Champion

The person who runs a dojo. The champion has every mentor capability plus the dojo's lifecycle, the children's health notes, mail to the dojo's families and the dojo's API clients.

Screenshots taken on the development site (seeded demo data) as **owner-51-dojo-westerlo (champion of Dojo Westerlo)**, 17 October 2026.

The journey

- Watch the dashboard and next session
- Keep the dojo's public profile up to date
- Plan and publish sessions, handle the waiting list
- Take attendance, manage the team and members
- Post updates, mail families, connect apps

Steps in this document

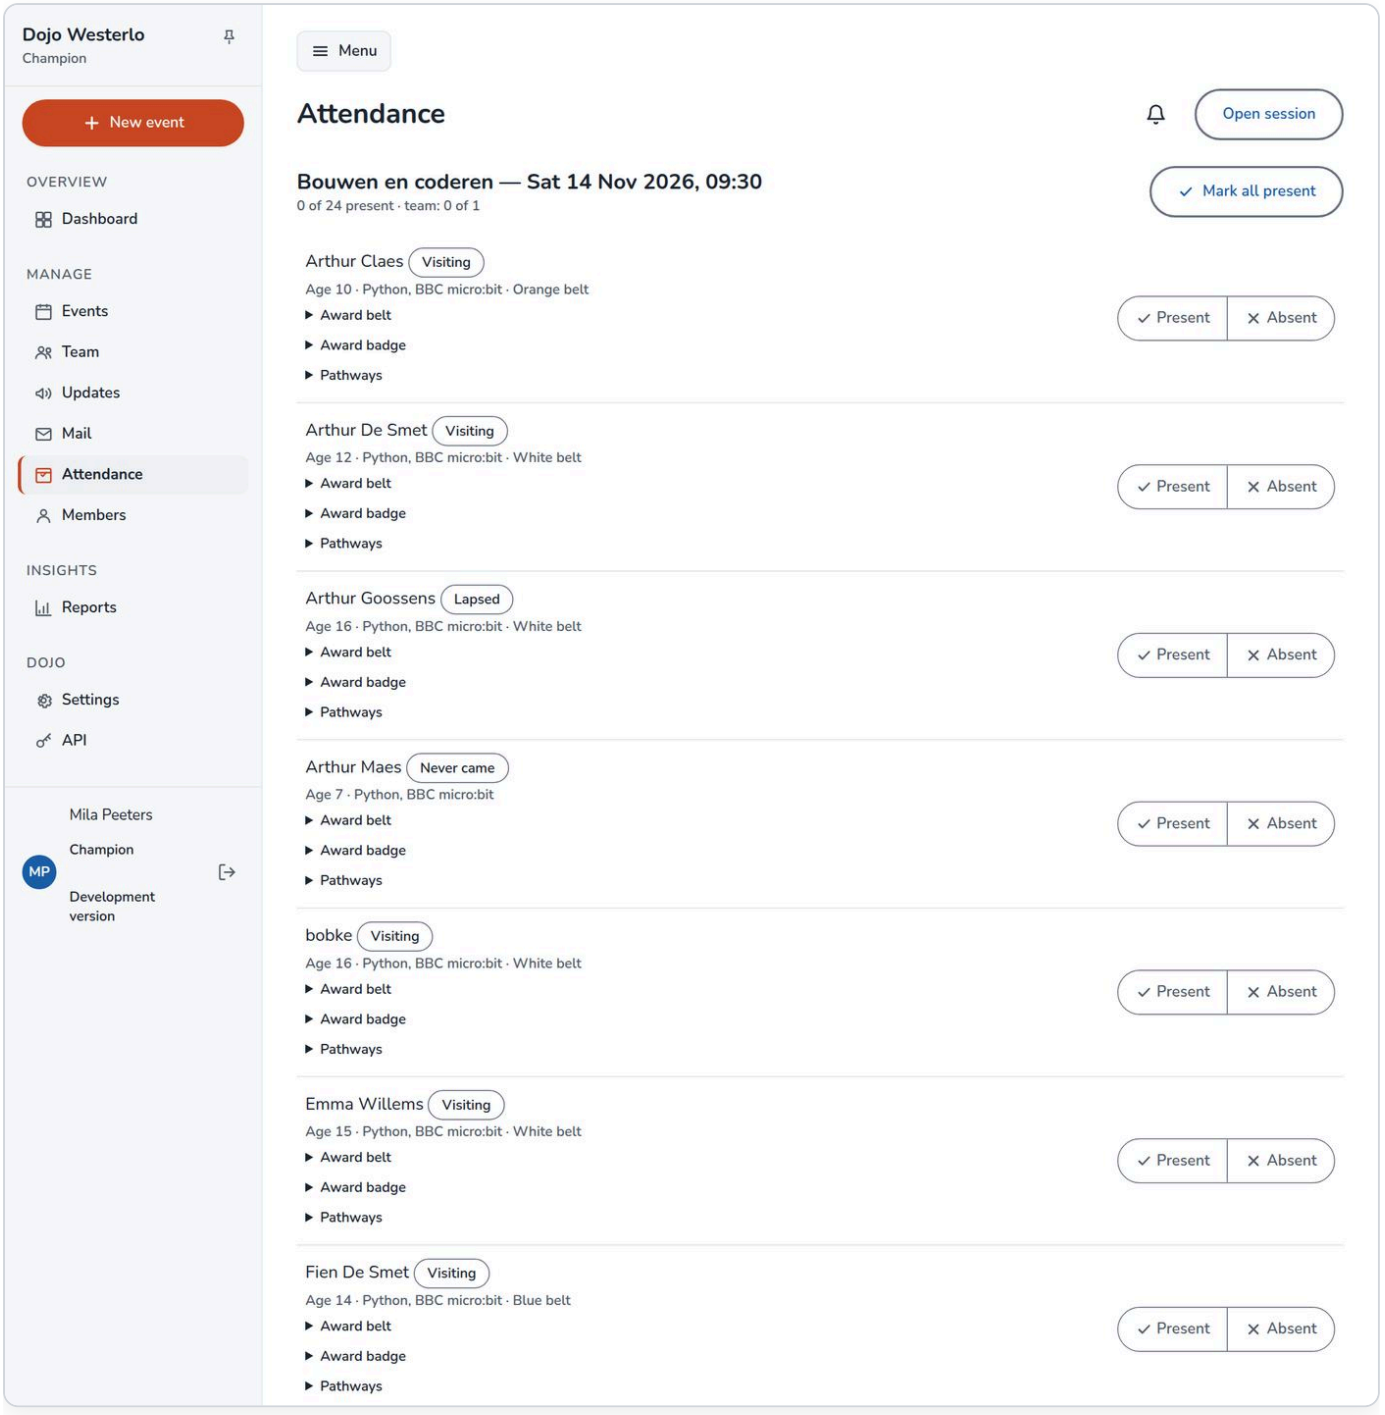

1. The dojo dashboard
2. Dojo settings
3. Sessions
4. Planning a new session
5. A full session with a waiting list
6. Attendance with health notes
7. Managing the team
8. Members
9. Updates
10. Mail to the families
11. Writing a mailing
12. API clients

Step 1

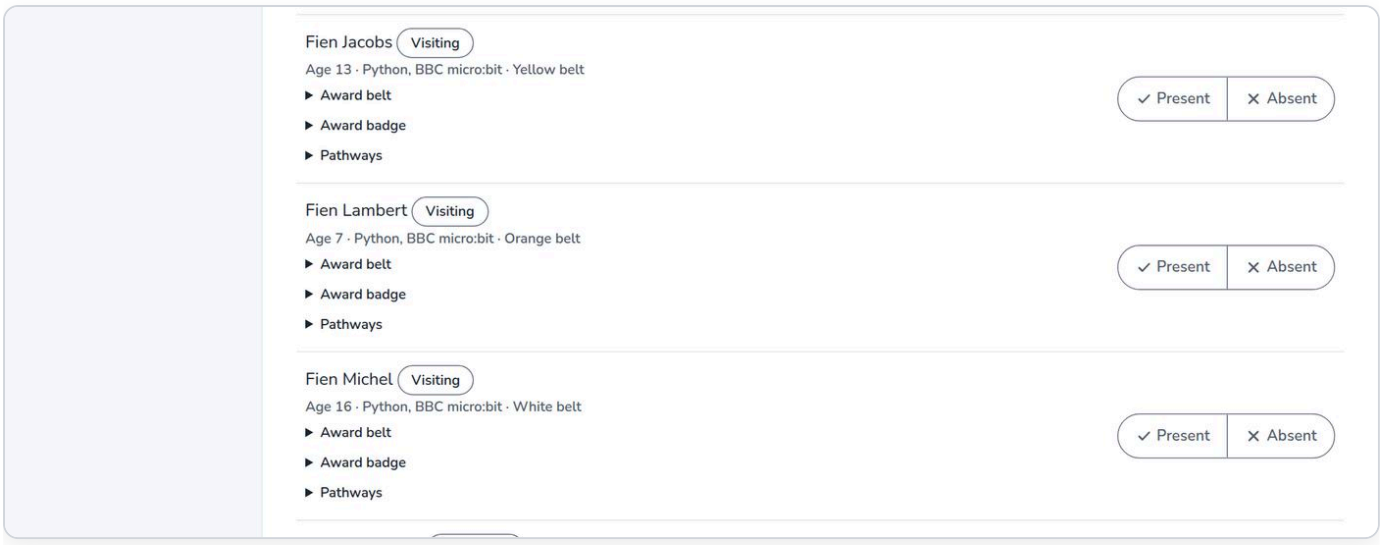

The dojo dashboard

The champion's home: the next session's attendance, a banner if the dojo isn't active, and the six-month dormancy nudge when the dojo has gone quiet.

`/dojos/51/dashboard/`

Step 1 The dojo dashboard (continued)

