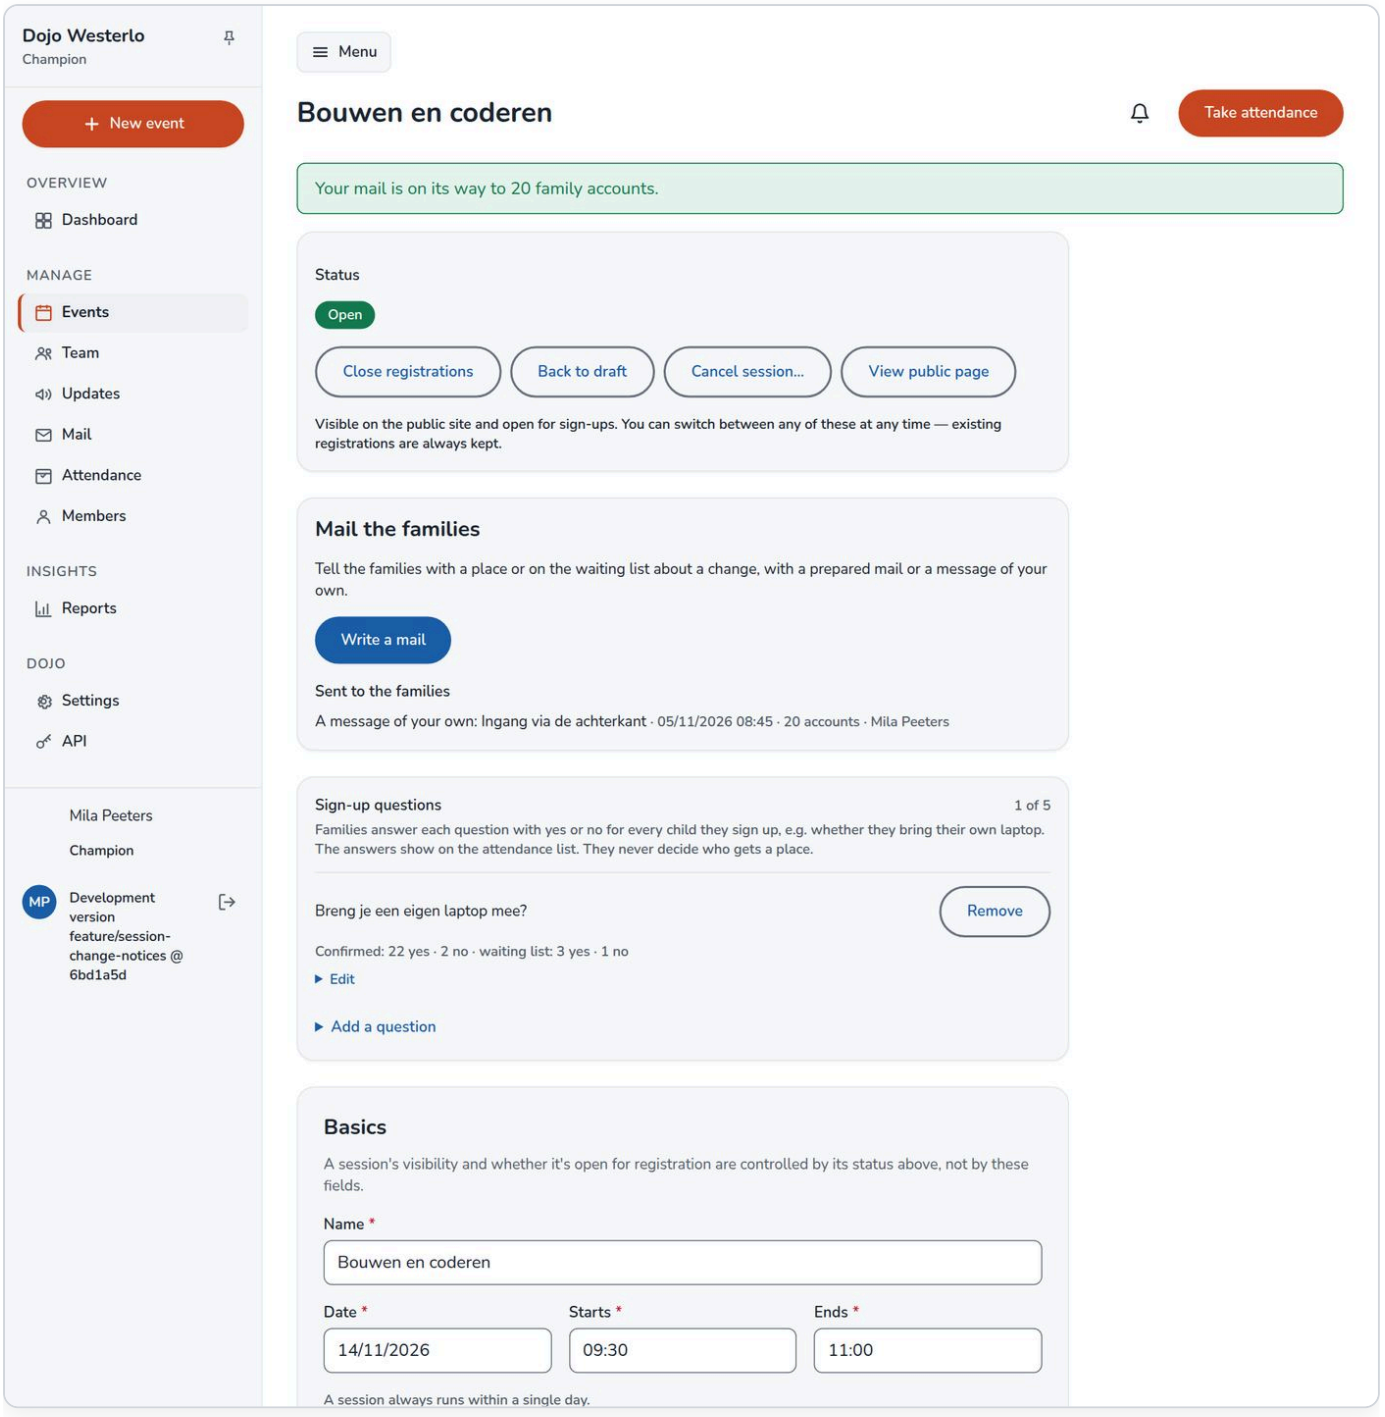

Step 8

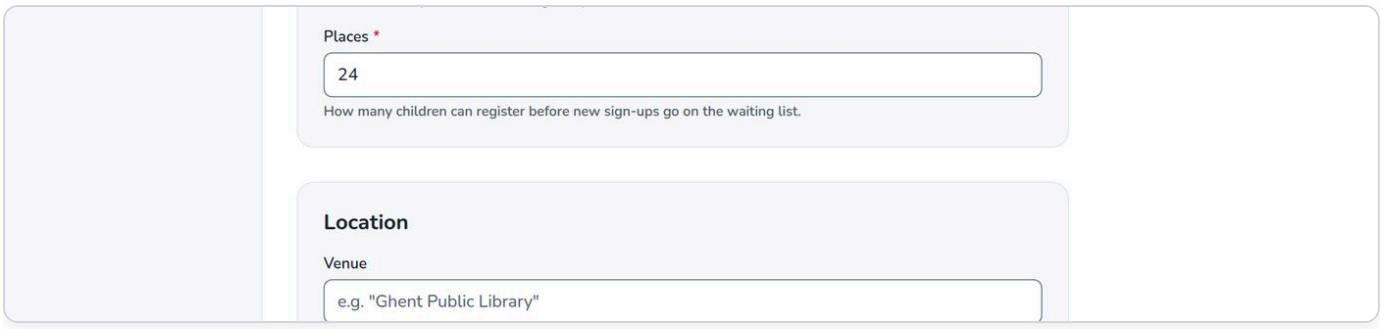

Sent

The mail goes to the parents and guardians of every child in the group (and a child's own login with an address), one mail per family. The session's page lists what was sent, when, to how many accounts and by whom. Families