

Background-check reviewer

An organisation role that only reviews background checks and decides volunteer applications, in the Volunteers group of the organisation dashboard.

Screenshots taken on the development site (seeded demo data) as **org-sofie-claes** (organisation reviewer role, two-step login), 29 September 2026.

The journey

- Sign in with two-step login
- Work through the queue of background checks
- Validate or reject a document (which is then deleted)
- Approve or decline mentor and champion applications

Steps in this document

| 3. Reviewing one check | |

Step 1

Two-step login

Reviewers see criminal-record extracts, so this account signs in with a code from an authenticator app after the password (passkeys and backup codes work too). The organisation can require this per role.

Background checks

The reviewer lands on the Volunteers group, the only pages this role opens. The queue: documents waiting for review, checks waiting for a document, and expired or expiring checks.

Background checks

Champions and mentors need a valid extract from the criminal record (model 2, Article 596.2) before they can work with children. Open a person to download their document and decide on it: the document is deleted as soon as you do, only the decision is kept.

Awaiting review

Documents that were uploaded, oldest first.

Name	Applied for	Uploaded	Status

Waiting for a document

Asked for, or rejected and waiting for a new one. The person uploads it from the link in their mail or from their account page.

Name	Applied for	Requested	Status
Pieter Claes guardian-2@coderdojo-demo.example	Mentor (pending)	14/09/2026	Waiting for a document Send the link again
Julie Janssens guardian-4@coderdojo-demo.example	Mentor (rejected)	14/09/2026	Rejected, waiting for a new document Send the link again

Expired

Until they upload a new one, these people can't manage a dojo. They can upload it from their account page; you can also send them the link.

Name	Applied for	Expired on	Status
No expired checks.			

Expiring within 30 days

They get a reminder by mail 30 days before, so they can ask their municipality for a new extract in time.

Name	Applied for	Expires on	Status
No checks expire soon.			

Reviewing one check

One person's check: download the document, then validate or reject it. Either decision deletes the document immediately; only the decision, the reviewer and the expiry date are kept. Opening this page is recorded in the audit log.

Decide

Download the document

Every download is recorded. Don't keep a copy: delete the file once you've decided.

Note (optional)

Kept with the decision, for the other reviewers. Never copy anything from the extract itself into it.

Validating makes the check valid for a year. Rejecting asks the person to upload a new document. Either way the document is deleted straight away.

Step 5

Deciding an application

With a valid check the reviewer approves (an approved mentor can then join dojos; a champion can create one) or declines. Nobody decides on their own application or check.