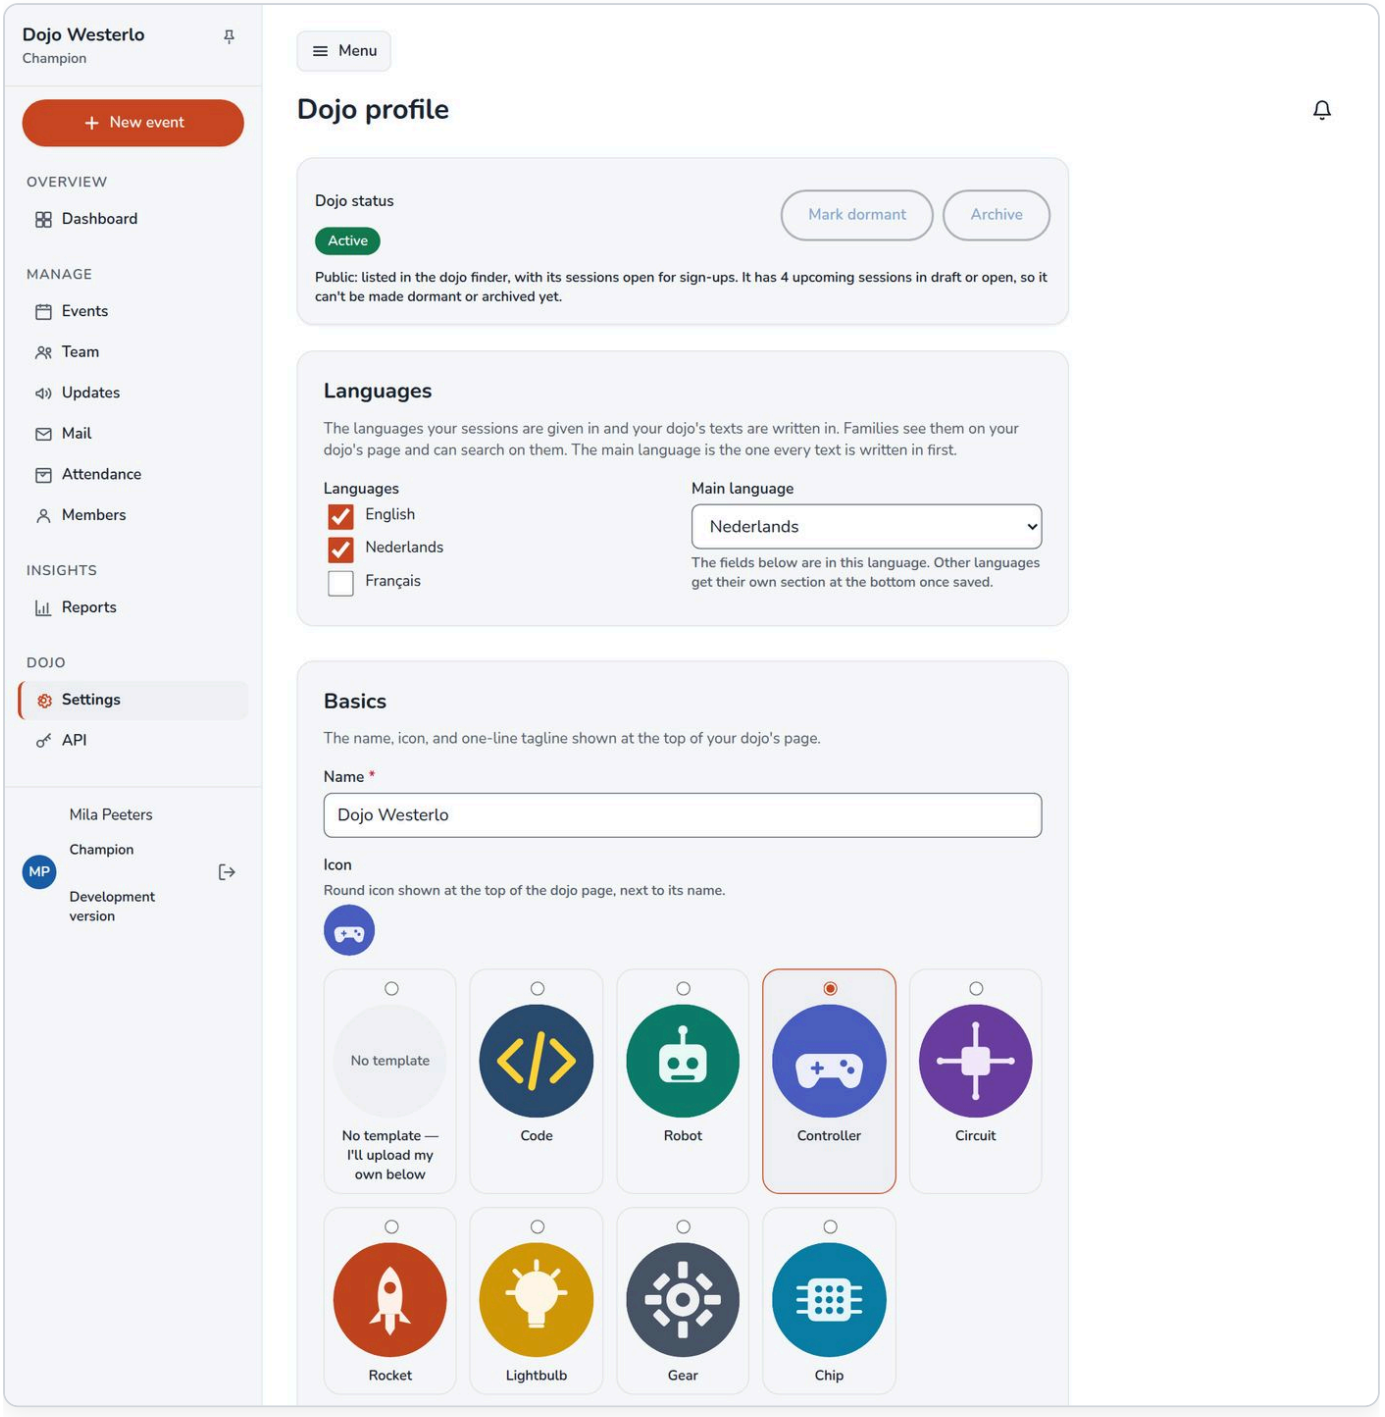

Step 2

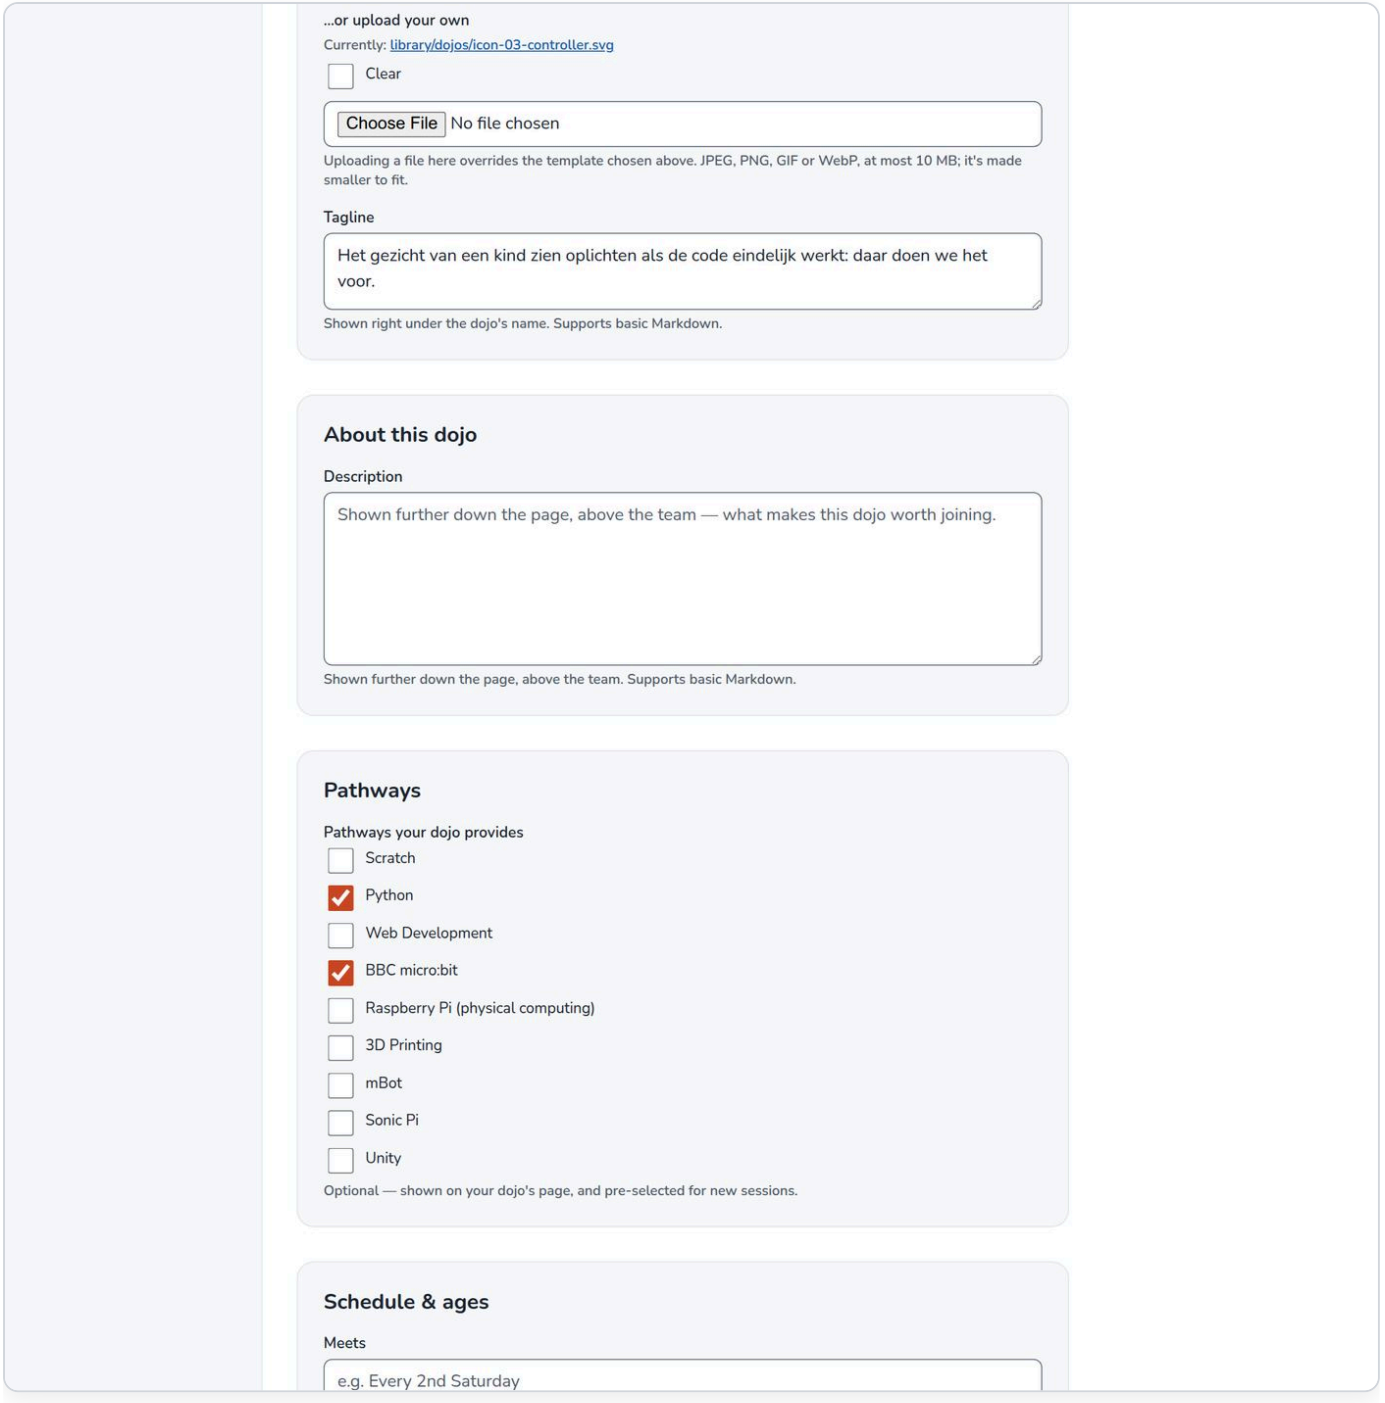

Dojo settings

At the top, the dojo's status: only the champion launches the dojo, marks it dormant or archives it (never with open sessions) and reopens it. Below, everything on the dojo's public page: name, description in each of the dojo's languages, icon, address (re-geocoded on save), contact details and pathways.