can't switch these mails off, so a session gets at most three a day.

`/dojos/51/events/77/`

Step 8 Sent (continued)

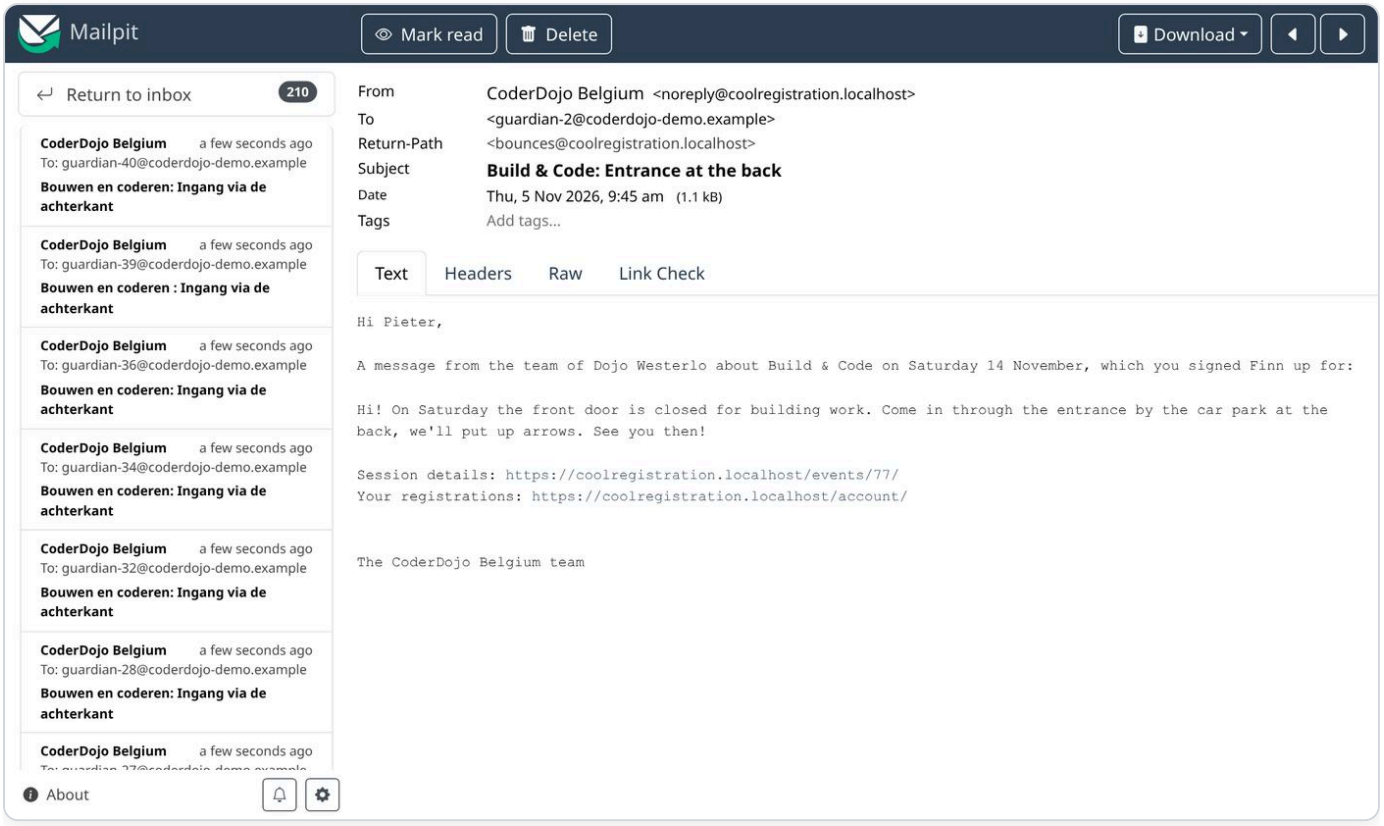

Step 9

The mail the families get

In the family's own mail language, with the session's details and the team's text. Replies go to the dojo's address.

