

Ninja

A child aged 7–17 who comes to a dojo. Most ninjas never log in; their parent can give them a login of their own, so they can follow their progress and sign themselves up.

Screenshots taken on the development site (seeded demo data) as **guardian-5-child-1** (Lotte, 14, own login, home dojo **Zonnebeke**), 29 September 2026.

The journey

- Log in with the login a parent set up
- See belts, badges and session history
- Explore learning pathways
- Sign themselves up for a session
- Manage their own sign-in security

Steps in this document

- | | |
|------------------------------------|--------------------------------|
| 1. Logging in with their own login | 5. ... and signs themselves up |
| 2. My belts, badges and history | 6. Place confirmed |
| 3. Explore a learning pathway | 7. Their own sign-in security |
| 4. Find the next session | |

Step 1

Logging in with their own login

A parent can give a child (7–17) a login of their own, with a password or login links (two-step login is possible too). The child logs in with the username the parent was given.

/login/

The screenshot shows the CoderDojo Belgium login page. At the top, there is a navigation bar with the CoderDojo Belgium logo, links for Home, Events, and Dojos, a language dropdown set to English, a search icon, and buttons for Log in and Sign up. The main content area features a 'Welcome back' section with the text 'Log in to see your dojo's schedule and manage your account.' Below this are input fields for Email (containing 'guardian-5-child-1') and Password (masked with dots). There are checkboxes for 'Remember me' and a link for 'Forgot password?'. Two buttons are present: a red 'Log in' button and a white 'Log in with an emailed link' button. At the bottom of the login section, there is a link 'New to CoderDojo? Create an account'. The footer contains the text 'CoderDojo Belgium vzw · Liersesteenweg 4, 2800 Mechelen · info@coderdojo-belgium.be'.

Step 2

My belts, badges and history

The ninja sees their current belt and who awarded it, their badges (with progress towards the next attendance wristband) and every session they came to. They can look, not edit: their details stay with the parent (the one thing they change themselves is their avatar, from the standard set).

Scratch

Drag-and-drop blocks and real games from your very first Saturday — no experience needed.

Ages 7–10

No experience needed

Runs in the browser

About this pathway

Scratch is where almost every ninja starts. Instead of typing code, you snap together coloured blocks to make a character move, react and keep score — so you're building a real game or animation in your first session, mistakes and all. It's the same block-based approach used in schools everywhere, just with a mentor next to you and a room full of other kids building their own thing at the same time.

What you'll build

A few of the projects kids on this pathway have walked out with.

A platformer game
Design your own levels, add a jumping hero, and make it a little harder to beat with each try.

A quiz game
Write your own questions and keep score when a friend picks up the controls.

An animated card
Combine sprites, sound and a bit of logic into something you can actually send someone.

How a session works

Every dojo runs this a little differently, but it usually looks like this.

1
Pick a starter project
Mentors bring a few ready-to-remix projects along for anyone who wants a running start.

2
Make it your own
Change the art, the rules, the story — it's not finished until you've broken something on purpose.

3
Show the group
Most sessions end with a few kids sharing their screen — no pressure, just show-and-tell.

Skills you'll pick up

Step 3 Explore a learning pathway (continued)

The building blocks every later pathway builds on.

Workshop voor beginners

Wed 14 Oct · 13:00–18:00
 Hosted by [Dojo Zonnebeke](#)

About this session

Only in Nederlands (België)

Workshop voor beginners is een sessie voor beginners waarin je zelf aan de slag gaat. Wat je doet:

- Kies een project en begin te bouwen
- Krijg hulp van een mentor als je vastzit
- Toon op het einde wat je maakte (helemaal vrijblijvend)

Breng mee

- Een laptop, als je er een hebt (we hebben er een paar om te lenen)
- Een drinkfles en een tussendoortje

Niet nodig

Geen ervaring, geen accounts om vooraf aan te maken: we helpen je op de dag zelf op weg.

Pathways this session covers

Step 5

... and signs themselves up

With their own login a ninja can sign only themselves up. The parent still gets the confirmation mail.

 [Lotte ▾](#)

Sign-in security

With two-step login, logging in takes your password and a second step: a code from an app on your phone, or a passkey. Someone who finds out your password still can't get in.

How you log in

With your password. [Change password](#)

Rather not remember a password? Log in with a link we mail you each time.

[Switch to a login link](#)

Two-step login

[Off](#)

Choose your second step. You can add the other one later too.

Authenticator app

An app such as Google Authenticator, Microsoft Authenticator or your password manager shows a new six-digit code every 30 seconds.

[Set up an app](#)

Passkeys

Your phone, computer or a security key confirms it's you with your fingerprint, face or PIN. Nothing to type, and it can't be tricked by a fake site.

[Add a passkey](#)