`/dojos/51/manage/`

Step 2 Dojo settings (continued)

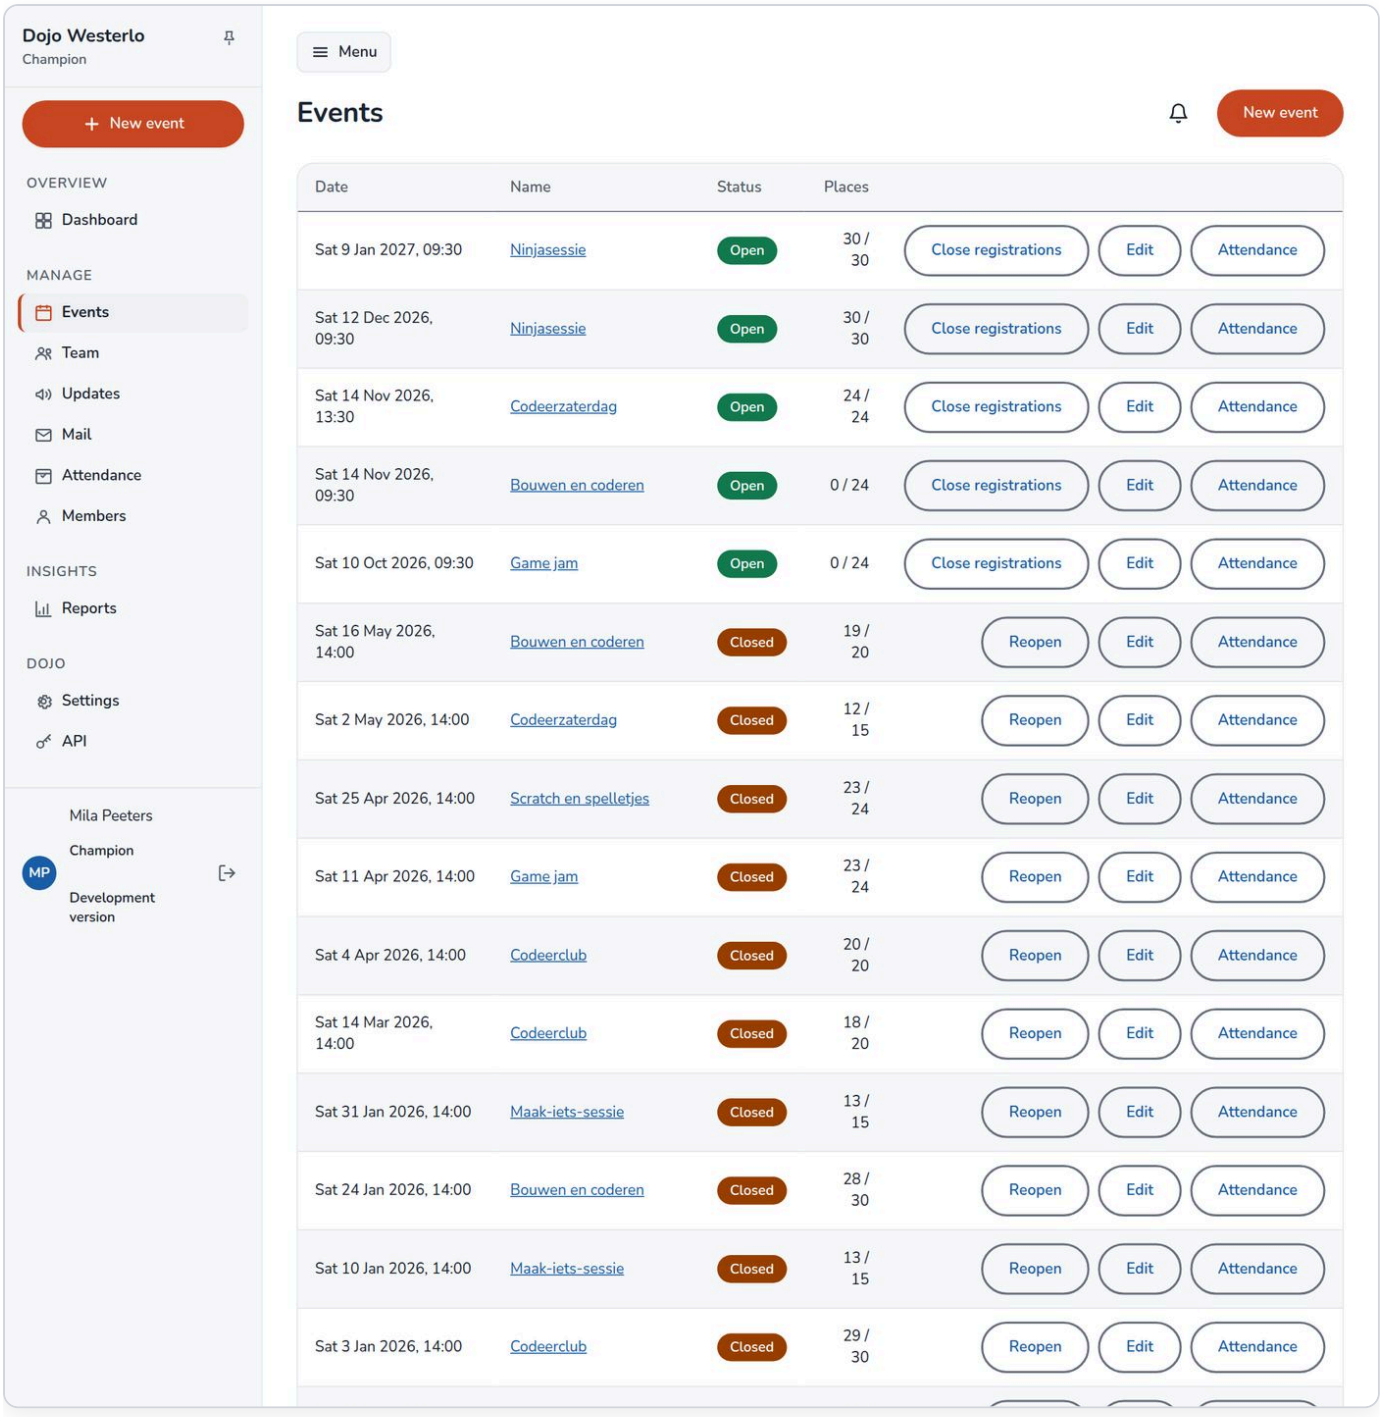

Step 3

Sessions

All the dojo's sessions with their status (draft, open, closed) and one-click next steps.

`/dojos/51/events/`

Step 3 Sessions (continued)