`/mails/view/2NRRld0Ba8ZPkl9ROwTdfC`

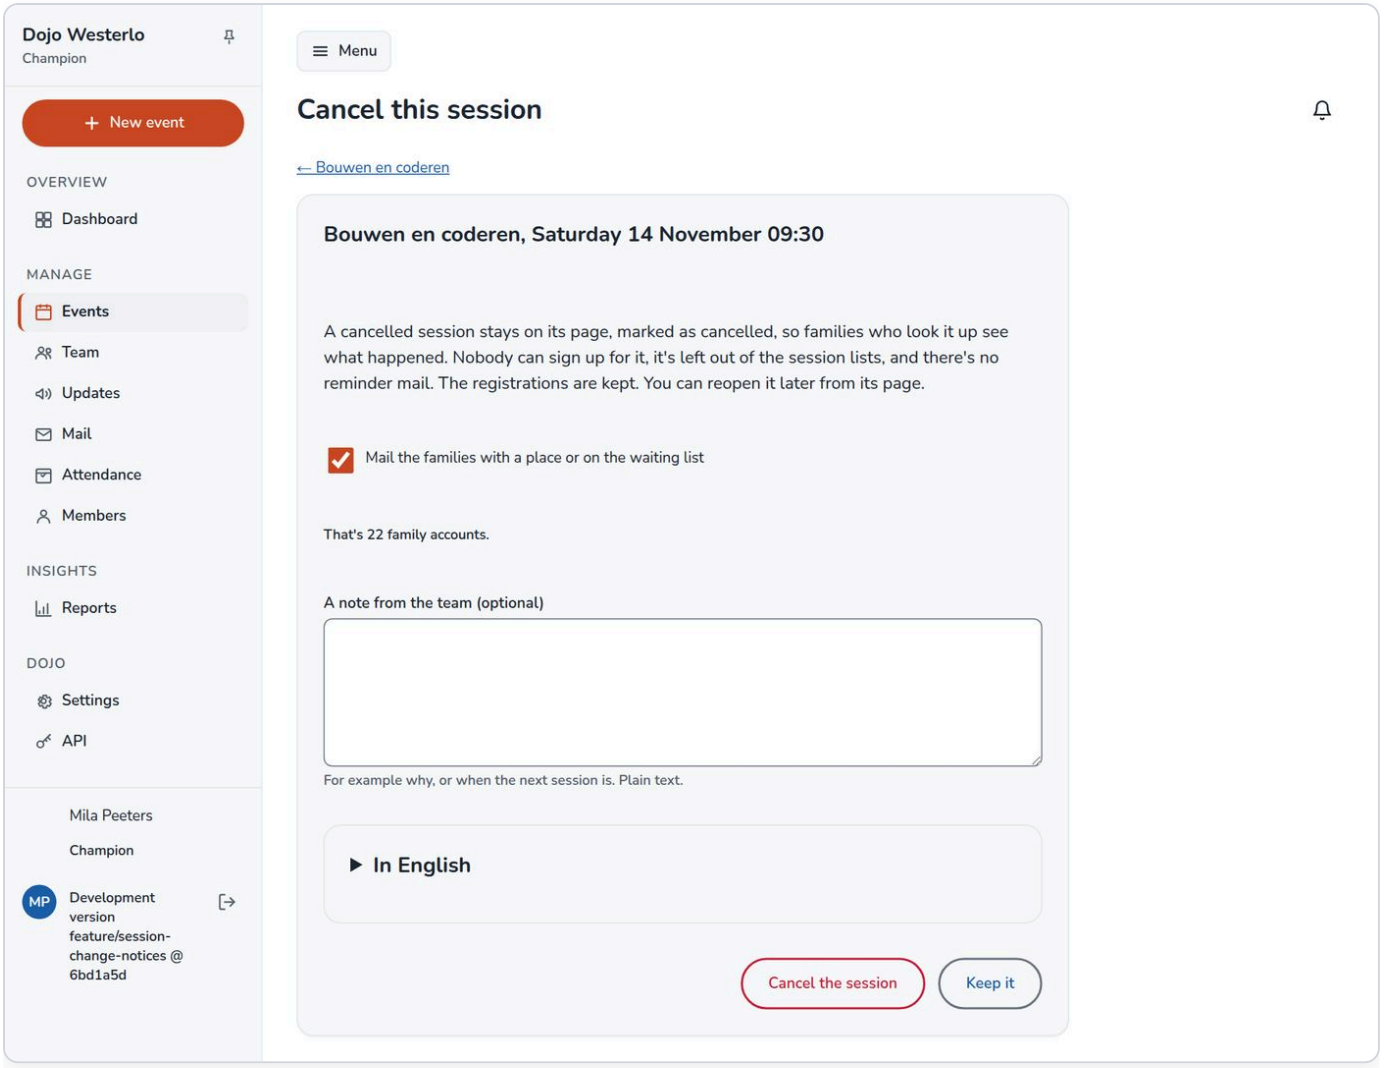

Step 10

Calling a session off

Cancel session… asks first. A cancelled session stays on its page, marked as cancelled, so families who look it up see what happened; nobody can sign up, it drops out of the session lists and reminders, and the registrations are kept. Ticked, the families get the prepared cancellation mail with an optional note from the team. It can be reopened later.

`/dojos/51/events/77/cancel/`

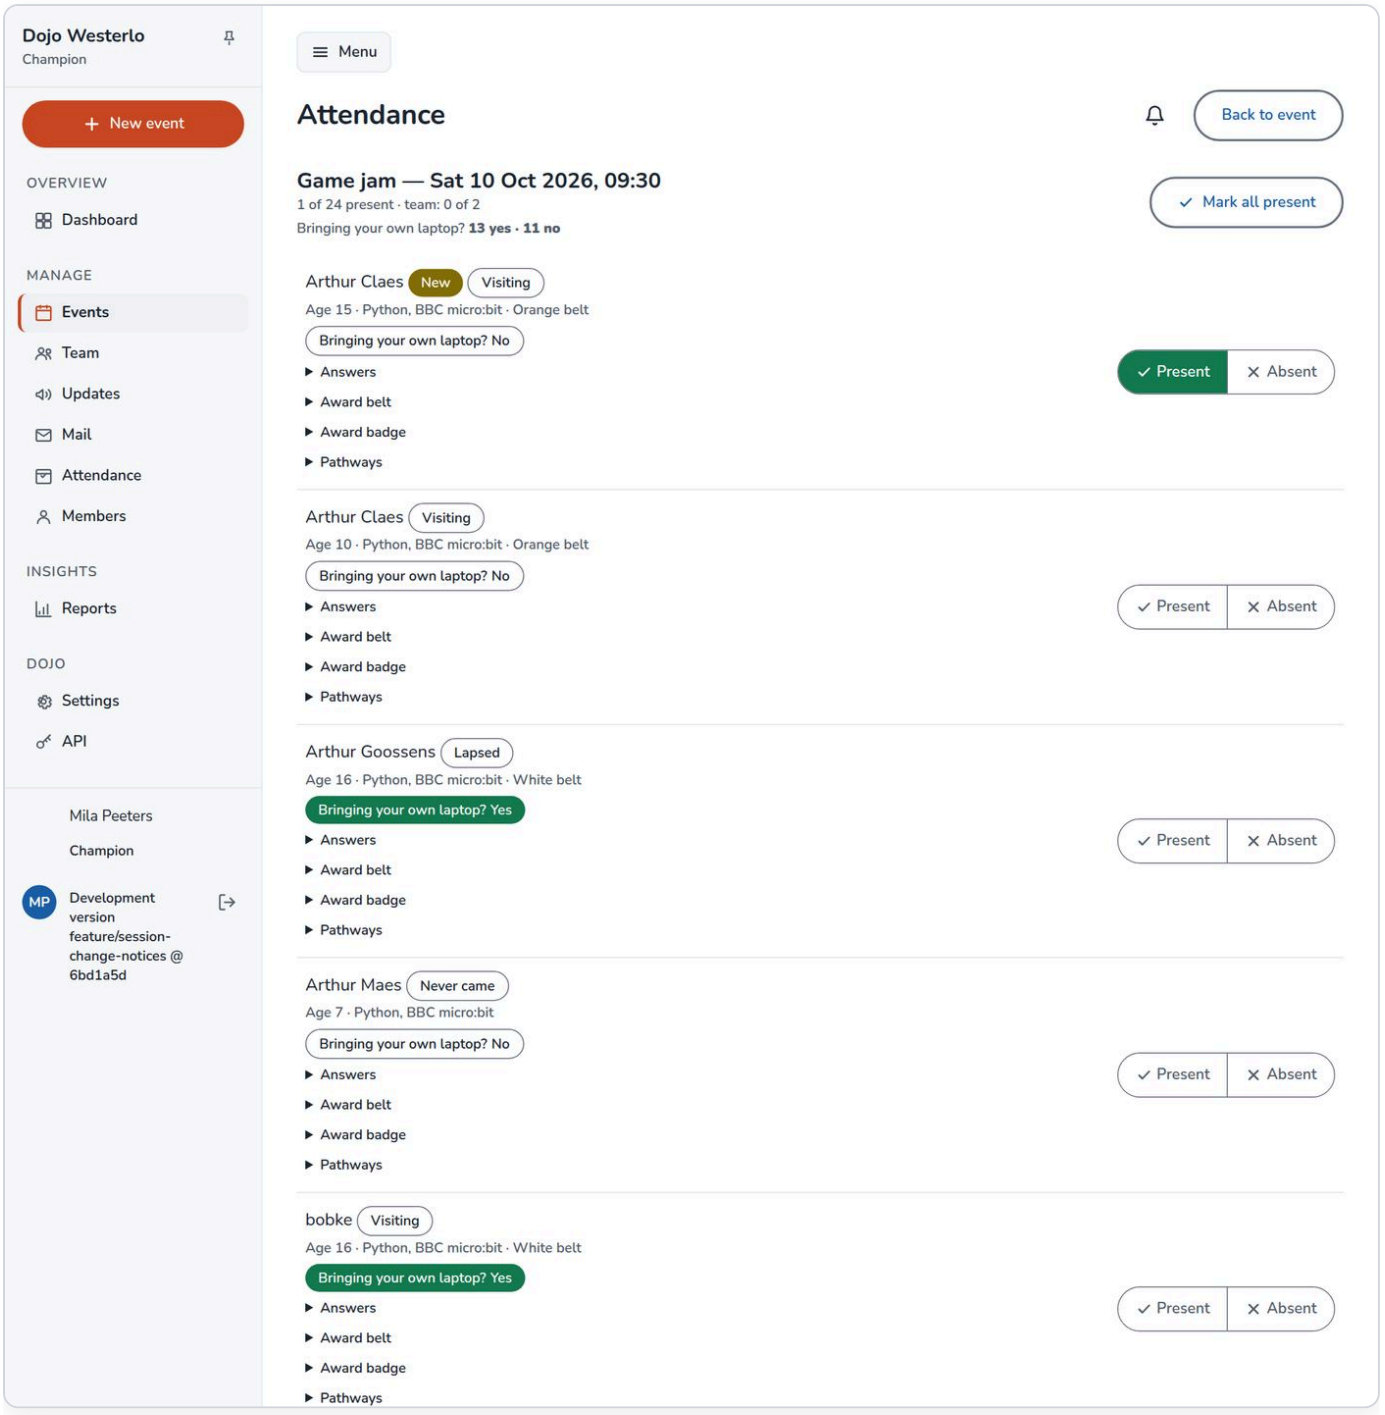

Step 11

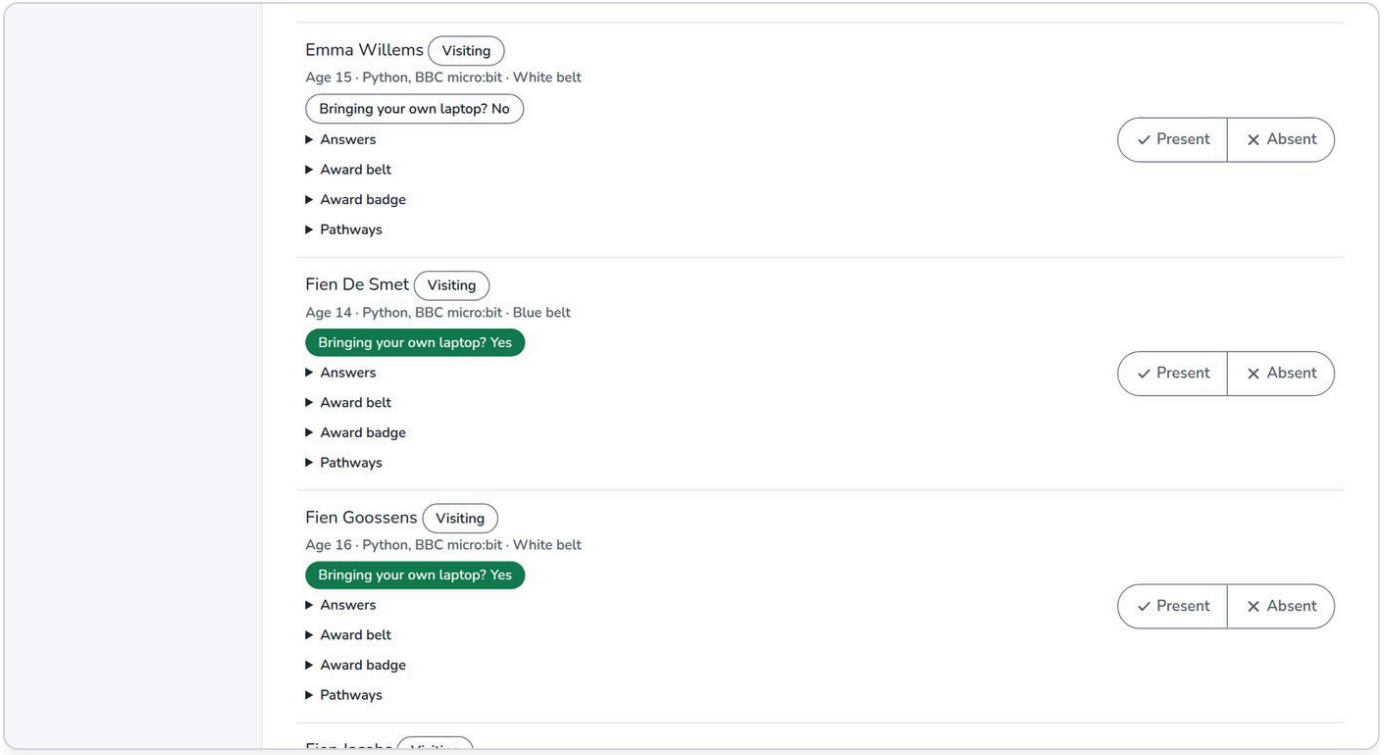

Attendance with health notes

The champion's attendance list also shows the family's allergy and health notes, only for children with a confirmed place, and every view of them is recorded in the audit log. The answers to the sign-up questions are on each row, with the totals at the top.