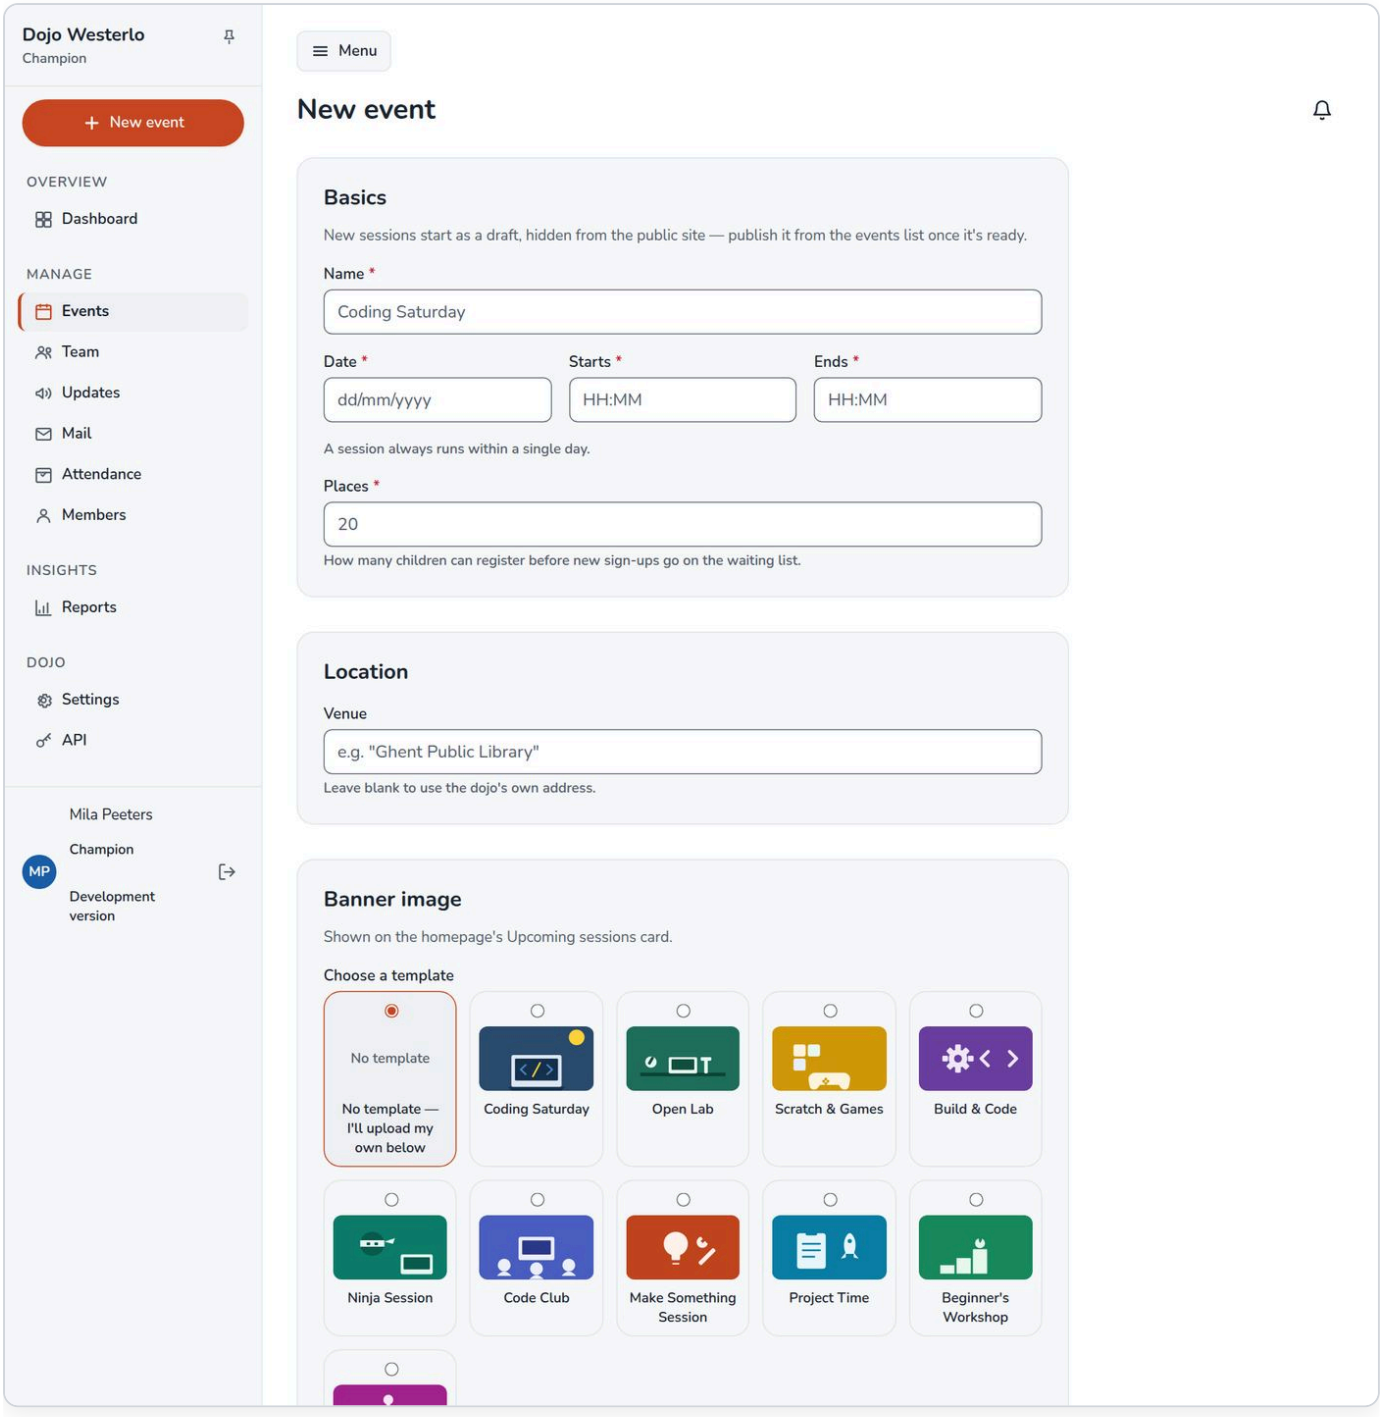

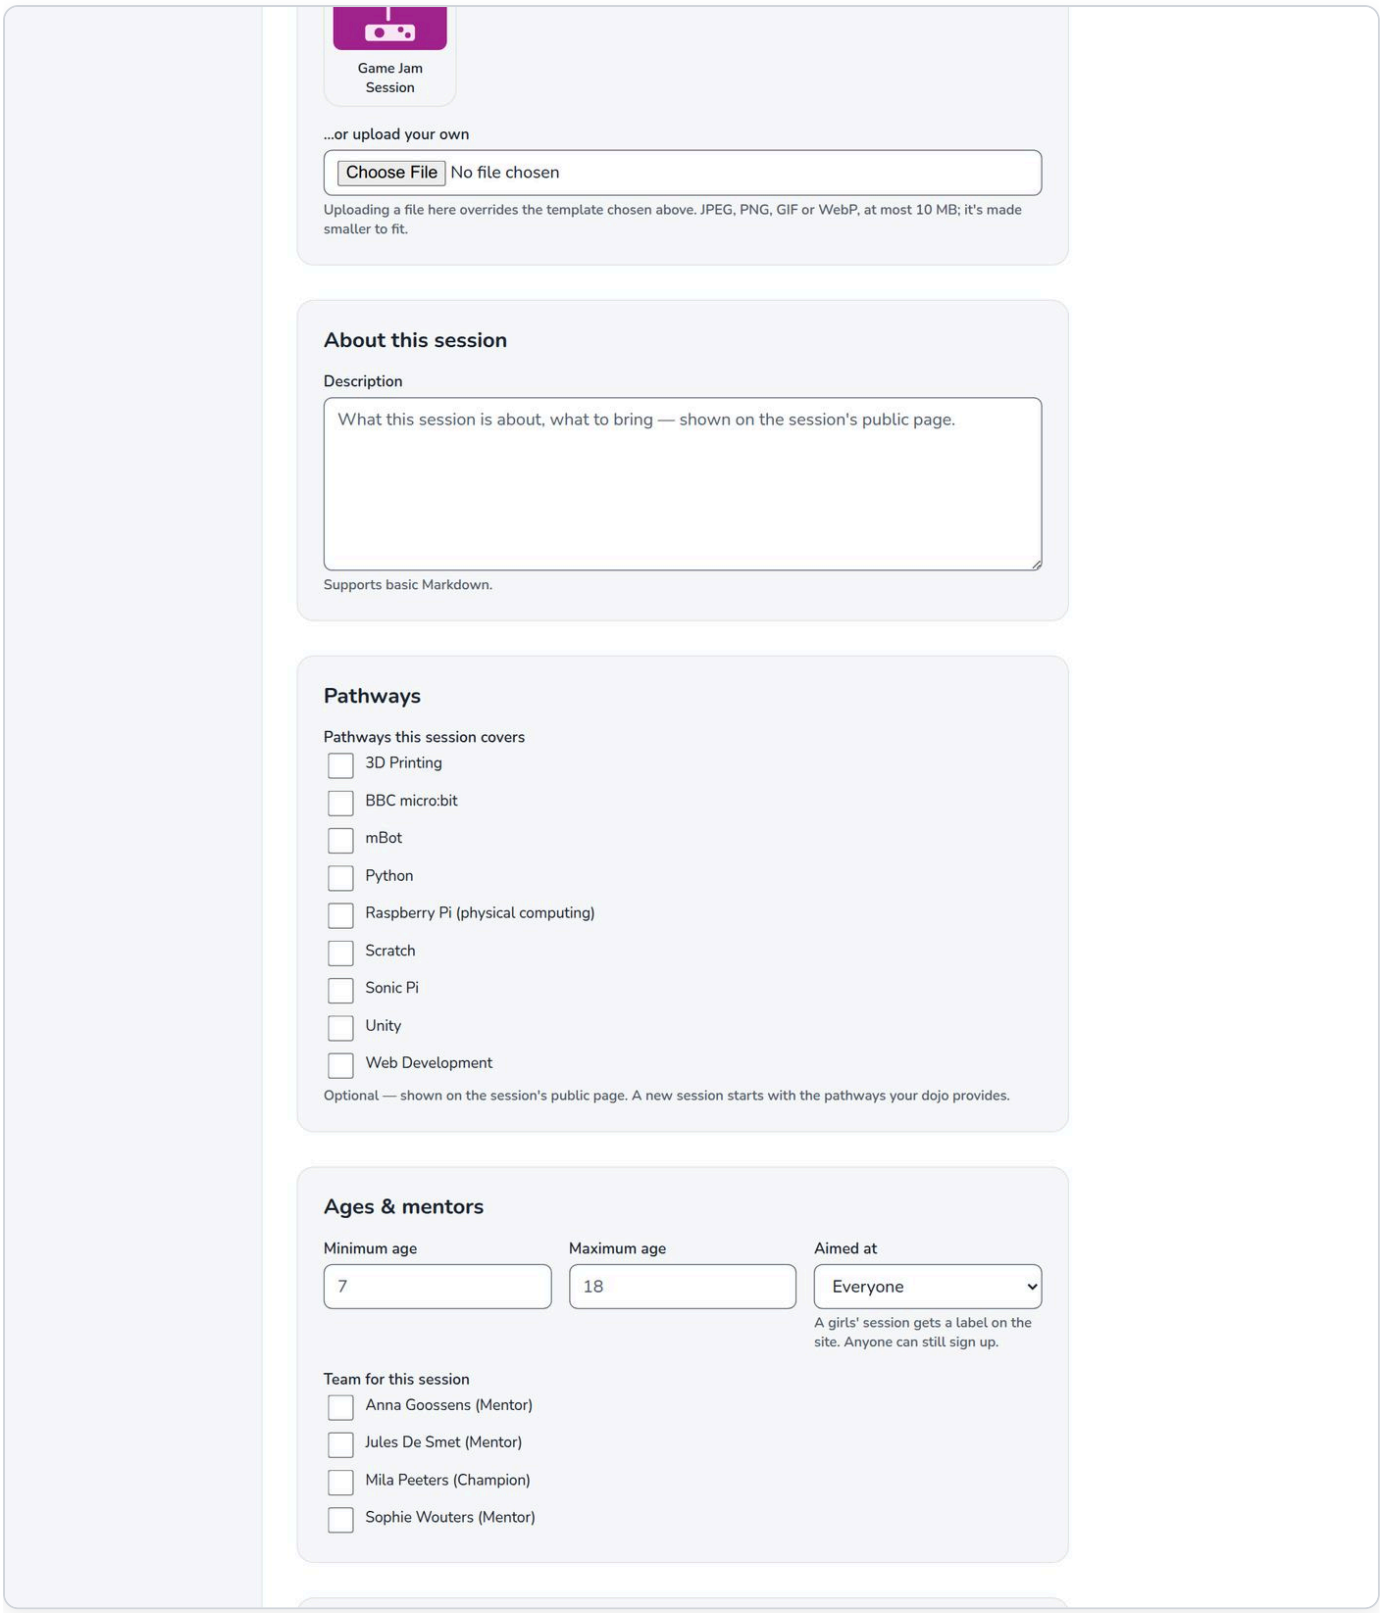

Step 4

Planning a new session

A new session: date and times (Belgian notation), places, age range, audience (e.g. a girls' session), a banner from the image library or an upload, the team running it and the pathways. It starts with the sign-up questions of the dojo's latest session, and as a draft; publishing opens registrations and the families get the new-sessions mail.