`/dojos/51/events/76/attendance/`

Step 11 Attendance with health notes (continued)

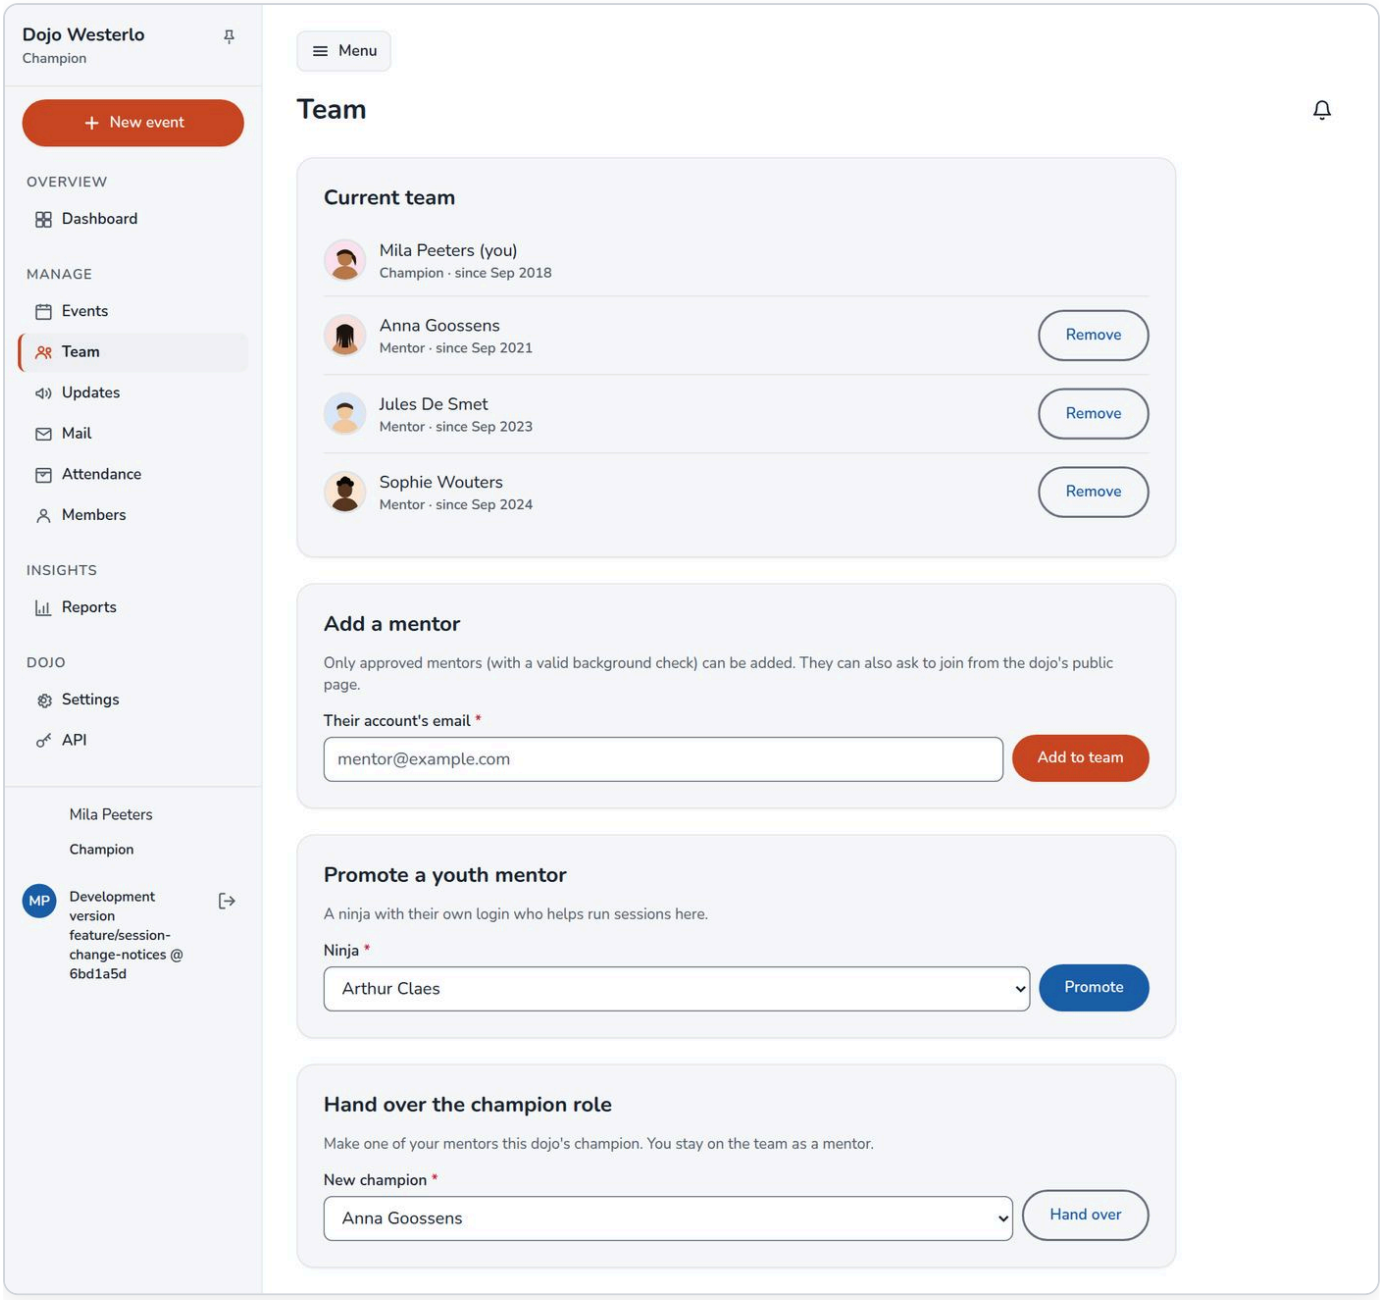

Step 12

Managing the team

Accept join requests, add mentors, promote youth mentors, and hand over the champion role to an active mentor.