`/dojos/51/events/new/`

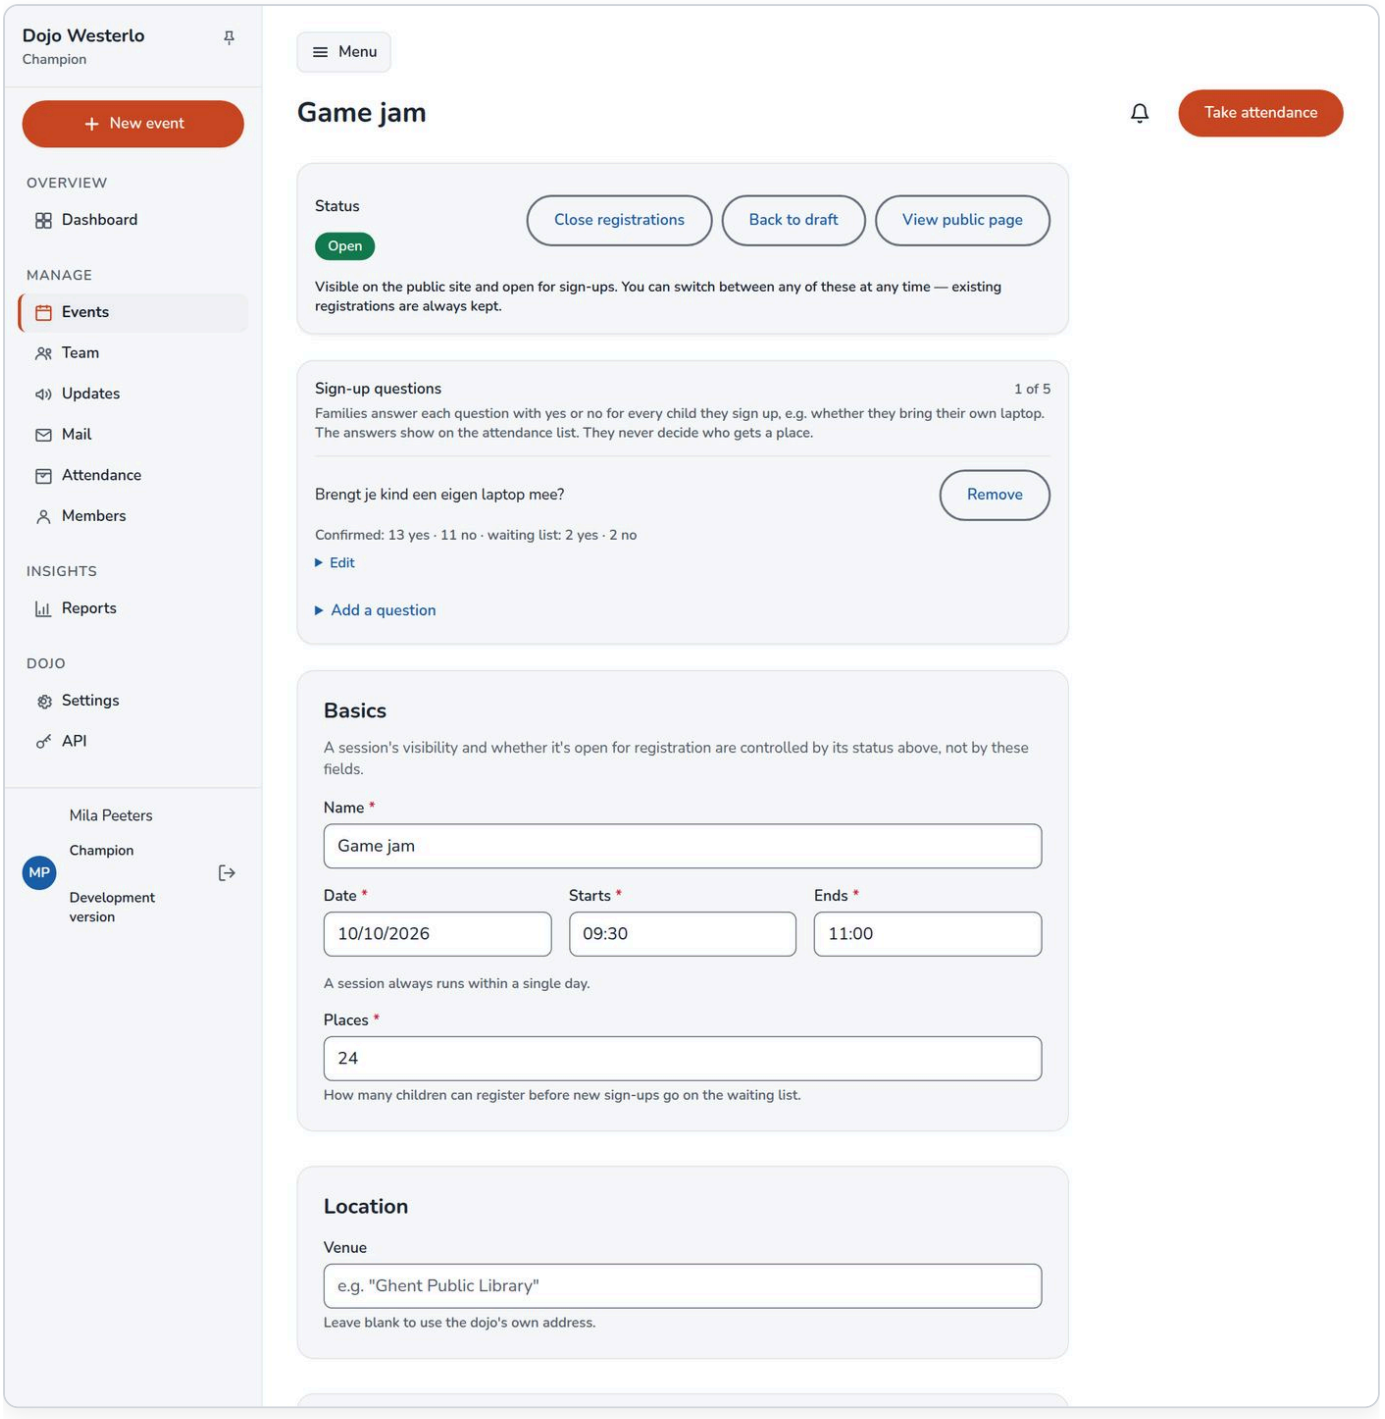

Game Jam Session
...or upload your own
Choose File No file chosen
Uploading a file here overrides the template chosen above. JPEG, PNG, GIF or WebP, at most 10 MB; it's made smaller to fit.
About this session
Description
What this session is about, what to bring — shown on the session's public page.
Supports basic Markdown.
Pathways
Pathways this session covers
3D Printing
BBC micro:bit
mBot
Python
Raspberry Pi (physical computing)
Scratch
Sonic Pi
Unity
Web Development
Optional — shown on the session's public page. A new session starts with the pathways your dojo provides.
Ages & mentors
Minimum age
7
Maximum age
18
Aimed at
Everyone
A girls' session gets a label on the site. Anyone can still sign up.
Team for this session
Anna Goossens (Mentor)
Jules De Smet (Mentor)
Mila Peeters (Champion)
Sophie Wouters (Mentor)

Step 5

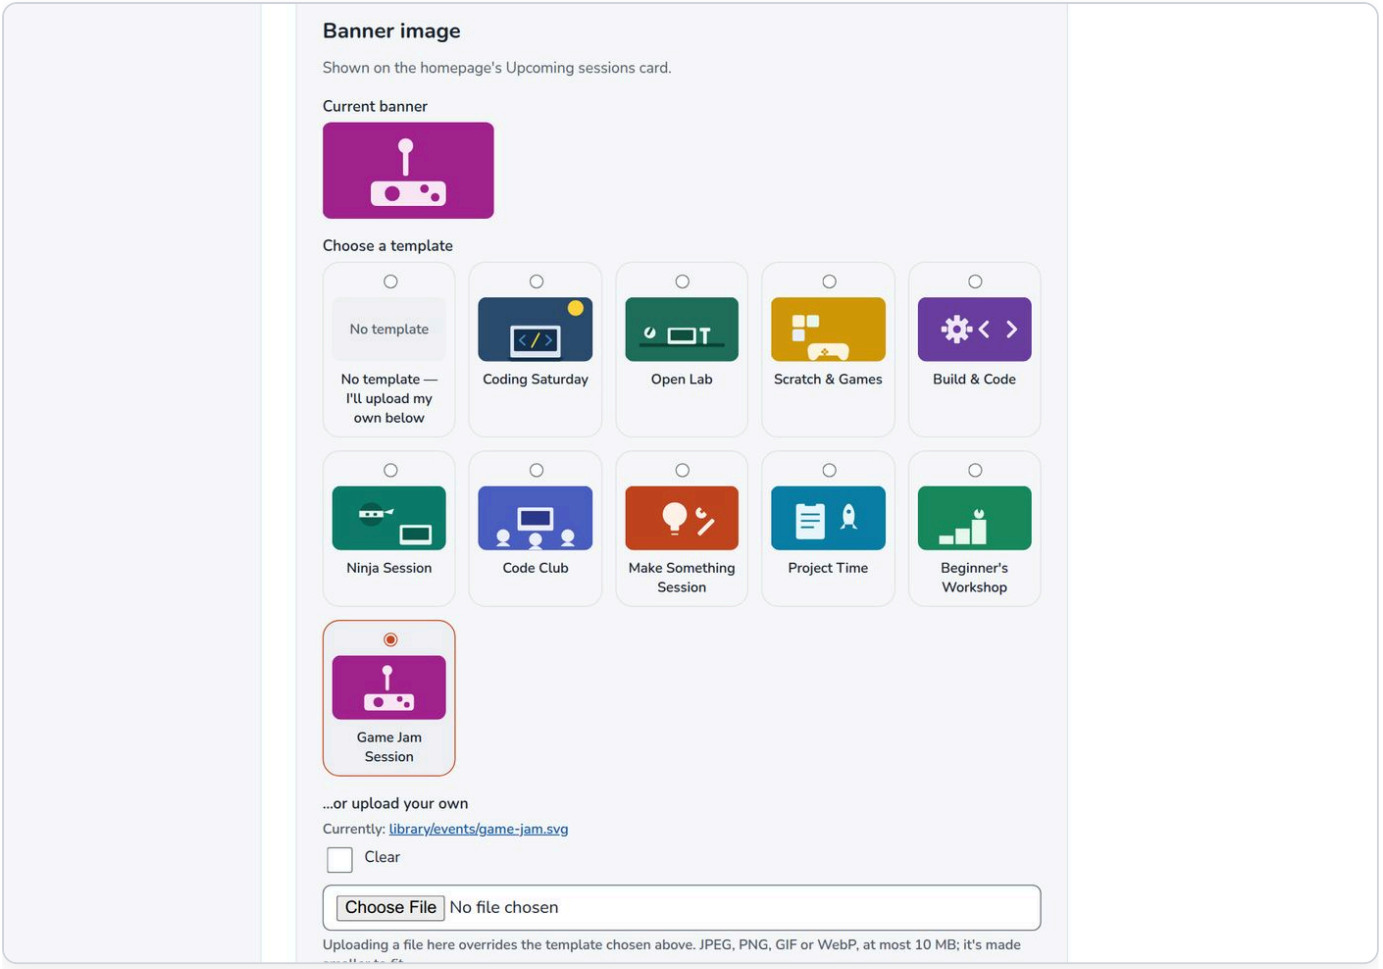

A full session with a waiting list

The session page shows places taken and the waiting list; when a family cancels, the first child waiting is promoted and their family is mailed. Its Sign-up questions card asks families yes/no questions per child (here the laptop question), with the totals for confirmed places and the waiting list.

`/dojos/51/events/76/`

Step 5 A full session with a waiting list (continued)