`/dojos/51/manage/team/`

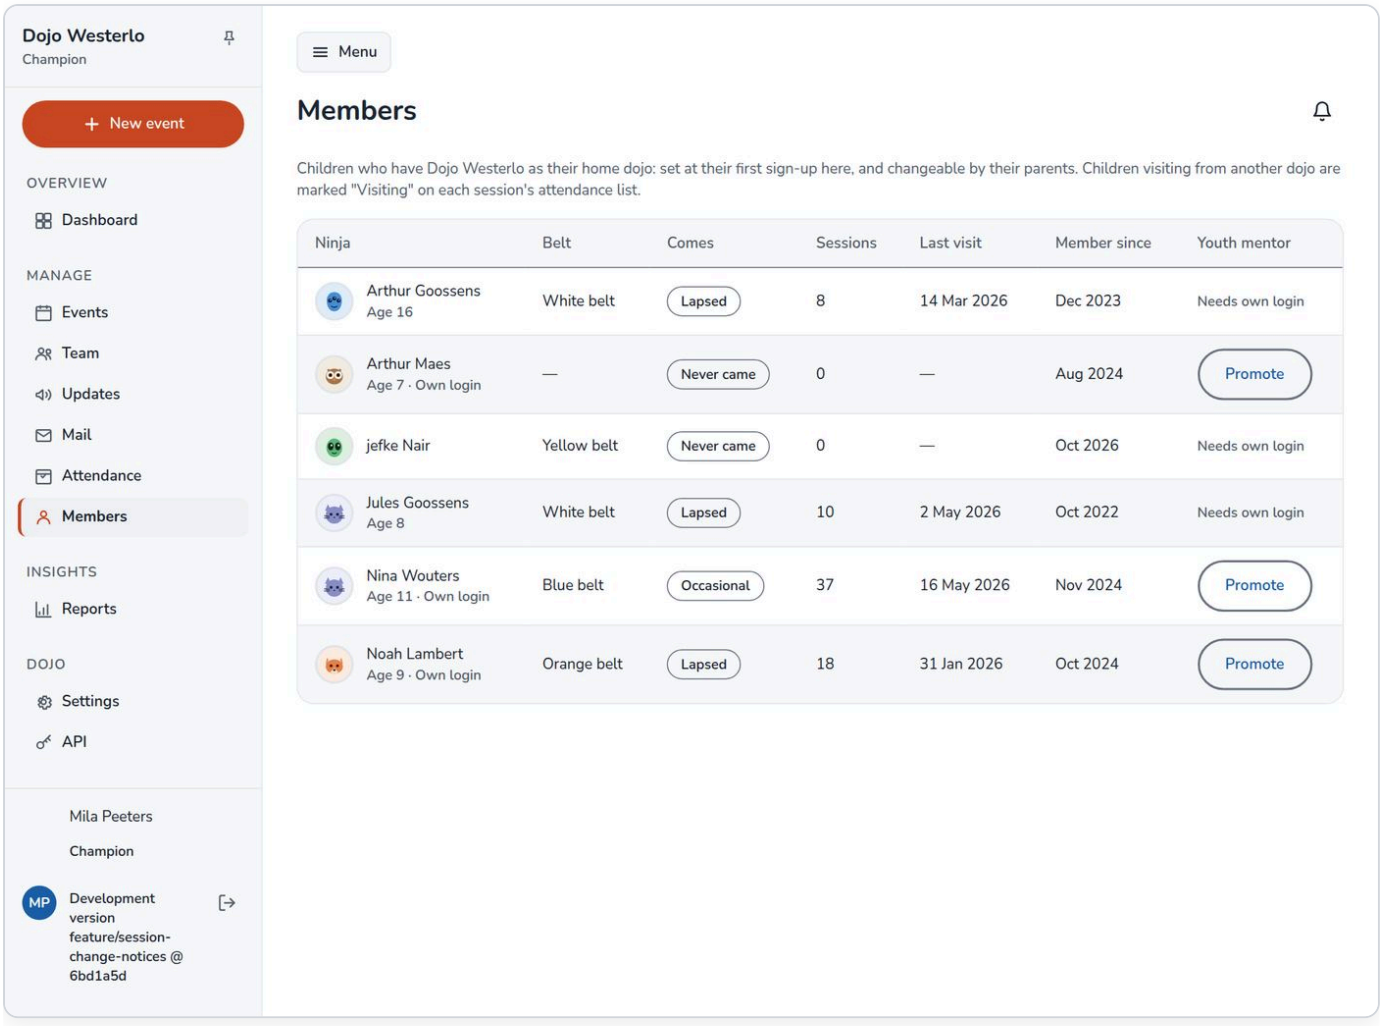

Step 13

Members

The children whose home dojo this is, with a button to promote one to youth mentor.

`/dojos/51/manage/members/`

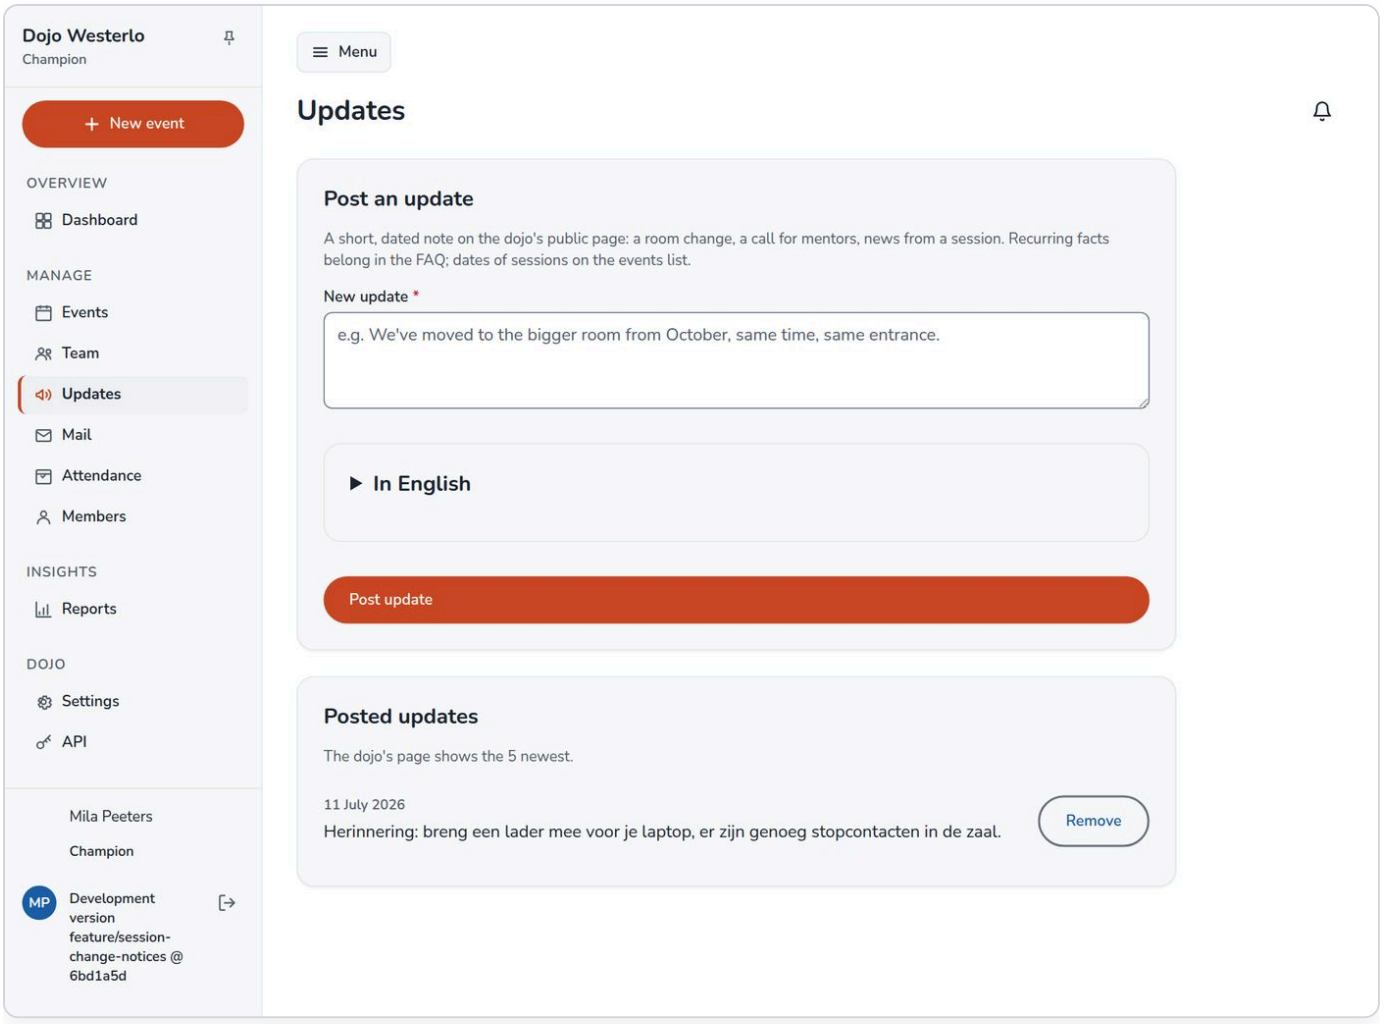

Step 14

Updates

Short 'From this dojo' notes shown on the public dojo page.