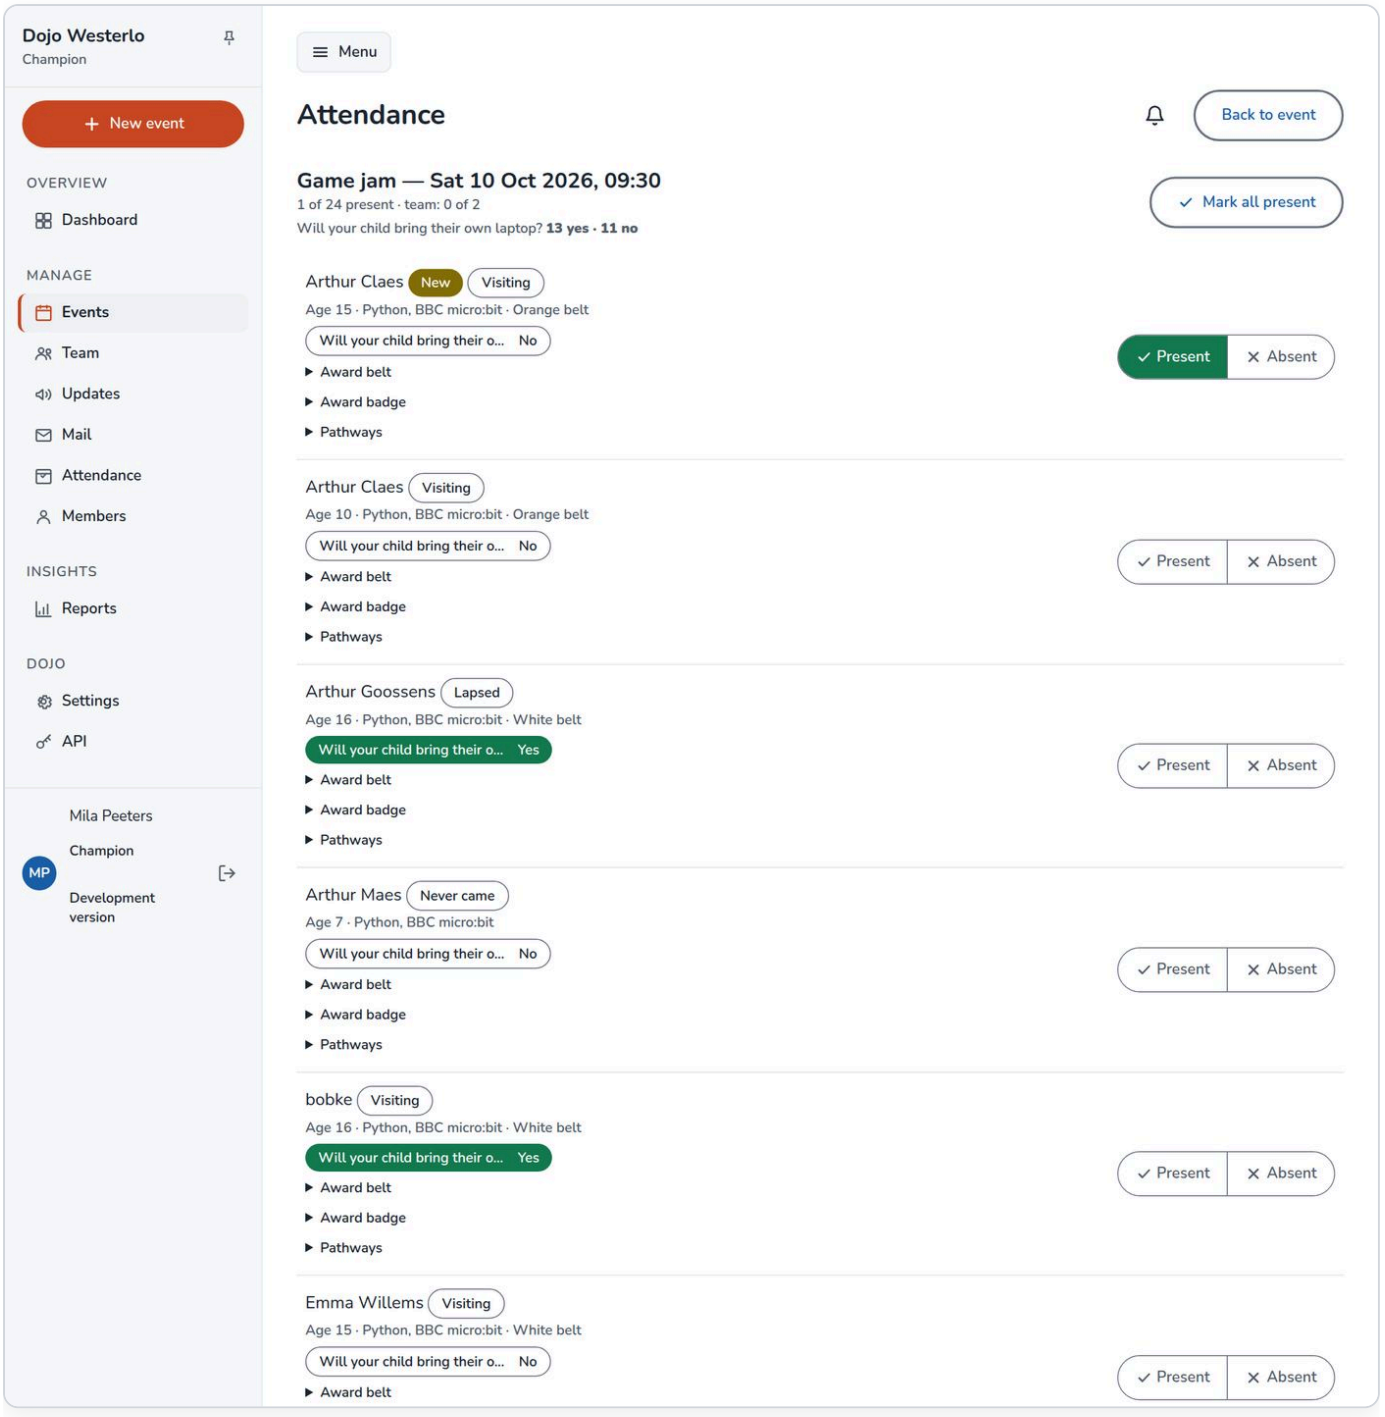

Step 6

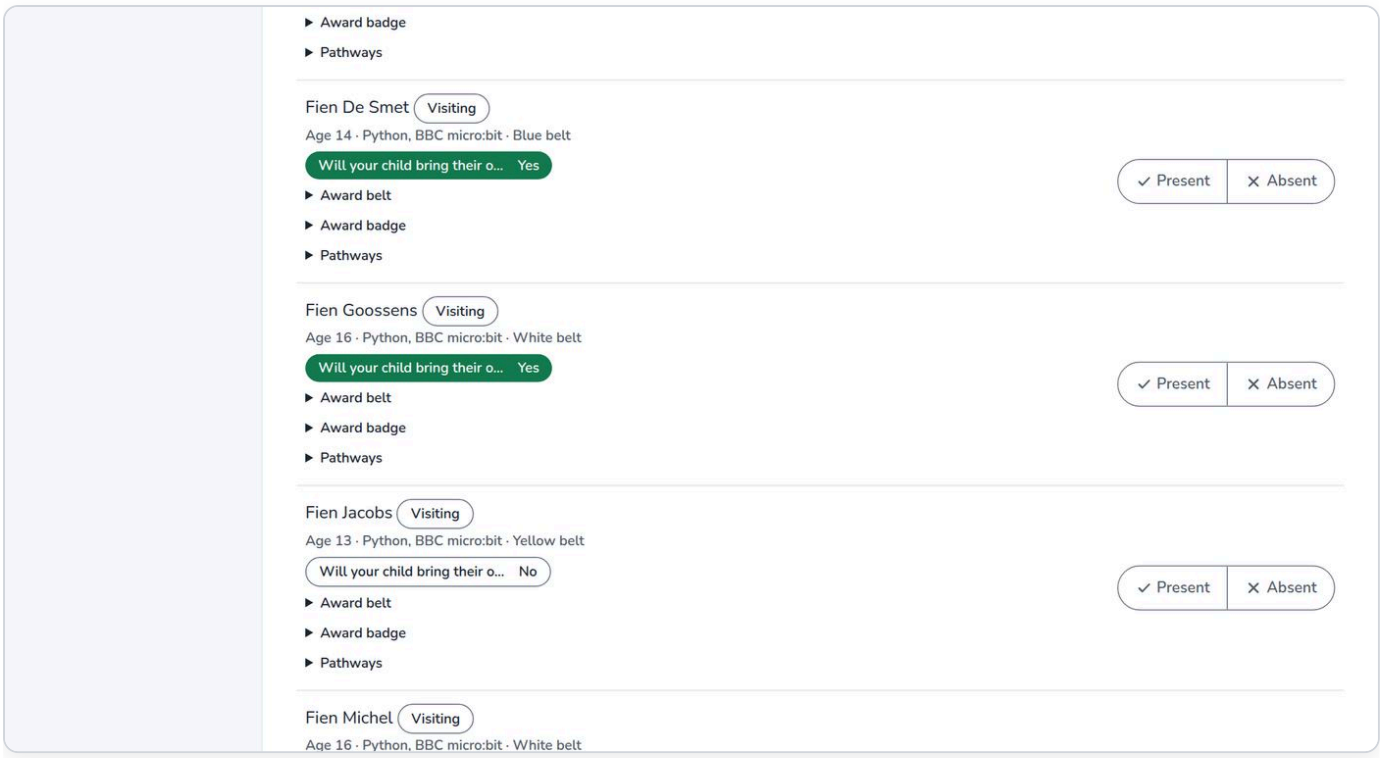

Attendance with health notes

The champion's attendance list also shows the family's allergy and health notes, only for children with a confirmed place, and every view of them is recorded in the audit log. The answers to the sign-up questions are on each row, with the totals at the top.

`/dojos/51/events/76/attendance/`

Step 6 Attendance with health notes (continued)

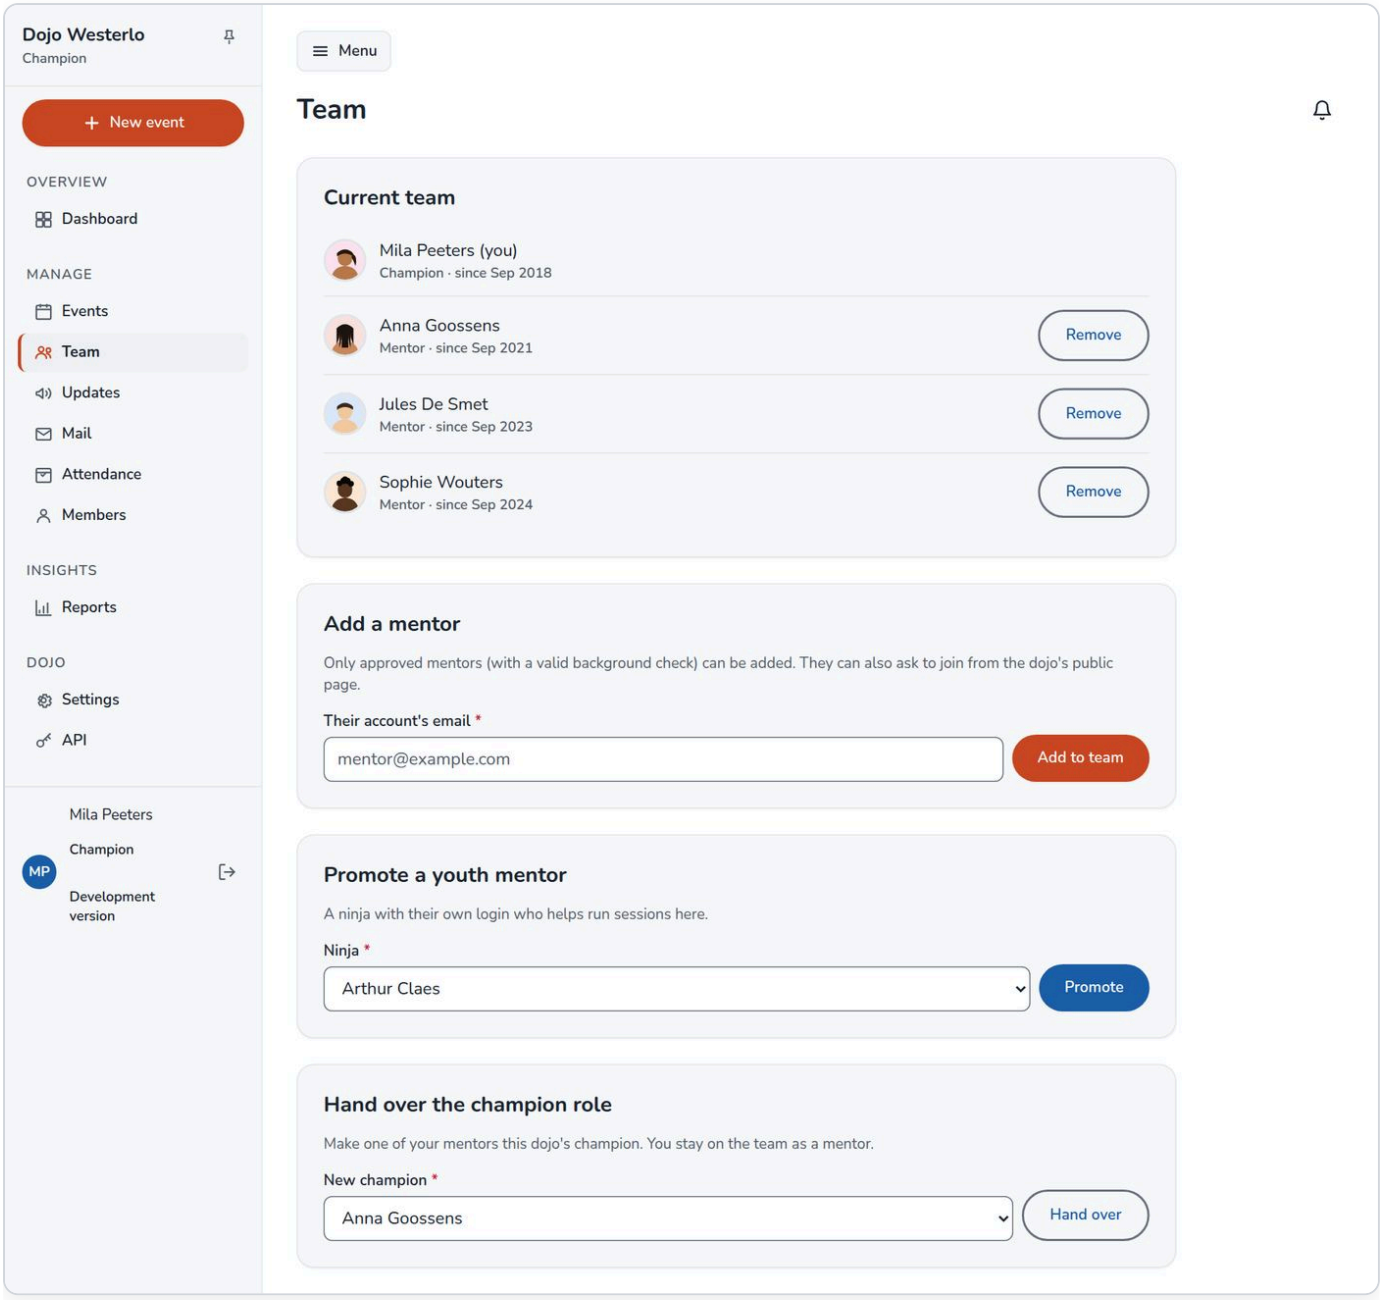

Step 7

Managing the team

Accept join requests, add mentors, promote youth mentors, and hand over the champion role to an active mentor.