`/dojos/51/manage/updates/`

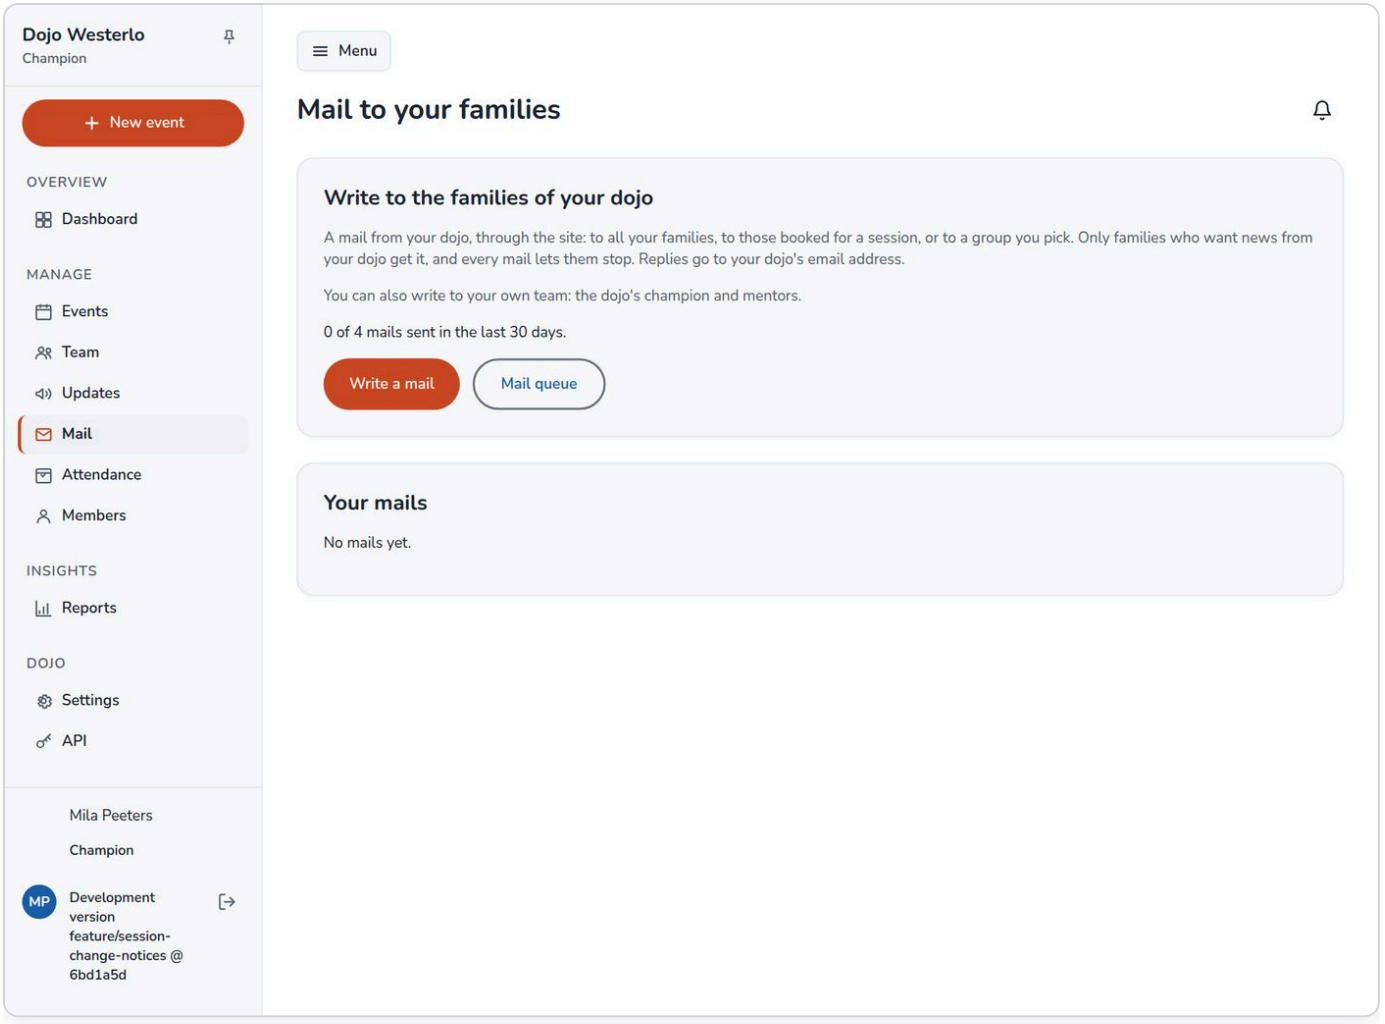

Step 15

Mail to the families

The champion writes to the dojo's families (or its own team), at most a few mailings a month. The team sees counts, never families' addresses.