`/dojos/51/manage/team/`

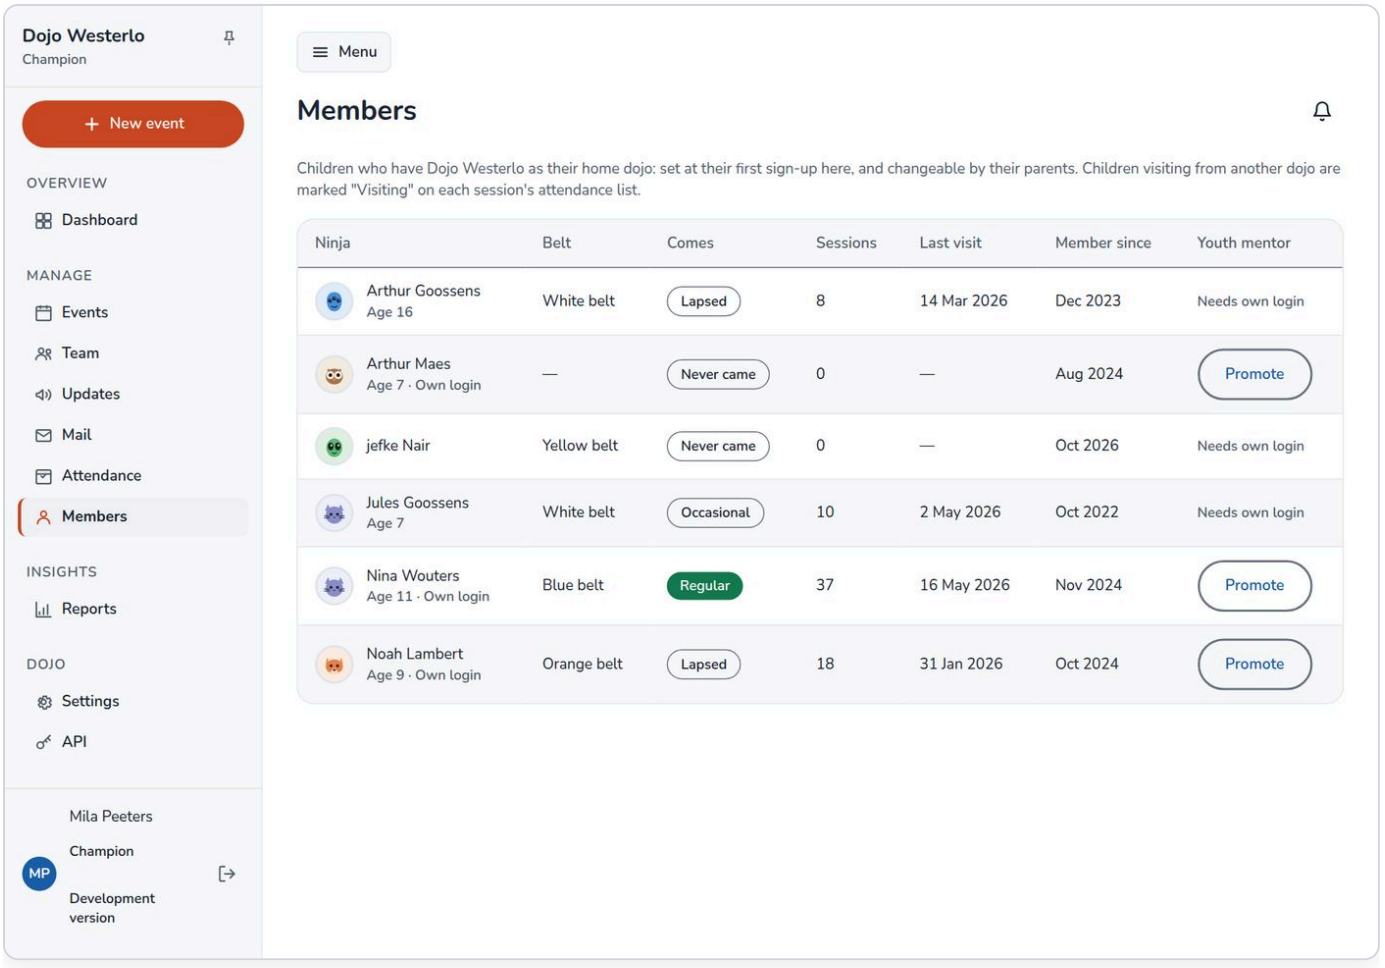

Step 8

Members

The children whose home dojo this is, with a button to promote one to youth mentor.

`/dojos/51/manage/members/`

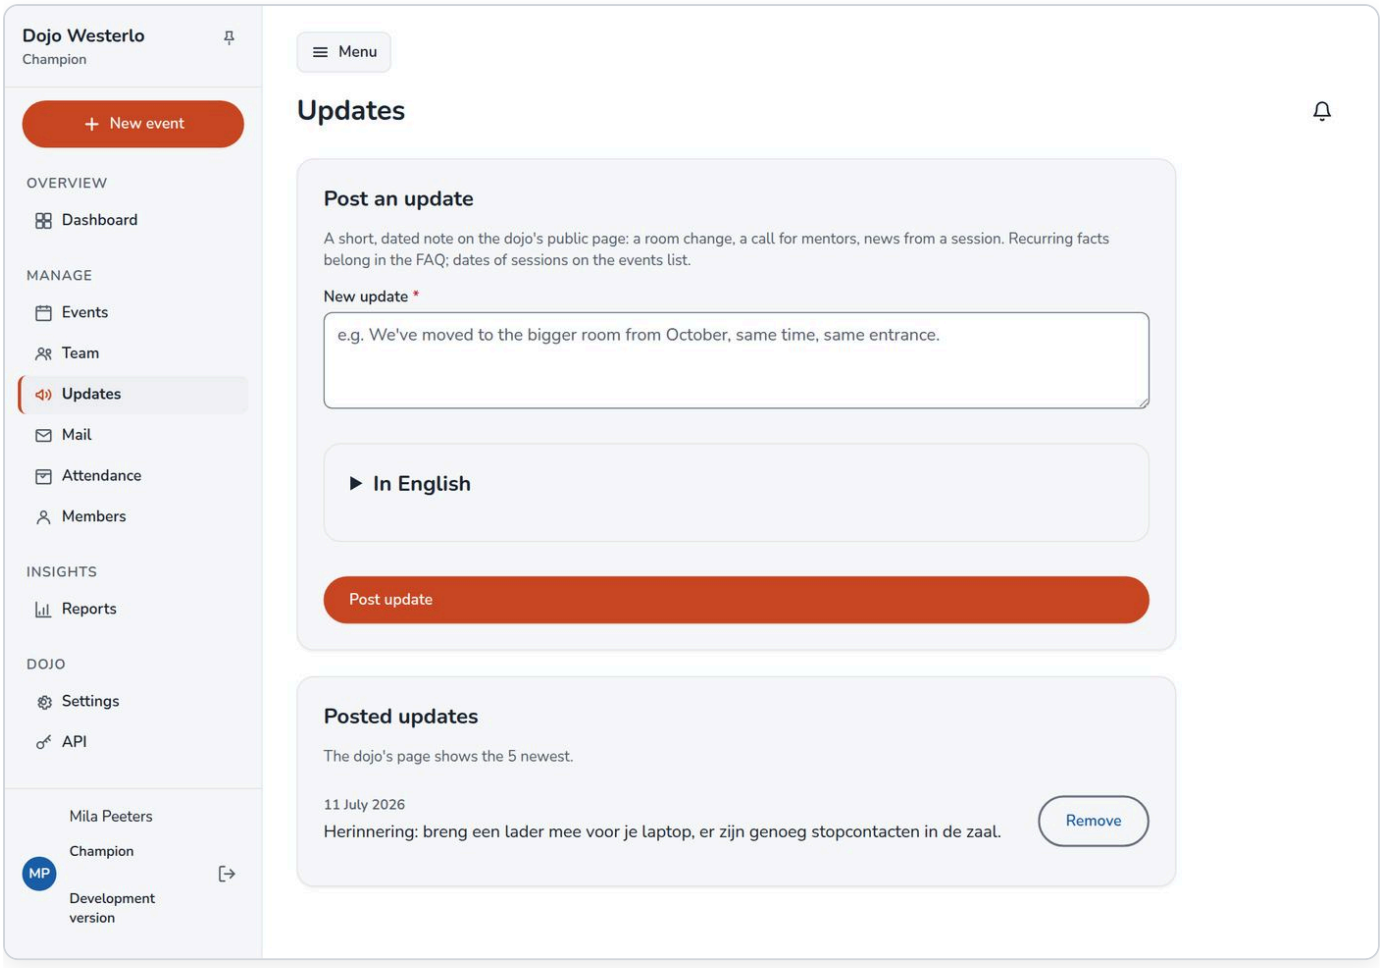

Step 9

Updates

Short 'From this dojo' notes shown on the public dojo page.

`/dojos/51/manage/updates/`

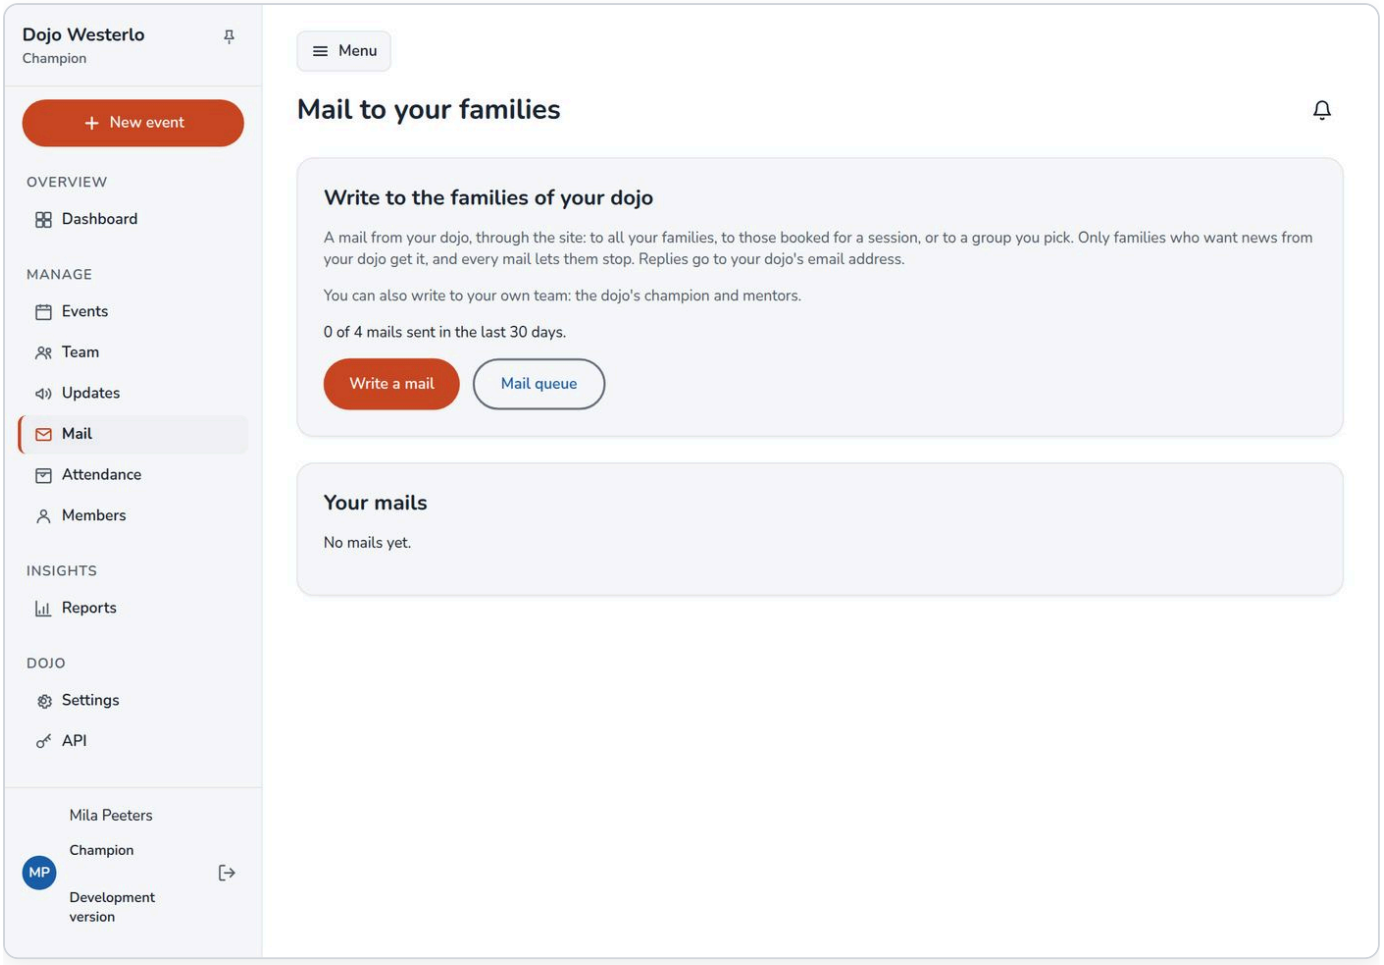

Step 10

Mail to the families

The champion writes to the dojo's families (or its own team), at most a few mailings a month. The team sees counts, never families' addresses.

`/dojos/51/manage/mail/`

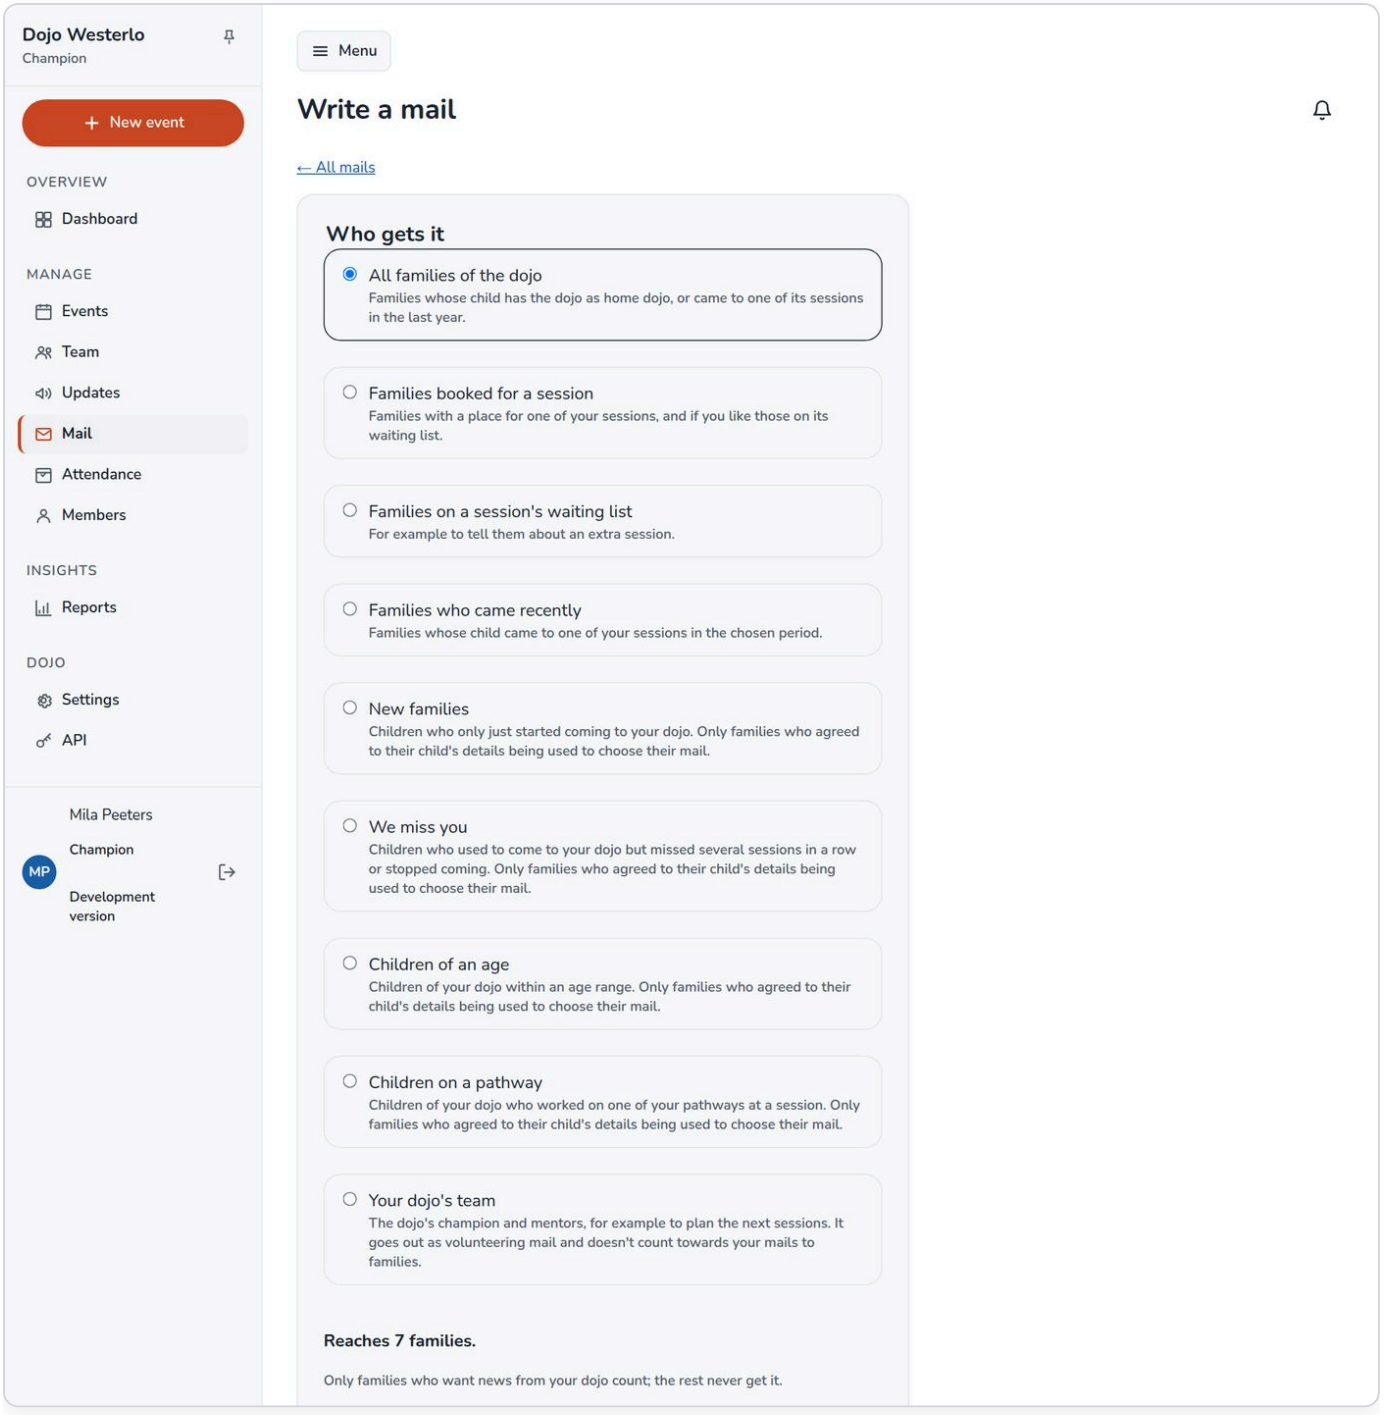

Step 11

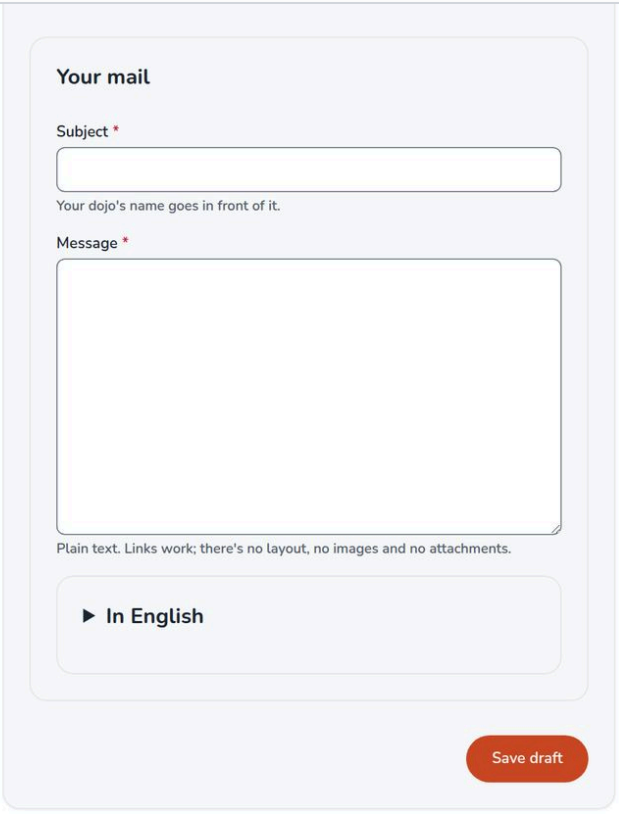

Writing a mailing

Subject and message in each of the dojo's languages and a prepared audience (all families, a child's age or belt, ...). Families reply straight to the dojo's address, and can mute one dojo's news.

`/dojos/51/manage/mail/new/`

Step 11 Writing a mailing (continued)

Step 12

API clients

For apps that work for the dojo (e.g. scanning children in at the door): OAuth 2.0 client credentials with attendance scopes, champion only.

`/dojos/51/manage/api/`