`/dojos/51/manage/mail/`

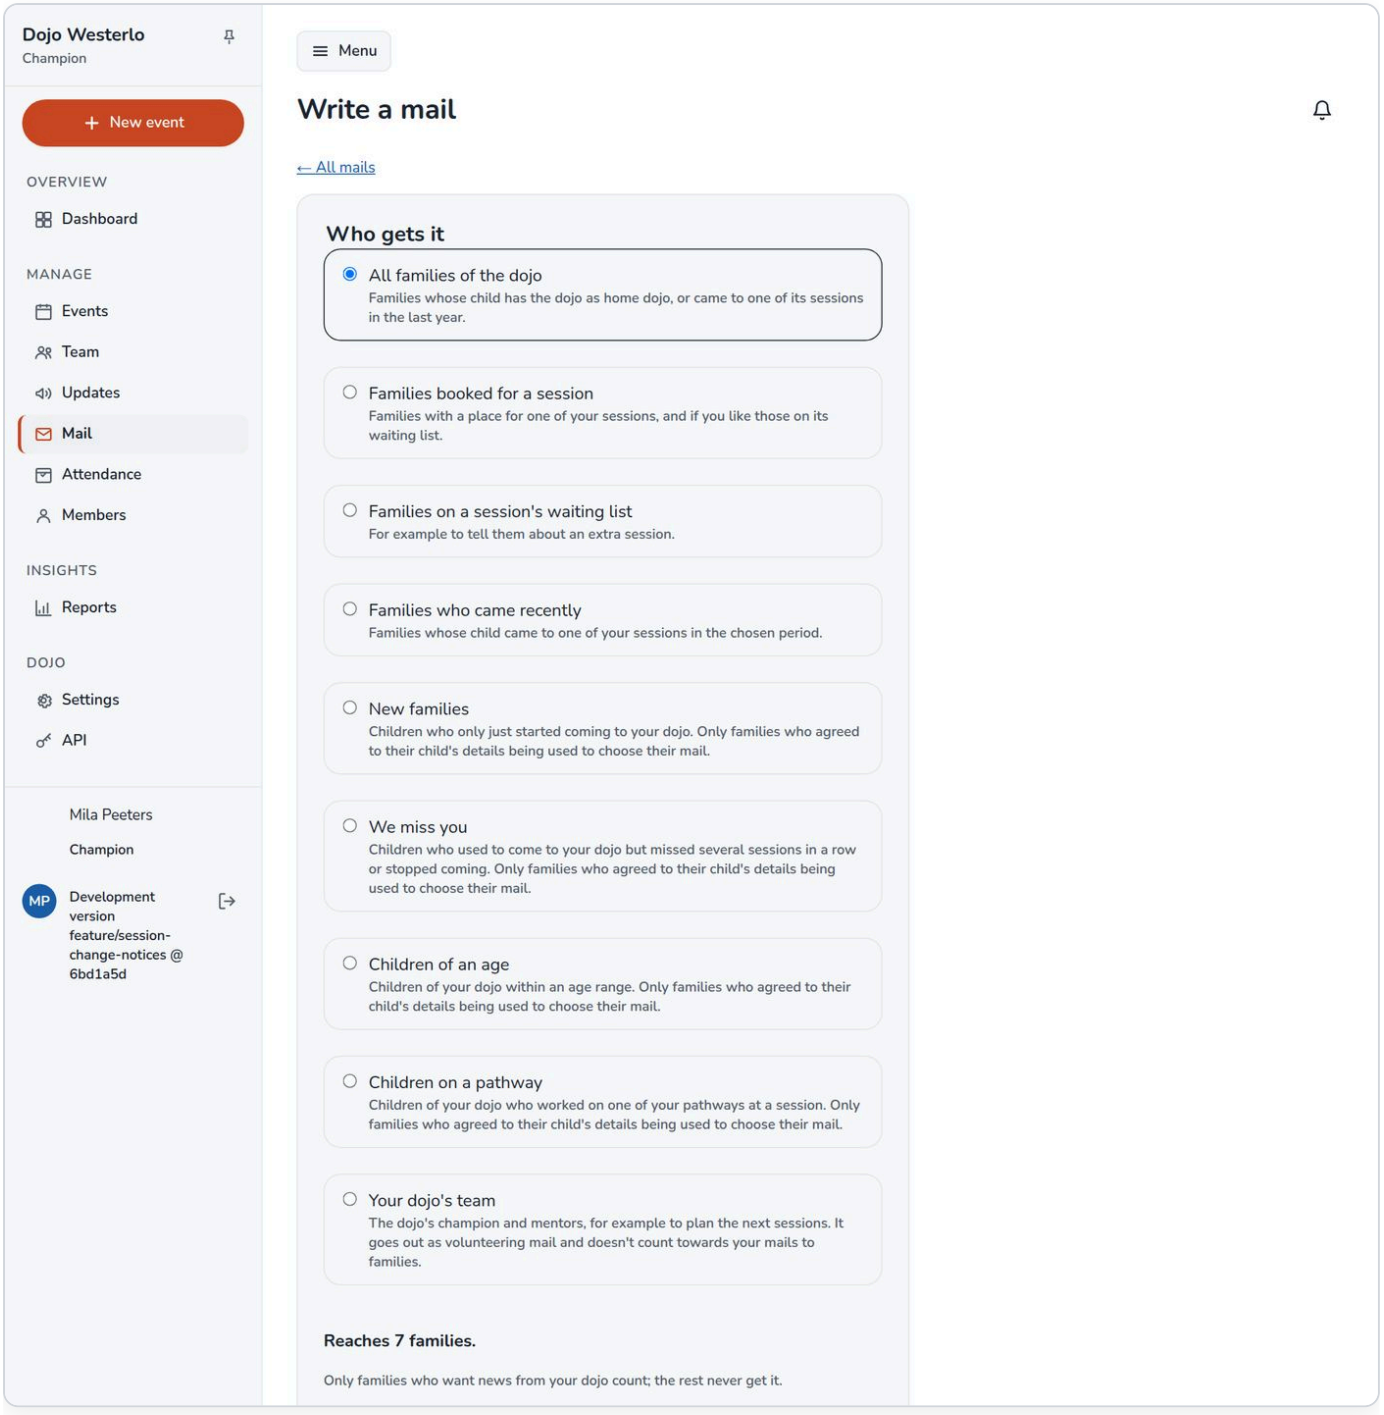

Step 16

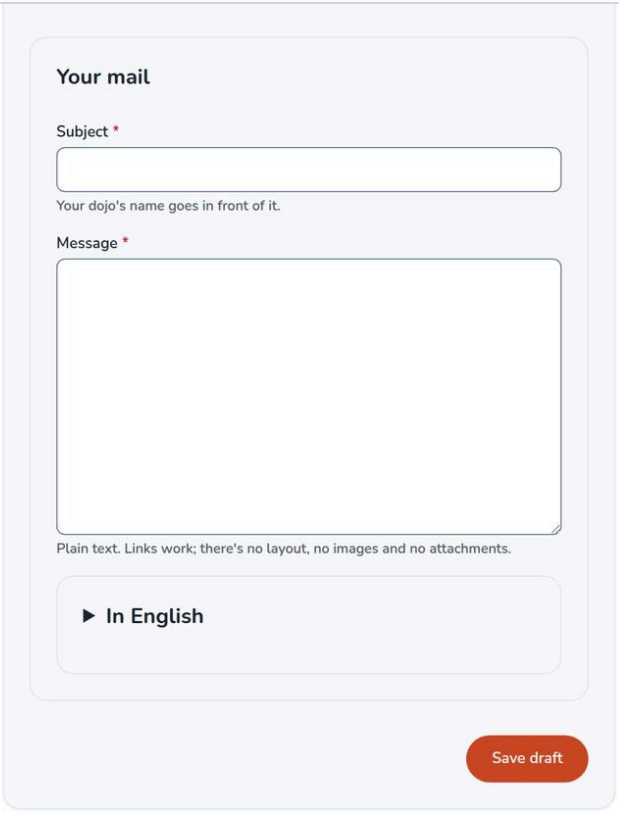

Writing a mailing

Subject and message in each of the dojo's languages and a prepared audience (all families, a child's age or belt, ...). Families reply straight to the dojo's address, and can mute one dojo's news.

`/dojos/51/manage/mail/new/`

Step 16 Writing a mailing (continued)

Step 17

API clients

For apps that work for the dojo (e.g. scanning children in at the door): OAuth 2.0 client credentials with attendance scopes, champion only.

`/dojos/51/manage/api/`
